Cosmetic Dermatology Products and Procedures provides a comprehensive compendium of the approaches cosmetic dermatologists can apply for their patients. It is structured by use within a daily routine so the dermatologist can provide a complete solution for their patients. It reviews skin physiology and the delivery systems of cosmetics and how they affect the skin. It then looks sequentially at hygiene products for cleaning and moisturizing the skin, adornment products for colouring, before looking at antiaging techniques for rejuvenating the skin and their applications as therapeutics. Using short tightly focused chapters written by recognized experts, **Cosmetic Dermatology Products and Procedures** covers cosmetic applications for hygiene, adornment, and antiaging. Reviews the full range of cosmetic products and procedures. Provides both therapeutic and aesthetic applications. Comprises concise highly focused chapters enabling the reader to gather a thorough understanding. References key significant evidence presented for each chapter.

**Topical Applications and the Mucosa** C. Surber, P. Elsner, M. A. Farage, 2011-02-10. Mucosal membranes have unique anatomical and physiological properties differing from those of the keratinized epithelium which affect drug or chemical absorption. This makes the diagnosis and treatment of diseases of the mucosa a challenge to dermatologists as well as gynecologists since many conditions are difficult to recognize and well established principles of skin disease treatment do not apply to the mucosa. This volume is exclusively devoted to the mucosal membrane and delivers a better understanding of this distinctive area. Subsequently to introductory chapters on the morphology and physiology of the mucosa, the topical treatment of impaired mucosal membranes is discussed. A third section covers the wide spectrum of consumer products applied on mucosal surfaces. Finally, the safety of products for mucosal membranes is reviewed. Providing an excellent summary and review of the latest findings and topical applications, this book will be of great value to physicians and clinicians in dermatology or gynecology, pharmacists, scientists, and toxicologists who are involved in the development of products for mucosal membranes.

**Textbook of Cosmetic Dermatology** Robert Baran, Howard I. Maibach, 2024-10-31. New chapters have been added to this edition on skin bioengineering, skin imaging, sunscreens, gel nail polish, management of hair loss, cosmetics, and moisturizers in acne management, cryolipolysis, and radiofrequency for minimally invasive body contouring, amongst others, and chapters have been updated throughout to keep this at the forefront of work and practice. The Series in Cosmetic and Laser Therapy is published in association with the Journal of Cosmetic and Laser Therapy.
