Sensorimotor Impairment In The Elderly:

Sensorimotor Impairment in the Elderly George E. Stelmach, Volker Hömberg, 2012-12-06 Proceedings of the NATO Advanced Research Workshop Bad Windsheim Germany September 11 13 1992 **Changes in Sensory Motor Behavior in Aging** A.-M. Ferrandez, N. Teasdale, 1995-12-11 Recently studies on aging processes and age related changes in behavior have been expanding considerably probably due to the dramatic changes observed in the demographics This increase in the overall age and proportion of elderly people has heightened the severity of problems associated with the safety and well being of elderly persons in everyday life Many researchers working on motor control have thus focused more intensely on the effects of age on motor control This new avenue of research has led to programs for alleviating or delaying the specific sensory motor limitations encountered by the elderly e g falls in an attempt to make the elderly more autonomous The aggregation of studies from different perspectives is often fascinating especially when the same field can serve as a common ground between researchers Nearly all contributors to this book work on sensory motor aging they represent a large range of affiliations and backgrounds including psychology neurobiology cognitive sciences kinesiology neuropsychology neuropharmacology motor performance physical therapy exercise science and human development Addressing age related behavioral changes can also furnish some crucial reflections in the debate about motor coordination aging is the product of both maturational and environmental processes and studies on aging must determine how the intricate interrelationships between these processes evolve The study of aging makes it possible to determine how compensatory mechanisms operating on different subsystems and each aging at its own rate compensate for biological degenerations and changing external demands This volume will contribute to demonstrating that the study of the aging process raises important theoretical questions **The American Psychiatric Publishing Textbook of Geriatric Neuropsychiatry** C. Edward Coffey, Jeffrey L. Cummings, 2011 Rev ed of The American Psychiatric Press textbook of geriatric neuropsychiatry 2nd ed 2000 **Human Factors Interventions for the Health Care of Older Adults** Wendy A. Rogers, Arthur D. Fisk, 2001-08-01 Written by experts in the field this book explores the relevance and contributions of the field of human factors to health care It begins with overviews of the field of human factors and the primary research methodologies of that field and goes on to review the cognitive issues that must be considered in the context of the health care environment and the potential for exercises to improve such cognitive functions The remaining chapters cover a range of cutting edge topics including care giving telecommunication issues design of medical devices computer monitoring of patients automated communication systems computer interface issues in general and the use of the Web as a source for health information **Technology for Adaptive Aging** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Steering Committee for the Workshop on Technology for Adaptive Aging, 2004-04-25 Emerging and currently available technologies offer great promise for helping older adults even those without serious disabilities to live

healthy comfortable and productive lives What technologies offer the most potential benefit What challenges must be overcome what problems must be solved for this promise to be fulfilled How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful marketable products and services Technology for Adaptive Aging is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication education and learning employment health living environments and transportation for older adults It includes all of the workshop papers and the report of the committee that organized the workshop The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults

Locomotion and Posture in Older Adults Fabio Augusto Barbieri,Rodrigo Vitório,Paulo Cezar Rocha dos Santos,2025-02-19 This book sheds new light on the effects of aging and movement disorders on movement control during walking and postural tasks Understanding these dynamics is more important than ever as we face a future where the number of older adults is projected to double by 2050 The severity of this framework is exacerbated when aging is accompanied by movement disorders such as Parkinson s disease Chorea Multiple Sclerosis Dystonia and Huntington s disease The book explores how complex interactions between musculoskeletal and neural systems are required for efficient execution of daily activities like walking and maintaining posture The chapters in this comprehensive volume address the multifaceted challenges posed by aging and movement disorders in gait and postural control including innovative rehabilitation strategies and the role of artificial intelligence Expert contributors examine how environmental sensorial motor cognitive and individual factors influence locomotor and postural activities Readers will discover cutting edge research findings that address critical questions about planning performance and impairment in these essential functions This book is a must read for anyone seeking to understand and reduce the effects of aging and movement disorders on gait and posture This book is an invaluable resource for clinicians physical therapists occupational therapists psychologists biologists researchers health professionals as well as those involved in physical education and sports medicine It highlights the mechanisms involved in controlling and planning postural and gait tasks in both neurologically healthy older individuals and those who suffer from movement disorders offering new perspectives on interventions and technologies designed to improve understanding or delay impairments due to aging or movement disorders on gait and posture Whether you re a practitioner or researcher in related fields this book equips you with the essential knowledge to enhance the quality of life for older adults facing these challenges

Chodzko-Zajko,2006 Based on the 10th Measurement and Evaluation Symposium Measurement Issues and Challenges in Aging Research Measurement Issues in Aging and Physical Activity considers research from experts around the world relating to the latest questions challenges and techniques in aging and measurement The reference addresses a range of topics in aging research including issues from the fields of kinesiology biology physiology technology urban planning measurement and statistics Measurement Issues in Aging and Physical Activity breaks new ground with a discussion of multicultural factors related to physical activity promotion and intervention Ideas include using culture as a catalyst for active living and using culture based physical activity as an alternative approach to promotion of active living The reference further examines multicultural issues with a look at alternative medicine including an account of a demonstration of qi gong a traditional Chinese exercise from the symposium In addition a new term kinesmetrics is introduced for the field of measurement and evaluation Kinesmetrics is defined as a discipline for developing and applying measurement theory statistics and mathematical analysis to the field of kinesiology The groundbreaking Measurement Issues in Aging and Physical Activity explores subjects in a range of research topics For both veterans and newcomers to the field this reference will be a comprehensive guide to the latest research on aging in measurement and physical activity Publisher description

Pelvic Floor Dysfunction and Pelvic Surgery in the Elderly David A. Gordon,Mark R. Katlic,2017-05-27 This text provides a comprehensive state of the art review of this field and will serve as a resource for urologists colorectal surgeons geriatricians and gynecologists as well as researchers interested in neuromuscular phenomena in the pelvis The book also reviews new data regarding risk factors for pelvic floor muscle dysfunction and profiles new minimally invasive surgical strategies for well known pelvic disease processes Each chapter is chock full of data from landmark trials which have been published over the past few years and placed in context with respect to current management techniques for pelvic floor disorders Written by experts in their field Pelvic Floor Dysfunction and Pelvic Surgery in the Elderly An Integrated Approach provides a concise yet comprehensive summary to help guide patient management

Cognitive Impairment and Physical Function in Older Adults José Daniel Jiménez García,Daniel Velázquez Díaz,Diego A. Bonilla,Antonio Martinez-Amat,Richard Kreider,Francisco Álvarez Salvago,2025-08-20 The rapid growth of the aging population is related with prevalent age related cognitive impairments usually associated with problems in quality of life and increased cost of healthcare Older adults with neurocognitive disorders have been identified as having a high risk of falling Nonetheless the relationship of neurocognitive disorders with physical function has been poorly studied Currently there are numerous studies that have analyzed the association between the cognitive status in with physical function in older people In addition relationship said cognitive status with serious problems such as sarcopenia and the risk of falls In this line there are RCTs that are being offered that have demonstrated efficacy on physical and cognitive improvement in older people such as multicomponent exercise programs qigong training and resistance exercise programs

Advanced Technologies for the

Rehabilitation of Gait and Balance Disorders Giorgio Sandrini,Volker Homberg,Leopold Saltuari,Nicola Smania,Alessandra Pedrocchi,2018-01-30 The book provides readers with a comprehensive overview of the state of the art in the field of gait and balance rehabilitation It describes technologies and devices together with the requirements and factors to be considered during their application in clinical settings The book covers physiological and pathophysiological basis of locomotion and posture control describes integrated approaches for the treatment of neurological diseases and spinal cord injury as well as important principles for designing appropriate clinical studies It presents computer and robotic technologies currently used in rehabilitation such as exoskeleton devices functional electrical stimulation virtual reality and many more highlighting the main advantages and challenges both from the clinical and engineering perspective Written in an easy to understand style the book is intended for people with different background and expertise including medical and engineering students clinicians and physiotherapists as well as technical developers of rehabilitation systems and their corresponding human compute interfaces It aims at fostering an increased awareness of available technologies for balance and gait rehabilitation as well as a better communication and collaboration between their users and developers

Brain Networks for Studying Healthy and Pathological Aging Mechanisms and Intervention Efficacy Christos Frantzidis,Ana B. Vivas,Panagiotis D. Bamidis,2020-11-18 Previous studies showed that both healthy and pathological aging are associated with changes in brain structure and function of the mature human brain The most prominent anatomical alteration are changes in prefrontal cortex morphology volume loss and reduced white matter integrity and hippocampal atrophy Cognitive decline affects mainly the performance of episodic memory speed of sensory information processing working memory inhibitory function and long term memory It has been also proposed that due to the aforementioned changes the aging brain engages in compensatory brain mechanism such as a broader activation of cortical regions mainly frontal rather than specialized activation Evidence suggests that similar changes occur with pathological aging but to a greater extent In this case information flow is disrupted due to neurodegeneration functional activation of posterior occipito temporal regions is decreased and as a consequence the brain fails to process sensorial input in the ventral pathway and cognitive deficits appear In the last years functional alterations associated with aging have been studied using the mathematical notion of graph theory that offers an integrative approach since it examines different properties of the brain network 1 Organization level 2 amount of local information processing 3 information flow 4 cortical community structure and 5 identification of functional anatomical hubs So graph theory offers an attractive way to model brain networks organization and to quantify their pathological deviations Previous studies have already employed this mathematical notion and demonstrated that age related neurodegeneration is often accompanied by loss of optimal network organization either due to diminished local information processing or due to progressive isolation of distant brain regions They have also found that changes in network properties may be present even in the preclinical phase which could be taken as a biological marker of disease Gait,

Balance, and Mobility Analysis Samuel Stuart, Rosie Morris, 2024-11-26 *Gait Balance and Mobility Analysis Theoretical Technical and Clinical Applications* provides a comprehensive overview of gait and movement analysis techniques from traditional motion capture to modern wearable technologies The book contains both a technical element that focuses on biomechanics and engineering concepts for gait analysis and the application of gait analysis with clinical populations Beginning with a comprehensive background on the underlying neural control of gait and mobility in humans and physiological control of balance the book then covers analysis methods and techniques for laboratory clinic or remote patient assessment It then examines how gait mobility and balance are impacted by musculoskeletal neurological and cardio respiratory conditions Lastly it discusses future directions and provides recommendations for future studies Combining the expertise of engineers and clinicians this book takes a multidisciplinary approach to show how and why gait balance and mobility can be used to tackle important clinical questions for various conditions Presents the theory methodologies technical aspects and applications of gait balance and mobility assessment for laboratory clinical and remote patient assessment Assists engineers and clinicians to design and adopt real world solutions for gait balance and mobility assessment with a better understanding of the theory to drive novel and robust clinical solutions Includes pseudocode and workflow diagrams to help convey the journey of engineering theory to real world application *Neural responses for rehabilitation of the elderly: Evidence from the micro, meso to macro scale* Le Li, Chuhuai Wang, Howe Liu, Sheng Li, Wenxin Niu, 2023-06-07

Gravitational Physiology, Aging and Medicine Nandu Goswami, Olivier White, Jack J. W. A. van Loon, Andreas Roessler, Andrew Blaber, 2020-01-27 *Psychology of Aging* Aimee Spector, 2017-03-02 The psychology of aging is an exciting and rapidly developing field This volume provides a collection of classic original and often widely cited papers including some older papers which may be hard to find through conventional searches Taken together they help to address some key questions what are the cognitive changes related to aging Is mental exercise useful To what extent might intelligence education or stimulating mental activities delay or even reduce cognitive symptoms of dementia However the book goes well beyond cognition and addresses social and emotional changes in aging as well as looking at how lifestyle factors may be influential in psychological functioning The section on the psychology of dementia covers the evolving psychological models plus innovative types of psychological interventions As more people live to an age where they are dependent on others the book also considers the stresses on carers and how carers can be supported Lastly other aspects of mental health problems in old age are addressed including depression PTSD and personality disorder This collection of intriguing and inspiring papers will liven up the shelves of students researchers and academics in the field as well as being a very useful resource for research teaching and study *Movement Biomechanics and Motor Control* Carlo Albino Frigo, 2020-12-10 This collection of original papers provides an overview of the state of the art of research in the area of human motor control with an approach that has movement biomechanics as a common base The reader can find interesting

information in this book and a stimulus for new studies and investigations *Diagnosis and Treatment of Senile Dementia* Manfred Bergener, Barry Reisberg, 2012-12-06 Senile dementia is one of the major health problems confronting mankind in this century To some extent the problem has of course always existed The condition was sufficiently troubling to classical philosophers and jurists to have apparently provoked comments by Solon in approximately 500 B C and Plato in the fourth century B C Plutarch 1967 translation Plato 1921 translation Medical recognition can be traced at least as far back as the second century A D Adams 1861 However several factors have converged in this century to extend the absolute dimensions of the problem of senile dementia and to increase societal medical and scientific recognition of the magnitude of the condition Perhaps the most important factor relating to the present importance of senile dementia is demographic Although the human population has been increasing since the mid eighteenth century it has only been since the advent of the twentieth century that a decrease in mortality has been noted for those over the age of 45 McKeown 1976 Consequently the absolute number of aged persons and the proportion of increasingly aged persons in the populations of the world's industrial nations have been steadily increasing For example in the United States 4% of the population was over the age of 65 in 1900 In the 1970 census this proportion had grown to 10% **Clinical Disorders of Balance, Posture and Gait, 2Ed** Adolfo Bronstein, T. Brandt, 2004-03-29 The diagnosis and treatment of the patient with critically impaired walking abilities present the busy physician with a formidable challenge This book provides a comprehensive account of the various balance posture and gait disorders and of the methods for their effective management The text is divided into five sections dealing with **Advances in The Ergonomics in Manufacturing: Managing the Enterprise of the Future** Stefan Trzcielinski, Waldemar Karwowski, 2020-07-19 Contemporary manufacturing enterprises aim to deliver a great number of consumer products and systems through friendly and satisfying working environments for people who are involved in manufacturing services Meeting the needs of the manufacturing and service sectors of contemporary industry this volume is concerned with the human factors ergonomics and safety issues related to the design of products processes and systems as well as the operation and management of business enterprises This book will be of special value to researchers and practitioners involved in the design of products processes systems and services which are marketed and utilized by a variety of organizations around the world
