as practical guidance for advanced study in the area The Grammar of French Quantification Lena Baunaz, 2011-03-02

This book is the first extensive study on French Quantification in the field of Syntax. It provides a typology of four main quantified noun phrases in French: existential, universal, negative and wh, detailing their syntactic, semantic and prosodic behaviors and showing that they can be reduced to two classes: Split DP structures or Floating quantification. Relying on syntax and semantics, the book establishes a three-way structural typology of wh in situ phrases and extends it to existentials. It pays special attention to the prosodic properties associated with their different readings and proposes an analysis of the distribution of subextraction and pied piping. Similarly, based on semantic and syntactic tests, the book reveals N negative words to be universal Quantifiers. It proposes a new structure of N words in terms of constituent negation and includes a detailed analysis of the difference between not an N and not all the N in French. **Studies on Negation** Silvio

Cruschina, Katharina Hartmann, Eva-Maria Remberger, 2016-12-05. Negation ist eine universelle Eigenschaft der menschlichen Sprache. Als primäre Disziplin der Logik tritt Negation in typologisch unterschiedlichsten Erscheinungsformen auf und spielt eine große Rolle für die Syntax-Semantik-Schnittstelle. Mit diesem Band soll die umfassende Forschungsliteratur zur Negation durch eine Reihe von aktuellen Studien ergänzt werden. Alle Beiträge beziehen sich auf Fragen oder Kontroversen, die sich mit der Syntax-Semantik und Variation negativer Elemente befassen und gehen von der Annahme aus, dass ein grundlegendes Verständnis der verschiedenen Realisierungen der Negation zentral für unser Grammatikverständnis ist. Die hier veröffentlichten Beiträge berücksichtigen verschiedene Herangehensweisen und eine Vielfalt empirischer und analytischer Details. Negation is a universal feature of human language that is inherently logical in nature, presents typologically diverse manifestations and plays a fundamental role in the mapping between syntactic structure and semantic interpretation. The aim of this volume is to complement the vast body of research literature by offering a set of cutting-edge studies on negation. All the contributions are related to recent questions bearing on the syntax and semantics of negative elements and the variation in their form and follow the central assumption that a proper understanding of the multifaceted expression of negation is central to our understanding of the grammar as a whole. With this in mind, different approaches and a variety of empirical and analytic details have been included in this volume. *Romance Languages and Linguistic Theory*

2017 Alexandru Nicolae, Adina Dragomirescu, 2021-12-15. This volume contains a selection of 18 peer-reviewed papers presented at the 31st edition of Going Romance. Phenomena found in Romance languages: European Portuguese, French, Italian, Spanish, Romanian, in Romance dialects: Cosentino, Salentino, southern Calabrese, Neapolitan and Trevigiano, and even in creoles with a Romance lexifier: Makista and Kristang, either benefit from in-depth analyses confined to one single variety or are subjected to comparative analysis: dialect vs. standard language, dialect vs. different major languages, cross-dialectal comparison, cross-Romance comparison, and even comparison of language families. Theoretical and experimental approaches complement one another, as do diachrony and synchrony. Individually and as a whole, these contributions show how the

Romance languages contribute to a better understanding of issues which are relevant in the current linguistic landscape acquisition n words ellipsis phenomena focus and polarity ditransitive constructions grammaticalization theory differential object marking language ecology event structure cyclicity passives and many more *Negation and Negative Concord* Viviane Déprez, Fabiola Henri, 2018-12-15 While universally present in languages negation is well known to manifest a surprising cross linguistic diversity of forms In creole languages however negation and negative dependencies have been regarded as largely uniform Creole languages as Bickerton claims in *Roots of Language* generally exhibit negative concord a construction popularly dubbed double negation where several expressions each negative on its own come together with a logic defying single negation interpretation While this construction problematic for compositionality if the meaning of sentences emerge from the meaning of their parts has fostered much research the fertile data terrain that creole languages offer for its understanding is rarely taken into account Aiming at bridging this gap this book offers a wealth of theoretically informed empirical investigations of negative relations in a wide variety of creole languages Uncovering a far more complex negative landscape than previously assumed the book reveals the challenging richness that a thorough comparative study of creoles delivers **The Evolution of Negation** Pierre Larrivée, Richard Ingham, 2011-12-23 Why do grammars change The cycle of negation proposed by Jespersen is crucially linked to the status of items and phrases The definition of criteria establishing when a polarity item becomes a negative element and the identification of the role of phrases for the evolution of negation are the two objectives pursued by the contributions to this volume The contributions look at the emergence of negative items and their relation within a given sentence with particular reference to English and French The comparative perspective supports the documentation of the fine grained steps that shed light on the factors that i determine change and those that ii accompany actuation which are considered through a dialogue between functionalist and formalist approaches By looking at the place of negation in the architecture of the sentence they take up the debate as to the relevance of phrasal projections and consider the role of features Focusing on the make up of individual items makes it possible to re conceptualise the Jespersen cycle as the apparent result of the documented evolution patterns of individual series of items This novel perspective is solidly grounded on an extensive use of the complete up to date bibliography and will contribute to shape future research [The Routledge Handbook of Second Language Acquisition and Pedagogy of Persian](#) Pounesh Shabani-Jadidi, 2020-07-16 The Routledge Handbook of Second Language Acquisition and Pedagogy of Persian offers a detailed overview of the field of Persian second language acquisition and pedagogy The Handbook discusses its development and captures critical accounts of cutting edge research within the major subfields of Persian second language acquisition and pedagogy as well as current debates and problems and goes on to suggest productive lines of future research The book is divided into the following four parts I Theory driven research on second language acquisition of Persian II Language skills in second language acquisition of Persian III Classroom research in second language acquisition and pedagogy of Persian and

IV Social aspects of second language acquisition and pedagogy of Persian The Routledge Handbook of Second Language Acquisition and Pedagogy of Persian is an essential reference for scholars and students of Persian SLA and pedagogy as well as those researching in related areas *The French Language Today* Adrian Battye, Marie-Anne Hintze, Paul Rowlett, 2003-09-01 This book provides a comprehensive introduction to the French language from the perspective of modern linguistics Placing French within its social and historical context the authors highlight the complex diverse aspects of the language in a lively and accessible way A variety of topics is covered including the distribution of French in the world the historical development of standard French the sound system of French its sentence patterns and its stylistic and geographical variations Fully updated and revised this new edition places a greater emphasis on sociolinguistics To make the book more user friendly the following new features have been added a further reading guide at the end of each chapter a glossary of linguistic terms an expanded bibliography and index Expression and Interpretation of Negation Henriëtte de Swart, 2010-05-03 This study in cross linguistic semantics deploys the framework of bi directional Optimality Theory to develop a typology of the relationship between syntax and semantics in negation markers and negation indefinites Negation and Polarity Laurence R. Horn, Yasuhiko Katō, 2000 Negation is a central feature of language and cognition interacting with all areas of grammar as well as with the philosophy of language Whereas there is a cross linguistic uniformity in logical and semantic aspects of negation there is a diversity of syntactic and morphological forms and rules This asymmetry in function and form poses problems for syntactic and universal grammar theory and for the study of the interface between syntax and discourse It is particularly evident in negative polarity words and phrases which can appear only in negative sentences The exploration of negation and negative polarity phenomena and their implications for linguistic theory are the main themes of this book
