Serial Targets:

Photoelectric Detection on Derived Attributes of Targets Xing Yang,Yihua Hu,2023-08-22 This book highlights the novel photoelectric detection technique on derived attributes of targets Photoelectric detection on derived attributes of targets is a new target detection and monitoring method It is achieved by acquiring three types of attributes of the target including those that reflect the essential features of parts of the target those directly generated from the target and those synthesized by the target features The book introduces the classification of derived attributes of targets and describes typical detection methods Emphases are put on laser detection of aerial moving targets using derived attributes such as the disturbance of atmospheric wind fields trailing vortexes and the disturbance of atmospheric components The authors also elaborate on visible light imaging detection using derived attributes such as retroreflection and the identification of target carriers Besides the synthetic attributes processing of integrated aerospace images is introduced for the detection of targets on the ground and sea surfaces This book can be used as a good reference for researchers engaged in the fields of photoelectric detection target detection and image processing and as a reference book for senior undergraduates and postgraduates in relevant majors

Elements of Human Performance Andries Frans Sanders,1998 The book focuses on 2 aspects of human performance theory reaction processes and attention These aspects are often ignored by treatments of cognitive psychology but are central to understanding an individual's performance

Stochastic Modeling of Elementary Psychological Processes James T. Townsend,F. Gregory Ashby,1983

Elements of Human Performance Andries F. Sanders,Andries Sanders,2013-02-01 This book presents a review of research on reaction processes and attention as it has evolved over the last 40 years in the context of the information processing tradition in cognitive psychology It is argued and demonstrated that issues of reaction processes and attention are closely interconnected Their common conceptualization can be seen in terms of limited processing capacity on the one hand and stage analysis on the other This volume concludes that at present a stage analysis metaphor offers better prospects as a conceptual starting point the limited capacity metaphor was strongly tied to the digital computers of the 60s The emphasis of the book is on behavioral research but summaries of related findings on evoked potentials and other psychophysiological variables are included as well From this perspective it may be of interest to neuropsychologists who want to learn about the present state of cognitive experimental paradigms Elements of Human Performance also addresses the question of the relationship between basic research and applications in the said areas This is particularly urgent in view of the now common notion that the results of many simplified laboratory tasks may be artifactual and of little applied value A back to back research strategy is outlined to assess the validity of basic research results for real life tasks

Free Us from Bullying Paul T. Coughlin,2018-08-14 Much of what we believe about bullying isn't true An estimated twenty million oppressed children need our help today A critical mission field awaiting Christians is to combat bullying and proclaim liberty to wounded children To counter bullying we must first understand some common

misconceptions It is not necessarily true that bullies have low self esteem and come from abusive homes It is not true that kids who aren t bullied are indifferent to those who are Bullying is not a school problem and teachers are not the frontline defense Children who are bullied do not become stronger adults Bullies cannot be stopped merely with more compassion and understanding In fact bullying stems from the same roots as racism sexual harassment and even genocide and it requires people to combat it in similar ways that they combat other forms of oppression and injustice We often think of combating injustice overseas but we can combat a very real and dangerous injustice in our own neighborhoods After more than a decade of working with tens of thousands of students teachers parents and pastors Coughlin knows that bullying represents the worst in human nature but combating it promotes the best Kindness and awareness two buzzwords in today s anti bullying movement will not end bullying on their own They must be activated by courage transforming bystanders into righteous loving protectors of targets When we join this mission of love and justice we will become peacemakers who are blessed and called children of God Matt 5 9

Technical Services Cost Studies in ARL Libraries ,1986 Engineering Psychology and Human Performance Christopher D. Wickens,William S. Helton,Justin G. Domestic Abuse with Police Data Matthew P. Bland, Barak Ariel, 2020-09-29 This book explores the potential of domestic abuse data to assess the level of harm caused to victims and the amount of resources required to respond to it Policing domestic abuse has become a major activity for the police service in England and Wales Part of the police strategy is to gather hundreds of thousands of detailed records about victims and suspects the single largest set of domestic abuse records available but one that to date has largely unexplored by researchers In this volume Matthew Bland and Barak Ariel analyse three substantial datasets taken from police forces across the country and ask Can police data be used to derive meaningful insight How should we use these data to measure harm Just how much domestic abuse involves a repeat victim Does abuse get more serious over time Can serious domestic abuse be predicted before it occurs This volume illustrates the scale of the challenge the police and other agencies face with reducing domestic abuse A small proportion of individuals generate a majority of harm this book argues that police records offer opportunities to identify these individuals before the harm occurs Demonstrating that statistical techniques can be used to profile domestic abuse to target harm reduction strategies more precisely and even identify a sizable proportion of serious cases before they occur this volume will be of interest to law enforcement officials policing researchers and policy makers interested in reducing the phenomenon of domestic abuse A Reader in Visual Agnosia Glyn Humphreys, Jane Riddoch, 2016-01-13 The case study of John has provided a unique insight into the nature of visual agnosia and more broadly into the underlying processes which support human vision After suffering a stroke John had problems in recognizing common objects faces seeing colours reading and finding his way around his environment A Reader in Visual Agnosia brings together the primary scientific papers describing the detailed investigations for each visual problem which the authors carried out with John known as patient HJA This work was summarised initially in To See But Not To See 1987 and 26 years later in A Case Study in Visual Agnosia Revisited 2013 The chapters are divided into 6 parts corresponding to the key areas of investigation Integrative visual agnosia Perception of global form Face perception Colour perception Word recognition Changes over time Each part contains a short introduction written by the two leading researchers who worked with John which highlights the relations between the papers and demonstrates the pathway of the case analysis The book will be invaluable to students and researchers in visual cognition cognitive neuropsychology and vision neuroscience Embedded System Design on a Shoestring Lewin Edwards, 2003-06-02 In this practical guide experienced embedded engineer Lewin Edwards demonstrates faster lower cost methods for developing high end embedded systems With today's tight schedules and lower budgets embedded designers are under greater pressure to deliver prototypes and system designs faster and cheaper Edwards demonstrates how the use of the right tools and operating systems can make seemingly impossible deadlines possible Designer's Guide to Embedded Systems Development shares many advanced in the trenches design secrets to help engineers achieve better performance on the job In particular it covers many of the newer design tools supported by the GPL GNU Public License system Code examples are given to provide

concrete illustrations of tasks described in the text The general procedures are applicable to many possible projects based on any 16 32 bit microcontroller The book covers choosing the right architecture and development hardware to fit the project choosing an operating system and developing a toolchain evaluating software licenses and how they affect a project step by step building instructions for gcc binutils gdb and newlib for the ARM7 core used in the case study project prototyping techniques using a custom printed circuit board debugging tips and portability considerations A wealth of practical tips tricks and techniques Design better faster and more cost effectively *Encyclopedia of Perception* E. Bruce Goldstein,2010

Because of the ease with which we perceive many people see perception as something that just happens However even seemingly simple perceptual experiences involve complex underlying mechanisms which are often hidden from our conscious experience These mechanisms are being investigated by researchers and theorists in fields such as psychology cognitive science neuroscience computer science and philosophy A few examples of the questions posed by these investigations are What do infants perceive How does perception develop What do perceptual disorders reveal about normal functioning How can information from one sense such as hearing be affected by information from another sense such as vision How is the information from all of our senses combined to result in our perception of a coherent environment What are some practical outcomes of basic research in perception These are just a few of the questions this encyclopedia will consider as it presents a comprehensive overview of the field of perception for students researchers and professionals in psychology the cognitive sciences neuroscience and related medical disciplines such as neurology and ophthalmology *Psychology of Learning and Motivation* ,1992-11-26 The objective of the series has always been to provide a forum in which leading contributors to an area can write about significant bodies of research in which they are involved The operating procedure has been to invite contributions from interesting active investigators and then allow them essentially free rein to present their perspectives on important research problems The result of such invitations over the past two decades has been collections of papers which consist of thoughtful integrations providing an overview of a particular scientific problem The series has an excellent tradition of high quality papers and is widely read by researchers in cognitive and experimental psychology The volume presents research ranging from classical and instrumental conditioning to complex learning and problem solving Topics covered fall within a wide range of disciplines from neuroscience to artificial intelligence **Department of the Army Appropriations for 1954** United States.
