whose limits are expressed to a specific degree of probability Important unresolved issues include a precise adjustment for dietary effects on radiocarbon dates from human skeletal material Nonetheless the results of this project suggest the cessation of regular burial with grave goods in Anglo Saxon England two decades or even more before the end of the seventh century That creates a limited but important discrepancy with the current numismatic chronology of early English sceattas The wider implications of the results for key topics in Anglo Saxon archaeology and social economic and religious history are discussed to conclude the report
