Iconophilia Francesca Dell'Acqua, 2020-05-07 Between the late seventh and the mid ninth centuries a debate about sacred images conventionally addressed as Byzantine iconoclasm engaged monks emperors and popes in the Mediterranean area and on the European continent The importance of this debate cannot be overstated it challenged the relation between image text and belief A series of popes staunchly in favour of sacred images acted consistently during this period in displaying a remarkable iconophilia or love for images Their multifaceted reaction involved not only council resolutions and diplomatic exchanges but also public religious festivals liturgy preaching and visual arts the mass media of the time Embracing these tools the popes especially promoted themes related to the Incarnation of God which justified the production and veneration of sacred images and extolled the role and the figure of the Virgin Mary Despite their profound influence over Byzantine and western cultures of later centuries the political theological and artistic interactions between the East and the West during this period have not yet been investigated in studies combining textual and material evidence By drawing evidence from texts and material culture some of which have yet to be discussed against the background of the iconoclastic controversy and by considering the role of oral exchange Iconophilia assesses the impact of the debate on sacred images and of coeval theological controversies in Rome and central Italy By looking at intersecting textual liturgical and pictorial images which had at their core the Incarnate God and his human mother Mary the book demonstrates that between c 680 880 by unremittingly maintaining the importance of the visual for nurturing beliefs and mediating personal and communal salvation the popes ensured that the status of sacred images would remain unchallenged at least until the Protestant Reformation in the sixteenth century **Critical Terms for Art History, Second Edition** Robert S. Nelson, Richard Shiff, 2010-03-15 Art has always been contested terrain whether the object in question is a medieval tapestry or Duchamp's Fountain But questions about the categories of art and art history acquired increased urgency during the 1970s when new developments in critical theory and other intellectual projects dramatically transformed the discipline The first edition of Critical Terms for Art History both mapped and contributed to those transformations offering a spirited reassessment of the field's methods and terminology Art history as a field has kept pace with debates over globalization and other social and political issues in recent years making a second edition of this book not just timely but crucial Like its predecessor this new edition consists of essays that cover a wide variety of loaded terms in the history of art from sign to meaning ritual to commodity Each essay explains and comments on a single term discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art For example Richard Shiff discusses Originality in Vija Celmins's To Fix the Image in Memory a work made of eleven pairs of stones each consisting of one original stone and one painted bronze replica In addition to the twenty two original essays this edition includes nine new ones performance style memory monument body beauty ugliness identity visual culture visual studies and social history of art as well as new introductory material All help

The Moment of Self-Portraiture in German Renaissance Art Joseph Leo Koerner, 1993 So foundational is this invention to modern aesthetics Koerner argues that interpreting it takes us to the limits of traditional art historical method Self portraiture becomes legible less through a history leading up to it or through a sum of contexts that occasion it than through its historical sight line to the present After a thorough examination of Dürer's startlingly new self portraits the author turns to the work of Baldung Dürer's most gifted pupil and demonstrates how the apprentice willfully disfigured Dürer's vision Baldung replaced the master's self portraits with some of the most obscene and bizarre pictures in the history of art In images of nude witches animated cadavers and copulating horses Baldung portrays the debased self of the viewer as the true subject of art The Moment of Self Portraiture thus unfolds as passages from teacher to student artist to viewer reception all within a culture that at once deified and abhorred originality

Thinking with Diagrams Sybille Krämer, Christina Ljungberg, 2016-07-11 Diagrammatic reasoning is crucial for human cognition It is hard to think of any forms of science or knowledge without the intermediary world of diagrams and diagrammatic representation in thought experiments and or processes manifested in forms as diverse as notes tables schemata graphs drawings and maps Despite their phenomenological and structural functional differences these forms of representation share a number of important attributes and epistemic functions Combining aspects of linguistic and pictorial symbolism diagrams go beyond the traditional distinction between language and image They do not only represent yet intervene in what is represented Their spatiality materiality and operativity establish a dynamic tool to exteriorize thinking thus contributing to the idea of the extended mind They foster imagination and problem solving facilitate orientation in knowledge spaces and the discovery of unsuspected relationships How can the diagrammatic nature of cognitive and knowledge practices be theorized historically as well as systematically This is what this volume explores by investigating the semiotic dimension of diagrams as to knowledge information and reasoning e g the thingness of diagrams in the history of art the range of diagrammatic reasoning in logic mathematics philosophy and the sciences in general including the knowledge function of maps
