Scott, Edward W. Soja, 1996 Los Angeles has grown from a scattered collection of towns and villages to one of the largest megacities in the world The editors of THE CITY have assembled a variety of essays examining the built environment and human dynamics of this extraordinary modern city emphasizing the dramatic changes that have occurred since 1960 58 illustrations *The Making of Urban America* Raymond A. Kessler,2013-05-06 In the quarter century from San Francisco s devastating fire of 1906 to the beginning of the Great Depression as automobiles exploded in popularity new buildings had to be conceived and constructed to provide parking space and repair facilities This book studies a number of the resulting public garages that featured facade designs based on historical architectural styles Considering the garages function the facades exhibit a surprising grace and nobility Through an analysis complemented by photographs including sixty by noted architectural photographer Sharon Risedorph and drawings the author dissects the architectural and cultural factors that lie at the heart of this unexpected merit Addressing the discrepancy between the buildings beauty and the assumption that old garages are unsightly and disposable the book examines them as cultural artifacts of the dawn of the Motor Age The garage is presented as a new form of transportation depot employing architectural symbolism to celebrate the ascendancy of the automobile over the train Today the surviving buildings are vulnerable to real estate development in part because their quality is misunderstood The book a fresh perspective on the value of older utilitarian buildings concludes with a call to preserve these structures and adapt them to compatible new uses Pathways through Crisis Carl A. Maida,2008-12-16 When densely populated urban areas face severe crises natural disasters epidemics sudden unemployment massive immigration they often find that established mechanisms cannot respond adequately to the problems Carl Maida argues that solutions to these problems tend to be developed within the affected communities themselves In Pathways through Crisis he draws on his two decades of work in ethnography and with crisis centers in the Los Angeles area to study the kinds of informal organizations that arise at the grass roots level in order to deal with severe crises This ground breaking examination of responses to urban disaster suggests how both informal and formal organizations can be developed to serve people under extreme duress
