The book's wide ranging case studies move from colonial captivity narratives to modern film from the camp fire to the sports arena from legal and scholarly texts to tribally controlled museums and cultural centres. The author's ethnographic approach to what she calls representational practices focus on the emergence, use and transformation of representations in the course of social life. Central themes include identity and otherness, indigenous cultural politics and cultural memory, property, performance, citizenship and transformation. *American Indians and the American Imaginary* will interest general readers as well as scholars and students in anthropology, history, literature, education, cultural studies, gender studies, American Studies and Native American and Indigenous Studies. It is essential reading for those interested in the processes through which national, tribal and indigenous identities have been imagined, contested and refigured.      Wild New World Dan Flores, 2022-10-25 Winner of the 2023 Rachel Carson Environment Book Award Winner of the 2023 National Outdoor Book Award for Natural History Literature Shortlisted for the 2023 Phi Beta Kappa Society Ralph Waldo Emerson Award A Kirkus Reviews Best Nonfiction Book of 2022 A deep time history of animals and humans in North America by the best selling and award winning author of *Coyote America*. In 1908 near Folsom, New Mexico, a cowboy discovered the remains of a herd of extinct giant bison. By examining flint points embedded in the bones, archaeologists later determined that a band of humans had killed and butchered the animals 12,450 years ago. This discovery vastly expanded America's known human history but also revealed the long standing danger *Homo sapiens* presented to the continent's evolutionary richness. Distinguished author Dan Flores's ambitious history chronicles the epoch in which humans and animals have coexisted in the wild new world of North America, a place shaped both by its own grand evolutionary forces and by momentous arrivals from Asia, Africa and Europe. With portraits of iconic creatures such as mammoths, horses, wolves and bison, Flores describes the evolution and historical ecology of North America like never before. The arrival of humans precipitated an extraordinary disruption of this teeming environment. Flores treats humans not as a species apart but as a new animal entering two continents that had never seen our likes before. He shows how our long past as carnivorous hunters helped us settle America, initially establishing a coast to coast culture that lasted longer than the present United States. But humanity's success had devastating consequences for other creatures. In telling this epic story, Flores traces the origins of today's Sixth Extinction to the spread of humans around the world, tracks the story of a hundred centuries of Native America, explains how Old World ideologies precipitated 400 years of market driven slaughter that devastated so many ancient American species, and explores the decline and miraculous recovery of species in recent decades. In thrilling narrative style informed by genomic science, evolutionary biology and environmental history, Flores celebrates the astonishing bestiary that arose on our continent and introduces the complex human cultures and individuals who hastened its eradication. *Studied America's animals and moved heaven and earth to*
