Our Way Robert Kastenbaum, 2004-05-20 How do our ideas about dying influence the way we live Life has often been envisioned as a journey the river of time carrying us inexorably toward the unknown country and in our day we increasingly turn to myth and magic ritual and virtual reality cloning and cryostasis in the hope of eluding the reality of the inevitable end In this book a preeminent and eminently wise writer on death and dying proposes a new way of understanding our last transition A fresh exploration of the final passage through life and perhaps through death his work deftly interweaves historical and contemporary experiences and reflections to demonstrate that we are always on our way Drawing on a remarkable range of observations from psychology anthropology religion biology and personal experience Robert Kastenbaum re envisions life s forward looking progress from early childhood bedtime rituals to the many small rehearsals we stage for our final separation Along the way he illuminates such moments and ideas as becoming a corpses person going down to earth or up in flames respecting or abusing and eating the dead coping with too many dead conceiving and achieving a good death undertaking the journey of the dead and learning to live through the scrimmage of daily life fully knowing that Eternity does not really come in a designer flask Profound insightful often moving this look at death as many cultures await it or approach it enriches our understanding of life as a never ending passage *Evolving Brains, Emerging Gods* E. Fuller Torrey, 2017-09-05 Religions and mythologies from around the world teach that God or gods created humans Atheist humanist and materialist critics meanwhile have attempted to turn theology on its head claiming that religion is a human invention In this book E Fuller Torrey draws on cutting edge neuroscience research to propose a startling answer to the ultimate question *Evolving Brains Emerging Gods* locates the origin of gods within the human brain arguing that religious belief is a by product of evolution Based on an idea originally proposed by Charles Darwin Torrey marshals evidence that the emergence of gods was an incidental consequence of several evolutionary factors Using data ranging from ancient skulls and artifacts to brain imaging primatology and child development studies this book traces how new cognitive abilities gave rise to new behaviors For instance autobiographical memory the ability to project ourselves backward and forward in time gave Homo sapiens a competitive advantage However it also led to comprehension of mortality spurring belief in an alternative to death Torrey details the neurobiological sequence that explains why the gods appeared when they did connecting archaeological findings including clothing art farming and urbanization to cognitive developments This book does not dismiss belief but rather presents religious belief as an inevitable outcome of brain evolution Providing clear and accessible explanations of evolutionary neuroscience *Evolving Brains Emerging Gods* will shed new light on the mechanics of our deepest mysteries [Speak For England](#) James Hawes, 2010-08-20 Brian Marley should be counting his winnings as victor of Britain s ultimate reality TV show Instead he s stranded on a jungle island after a helicopter crash wipes out the television crew His ill fated luck takes a turn when he falls from a precarious cliff and lands in a lost world Awakening in a village founded by survivors of a 1958 airplane crash Brian discovers an idyllic community modeled after pre Sixties England and overseen

by the stern but judicious Headmaster But when he uncovers the Headmaster's methods of survival the village's quaint idealism proves to be founded on something far more sinister With rescue imminent Brian finds himself at the center of a clash between English cultures separated by fifty years of history Satirical and insightful *Speak for England* explores the changing world by asking whether it ever really changes at all *The Readers' Advisory Guide to Nonfiction* Neal Wyatt, 2007-05-14 Navigating what at she calls the extravagantly rich world of nonfiction renowned readers advisor RA Wyatt builds readers advisory bridges from fiction to compelling and increasingly popular nonfiction to encompass the library's entire collection She focuses on eight popular categories history true crime true adventure science memoir food cooking travel and sports Within each she explains the scope popularity style major authors and works and the subject's position in readers advisory interviews Wyatt addresses who is reading nonfiction and why while providing RAs with the tools and language to incorporate nonfiction into discussions that point readers to what to read next In easy to follow steps Wyatt Explains the hows and whys of offering fiction and nonfiction suggestions together Illustrates ways to get up to speed fast in nonfiction Shows how to lead readers to a variety of books using her read around and reading map strategies Provides tools to build nonfiction subject guides for the collection This hands on guide includes nonfiction bibliography key authors benchmark books with annotations and core collections It is destined to become the nonfiction bible for readers advisory and collection development helping librarians library workers and patrons select great reading from the entire library collection
