Low and High Style in Italian Renaissance Art Patricia Emison, 2013-10-28 During the later 15th and in the 16th centuries pictures began to be made without action without place for heroism pictures more rueful than celebratory In part Renaissance art adjusted to the social and economic pressures with an art we may be hard pressed to recognize under that same rubric an art not so much of perfected nature as simply artless Granted the heroic and epic mode of the Renaissance was that practiced most self consciously and proudly Yet it is one of the accomplishments of Renaissance art that heroic and epic subjects and style occasionally made way for less affirmative subjects and compositional norms for improvisation away from the Vitruvian ideal The limits of idealizing art during the very period denominated as High Renaissance is a topic that involves us in the history of class prejudice of gender stereotypes of the conceptualization of the present of attitudes toward the ordinary and of scruples about the power of sight Exploring the low style leads us particularly to works of art intended for display in private settings as personally owned objects potentially as signs of quite personal emotions rather than as subscriptions to publicly vaunted ideologies Not all of them show shepherds or peasants none of them not even Giorgione's *La tempesta* is a classic pastoral idyll The *rosso stile* is to be understood as more comprehensive than that The issue is not only who is represented but whether the work can or cannot be fit into the mold of a basically affirmative art

Growing with the Grain Patricia A. Emison, 2005

The Oxford History of Western Art Martin Kemp, 2000

The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of

interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Art and Love in Renaissance Italy Metropolitan Museum of Art (New York, N.Y.), Kimbell Art Museum, 2008 Many famous artworks of the Italian Renaissance were made to celebrate love marriage and family They were the pinnacles of a tradition dating from early in the era of commemorating betrothals marriages and the birth of children by commissioning extraordinary objects maiolica glassware jewels textiles paintings that were often also exchanged as gifts This volume is the first comprehensive survey of artworks arising from Renaissance rituals of love and marriage and makes a major contribution to our understanding of Renaissance art in its broader cultural context The impressive range of works gathered in these pages extends from birth trays painted in the early fifteenth century to large canvases on mythological themes that Titian painted in the mid 1500s Each work of art would have been recognized by contemporary viewers for its prescribed function within the private domestic domain

The Culture of Cleanliness in Renaissance Italy Douglas Biow, 2018-07-05 Concerned about sanitation during a severe bout of plague in Milan Leonardo da Vinci designed an ideal clean city Leonardo

was far from alone among his contemporaries in thinking about personal and public hygiene as Douglas Biow shows in *The Culture of Cleanliness in Renaissance Italy*. A concern for cleanliness he argues was everywhere in the Renaissance. Anxieties about cleanliness were expressed in literature from humanist panegyrics to bawdy carnival songs as well as in the visual arts. Biow surveys them all to explain why the topic so permeated Renaissance culture. At one level cleanliness he documents was a matter of real concern in the Renaissance. At another he finds issues such as human dignity, self respect, self discipline, social distinction and originality were rethought as a matter of artistic concern. *The Culture of Cleanliness in Renaissance Italy* moves from the clean to the unclean, from the lofty to the base. Biow first examines the socially elevated who defined and distinguished themselves as clean, pure and polite. He then turns to soap, an increasingly common commodity in this period, and the figure of the washerwoman. Finally he focuses on latrines which were universally scorned yet functioned artistically as figures of baseness, creativity and fun in the works of Dante and Boccaccio. Paralleling this social stratification is a hierarchy of literary and visual artifacts from the discourse of high humanism to filthy curses and scatological songs. Deftly bringing together high and low as well as literary and visual cultures, this book provides a fresh perspective on the Italian Renaissance and its artistic legacy.

Music and Visual Culture in Renaissance Italy Chriscinda Henry, Tim Shephard, 2023-05-24. The chapters in this volume explore the relationship between music and art in Italy across the long sixteenth century, considering an era when music making was both a subject of Italian painting and a central metaphor in treatises on the arts. Beginning in the fifteenth century, transformations emerge in the depiction of music within visual arts: the conceptualization of music in ethics and poetics and in the practice of musical harmony. This book brings together contributors from across musicology and art history to consider the trajectories of these changes and the connections between them both in theory and in the practices of everyday life. In sixteen chapters, the contributors blend iconographic analysis with a wider range of approaches, investigate the discourse surrounding the arts and draw on both social art history and the material turn in Renaissance studies. They address not only paintings and sculpture but also a wide range of visual media and domestic objects, from instruments to tableware, to reveal a rich, varied and sometimes tumultuous exchange among musical and visual arts and ideas. Enriching our understanding of the subtle intersections between visual material and musical arts across the long Renaissance, this book offers new insights for scholars of music, art and cultural history.

second half of the sixteenth century The Routledge History of Poverty, c.1450–1800 David Hitchcock, Julia McClure, 2020-12-30 The Routledge History of Poverty c 1450 1800 is a pioneering exploration of both the lives of the very poorest during the early modern period and of the vast edifices of compassion and coercion erected around them by individuals institutions and states The essays chart critical new directions in poverty scholarship and connect poverty to the environment debt and downward social mobility material culture empires informal economies disability veterancy and more The volume contributes to the understanding of societal transformations across the early modern period and places poverty and the poor at the centre of these transformations It also argues for a wider definition of poverty in history which accounts for much more than economic and social circumstance and provides both analytically critical overviews and detailed case studies By exploring poverty and the poor across early modern Europe this study is essential reading for students and researchers of early modern society economic history state formation and empire cultural representation and mobility

The Pollaiuolo Brothers Alison Wright, Antonio Pollaiuolo, 2005-01-01 Painters draftsmen goldsmiths sculptors and designers the Pollaiuolo brothers of fifteenth century Florence produced some of the most beautiful works of the Italian Renaissance **Hidden Faces: Covered Portraits of the Renaissance** Alison Manges Nogueira, 2024-04-02 Many small Renaissance portraits were richly adorned with covers or backs bearing allegorical figures mythological scenes or emblems that celebrated the sitter and invited the viewer to decipher their meaning Hidden Faces includes seventy objects ranging in format from covered paintings to miniature boxes that illuminate the symbiotic relationship between the portrait and its pair Texts by thirteen distinguished scholars vividly illustrate that the other faces of these portraits represent some of the most innovative images of the Renaissance created by masters such as Hans Memling and Titian Uniting works that have in some cases been separated for centuries this fascinating volume shows how the multifaceted format unveiled the sitter's identity both by physically revealing the portrait and reading the significance behind its cover **Subject as Aporia in Early Modern Art** Alexander Nagel, 2017-07-05 The studies in this volume focus on works of art that generate bafflement and that make that difficulty of reading part of their rhetorical structure These are works whose subjects are not easily identifiable or can be readily associated with more than one subject at the same time works that take a subject into a new genre or format pagan into Christian for example or vice versa and thus destabilize the subject itself works that concentrate on the marginal rather than the central episode and works that introduce elements of the preparatory phase the indeterminacy that are native to the sketch or drawing for example into the realm of finished works Unable to settle on a single reading the effort of interpretation doubles back on its own procedures This aporia according to Aristotle serves as the initial impulse to philosophical inquiry Although the works studied here are in many ways exceptional the aporias they raise register larger structural problems belonging to the artistic culture as a whole Between 1400 and 1700 we see the emergence of new formats new genres new subjects and new techniques as well as new venues for the display of art It is an implicit thesis of

this book that the systemic shifts occurring in the early modern period made the emergence of aporetic works of art and of aporia as a problem for art a structural inevitability **Green Worlds of Renaissance Venice** Jodi Cranston, 2019-03-04 From celebrated gardens in private villas to the paintings and sculptures that adorned palace interiors Venetians in the sixteenth century conceived of their marine city as dotted with actual and imaginary green spaces This volume examines how and why this pastoral vision of Venice developed Drawing on a variety of primary sources ranging from visual art to literary texts performances and urban plans Jodi Cranston shows how Venetians lived the pastoral in urban Venice She describes how they created green spaces and enacted pastoral situations through poetic conversations and theatrical performances in lagoon gardens discusses the island utopias found invented and mapped in distant seas and explores the visual art that facilitated the experience of inhabiting verdant landscapes Though the greening of Venice was relatively short lived Cranston shows how the phenomenon had a lasting impact on how other cities including Paris and London developed their self images and how later writers and artists understood and adapted the pastoral mode Incorporating approaches from eco criticism and anthropology *Green Worlds of Renaissance Venice* greatly informs our understanding of the origins and development of the pastoral in art history and literature as well as the culture of sixteenth century Venice It will appeal to scholars and enthusiasts of sixteenth century history and culture the history of urban landscapes and Italian art **Sexuality and**
