Low-latency and Robust Peer-to-peer Video Streaming JeongHun Noh,2010 Peer to peer P2P systems have emerged as a promising and cost effective transport solution for streaming video to a group of users in the Internet In the P2P architecture users not only consume video but also forward it to other users Thus P2P systems scale better than client server systems as users bring resources to the system The challenge is to achieve low latency and robust video dissemination by overcoming a number of adversarial aspects and challenges peer dynamics heterogeneous uplink bandwidth of peers heterogeneous hardware and capabilities of peers and peer wise connection restrictions due to NATs firewalls This dissertation presents Stanford Peer to Peer Multicast SPPM a P2P video streaming system SPPM is designed to achieve low latency and robust streaming by constructing an overlay of multiple complementary trees and dynamically rearranging the position of peers by Active Overlay Management in a distributed fashion Next we extend SPPM for providing playback control to users by time shifted streaming To perform time shifted streaming peers store past portions of video and forward them to other users when requested thereby reducing server load To further alleviate server load we propose fast prefetching by which peers can disseminate content quickly Finally we present a way to accommodate mobile users Video transcoding is often required to adapt video for the mobile users We propose interleaved distributed transcoding IDT which allows a video stream to be transcoded at multiple peers that are more capable than mobile users IDT is shown not only to reduce computation required at a peer but also to achieve higher error resilience in case of peer failure or packet loss

Culture: Raise 'low', Rethink 'high.' A Representation of the Academic Potential of So-Called 'Low' Culture Emma Buchanan, 2020-11-15 Despite or more likely due to being the culture which most affects and interacts with the masses the broad and definition evading category of popular culture remains a second class citizen in academia relegated to a position of low below a culture deemed high and worthy of scholarly inquiry This eclectic collection of essays aims to convince that this inequality must be addressed by exploring a variety of supposedly low cultural types and texts through an academic lens proving that so called low culture can be a valuable contribution to academic research That said raising the low does not mean making it high turning it into an elite category to be accessed only by experts Rather the authors are unswerving in their approach that academic writing and fan writing are not mutually exclusive On the contrary it is their knowledge and passion as fans of their subject matter that has inspired their chapters all of which draw upon their considerable experience of engaging as fans in what they discuss All the chapters have been written by postgraduate students seeking to inspire a

new empiricism through which their interests might be fully pursued in their futures as scholars Emma Buchanan is a British postgraduate researcher and television fan who is currently writing up her PhD thesis on the topic of gender and change in AMC's *The Walking Dead* as understood from the point of view of Jungian depth psychology

Handbook of Robust Low-Rank and Sparse Matrix Decomposition Thierry Bouwmans, Necdet Serhat Aybat, El-hadi Zahzah, 2016-09-20

Handbook of Robust Low Rank and Sparse Matrix Decomposition Applications in Image and Video Processing shows you how robust subspace learning and tracking by decomposition into low rank and sparse matrices provide a suitable framework for computer vision applications Incorporating both existing and new ideas the book conveniently gives you one stop access to a number of different decompositions algorithms implementations and benchmarking techniques Divided into five parts the book begins with an overall introduction to robust principal component analysis PCA via decomposition into low rank and sparse matrices The second part addresses robust matrix factorization completion problems while the third part focuses on robust online subspace estimation learning and tracking Covering applications in image and video processing the fourth part discusses image analysis image denoising motion saliency detection video coding key frame extraction and hyperspectral video processing The final part presents resources and applications in background foreground separation for video surveillance With contributions from leading teams around the world this handbook provides a complete overview of the concepts theories algorithms and applications related to robust low rank and sparse matrix decompositions It is designed for researchers developers and graduate students in computer vision image and video processing real time architecture machine learning and data mining

Advances in Software Engineering

Changhoon Lee, 2009-11-02 As software engineering SE becomes specialized and fragmented it is easy to lose sight that many topics in SE have common threads and because of this advances in one sub discipline may transmit to another The presentation of results between different sub disciplines of SE encourages this interchange for the advancement of SE as a whole Of particular interest is the hybrid approach of combining ideas from one discipline with those of another to achieve a result that is more significant than the sum of the individual parts Through this hybrid philosophy a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline This volume comprises the selection of extended versions of papers that were presented in their shortened form at the 2008 International Conference on Advanced Software Engineering and Its Applications <http://www.sersc.org/ASEA2008> and 2009 Advanced Science and Technology <http://www.sersc.org/AST2009> We would like to acknowledge the great effort of all in the ASEA 2008 and AST 2009 International Advisory Board and members of the International Program Committee as well as all the organizations and individuals who supported the idea of publishing these advances in software engineering including SERSC <http://www.sersc.org> and Springer We would like to give special thanks to Rosslin John Robles Maricel O Balitanas Farkhod Alisherov Alisherovich Feruza Sattarova Yusfovna These graduate school students of Hannam University attended to the editing process of this volume with great passion
