Researching Customer Satisfaction & Loyalty Paul Szwarc, 2005 It examines how to research customer satisfaction from both a client and a supplier perspective and how to get the best results from that research **Relationship Marketing** Thorsten Hennig-Thurau, Ursula Hansen, 2013-06-29 The concept of marketing and managing relationships with customers and other interest groups is at the core of marketing today In the academic world the topic is covered in special issues

released by numerous journals e.g. Journal of the Academy of Marketing Science, Journal of Strategic Marketing, Psychology Marketing and conferences and conference sessions regularly discuss the advantages of the approach. But relationship marketing is not limited to theory. On the contrary, no service firm or business-to-business company can now do without some form of long-term orientation and all have implemented at least some elements of the relationship marketing concept. Even in the consumer goods sector, there are a growing number of cases where the traditional orientation towards brand equity is being complemented by a relational focus. As Berry has mentioned, relationship marketing is a new-old concept. Several important aspects of relationship marketing were already being discussed in the marketing literature. This applies both to central constructs such as customer satisfaction and to single elements such as the management of complaints and after-sales services. Although they do not involve explicit mention of the term relationship marketing, a long-term orientation can be found in the network approach of industrial marketing closely related to the work of the IMP Group in the work of Gronroos, Gummesson and their colleagues at the Nordic School of Services Marketing and last but not least in the concept of customer-focused marketing.

This book explores the marketing experiences in Romania over this period to provide insights for other developing nations such as Asia, Africa and South America. It provides a blend of marketing concepts and analytical tools as well as case studies. It explores such topics as artificial intelligence, neuromarketing, introduction to international marketing, relationship marketing, sports marketing, retail marketing, marketing in family businesses and tourism marketing, to name a few. This book is useful for researchers, scholars, academics, students and practitioners interested in international marketing and marketing strategy, particularly for developing nations.
