shows that the aspirations of individual Americans to be recognized as people worthy of others respect was a driving force in the global extension of United States influence shortly after the nation's founding. Nancy Shoemaker contends that what she calls extraterritorial Americans constituted the vanguard of a vast early US global expansion. Using as her site of historical investigation nineteenth century Fiji, the cannibal isles of American popular culture, she uncovers stories of Americans looking for opportunities to rise in social status and enhance their sense of self. Prior to British colonization in 1874, extraterritorial Americans had, she argues, as much impact on Fiji as did the British. While the American economy invested in the extraction of sandalwood and sea slugs as resources to sell in China, individuals who went to Fiji had more complicated personal objectives. Pursuing Respect in the Cannibal Isles considers these motivations through the lives of the three Americans who left the deepest imprint on Fiji: a runaway whaleman who settled in the islands, a sea captain's wife, and a merchant. Shoemaker's book shows how ordinary Americans living or working overseas found unusual venues where they could show themselves worthy of others' respect, others' approval, admiration, or deference.

Narrative of the U.S. Exploring Expedition. By ... Charles Wilkes United States. United States Exploring Expedition, 1838-42, Charles Wilkes, United States Navy Medical Newsletter, 1985. Kwajalein Atoll, the Marshall Islands and American Policy in the Pacific Ruth Douglas Currie, 2016-10-27. For centuries the Marshall Islands have been drawn into international politics primarily because of their central location in Oceania. After World War II they came into the American sphere as part of the Trust Territory of the Pacific Islands. At the outset of the Cold War the Marshalls were a site for nuclear tests and later for the U.S. Army's ballistic missile testing as part of President Reagan's Strategic Defense Initiative. This book focuses on the islanders' tenacious negotiations for independence and control of their land, accomplished as the Republic of the Marshall Islands in a Compact of Free Association with the U.S. The creation of American policy in the Pacific was a struggle between the U.S. departments of the Interior and State and the military's goals for strategic national defense, as illustrated by the case of the Army's base at Kwajalein Atoll.

150 Years of Service on the Seas: (1830-1946) Marc I. Pinsel, 1982. *The Poetics of the Antarctic* William E. Lenz, 2021-03-19. The thesis of this book is that the 19th century interest in the Antarctic functions for modern scholars as an important index to American self-discovery and self-definition from the 1830s onward. According to the author, American hopes for confirming identity came to be focused on an unlikely goal: the discovery of the illusive Antarctic continent. By examining in detail one literary product of the U.S. Exploring Expedition, 1838-1842 to Antarctica, James Croxall Palmer's epic poem *Thulia: A Tale of the Antarctic* (1843) and its revision *The Antarctic Mariner's Song* (1868) and by locating these works within their cultural context, Lenz reveals the significance and changing meaning of exploration to emerging American concepts of nationhood. The volume also considers the tradition of American sea fiction in the works of such writers as James Fenimore Cooper, Edgar Allan Poe, and Herman Melville, arguing

that for these writers the Antarctic was a locus of symbolic meaning while for Palmer it was a process of individual and collective perception The 1868 version of the Palmer poem is attached here as an appendix A useful bibliography follows that appendix **Antarctica** Edwin Swift Balch,1902 Inventory Series National Archives (U.S.),1970
