Creative Evolution Henri Bergson,2022-12-01 First published in French in 1907 Henri Bergson s L volution cr atrice is a scintillating and radical work by one of the great French philosophers of the nineteenth and twentieth centuries This outstanding new translation the first for over a hundred years brings one of Bergson s most important and ambitious works to a new generation of readers A sympathetic though critical reader of Darwin Bergson argues in Creative Evolution against a mechanistic reductionist view of evolution For Bergson all life emerges from a creative shared impulse which he famously terms lan vital and which passes like a current through different organisms and generations over time Whilst this impulse remains as forms of life diverge and

multiply human life is characterized by a distinctive form of consciousness or intellect Yet as Bergson brilliantly shows the intellect's fragmentary and action oriented nature which he likens to the cinematograph means it alone cannot grasp nature's creativity and invention over time A major task of Creative Evolution is to reconcile these two elements For Bergson the answer famously lies in intuition which brings instinct and intellect together and takes us into the very interior of life A work of great rigour and imaginative richness that contributed to Bergson winning the Nobel Prize for Literature in 1927 Creative Evolution played an important and controversial role in the trajectory of twentieth century philosophy and continues to create significant discussion and debate The philosopher and psychologist William James who admired Bergson's work was writing an introduction to the first English translation of the book before his death in 1910 This new translation includes a foreword by Elizabeth Grosz and a helpful translator's introduction by Donald Landes Also translated for the first time are additional notes articles reviews and letters on the reception of Creative Evolution in biology mathematics and theology This edition includes fascinating commentaries by philosophers Maurice Merleau Ponty Georges Canguilhem and Gilles Deleuze
