Futter,Christina M. Anderson,2022-02-24 The 19th century in Western culture was a time of both confidence and turbulence Industrial development produced a growing middle class as well as efficiency convenience and innovation across a range of fields from engineering to architecture Alongside these improvements the century began with the extended period of the Napoleonic Wars and was further disrupted by rebellions and revolutions both within Europe and in India South America and other parts of the world Slavery was abolished and urbanization increased dramatically These myriad developments were reflected throughout the period in the proliferation of types of furniture along with their categorization as industrial art at the

international exhibitions and world fairs and the increasingly adventurous range of materials that were sometimes used in their construction. Nonetheless a strong antiquarian historicist strand also prompted interest in the revival of past styles in areas of art and design including furniture. Drawing upon a wealth of visual and textual sources this volume of *A Cultural History of Furniture* presents essays that examine key characteristics of the furniture of the period on the themes of design and motifs, makers, making and materials, types and uses, the domestic setting, the public setting, exhibition and display, furniture and architecture, visual representations and verbal representations. **Architectural Theory, Volume 2** Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11 This second volume of the landmark *Architectural Theory* anthology surveys the development of architectural theory from the Franco-Prussian war of 1871 until the end of the twentieth century. The entire two-volume anthology follows the full range of architectural literature from classical times to present transformations. An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture. Spans the period from 1871 to 2005 from John Ruskin and the arts and crafts movement in Great Britain through to the development of L'ange New City and the creation of a metropolis in the East China Sea. Organized thematically featuring general and section introductions and headnotes to each essay written by a renowned expert on architectural theory. Places the work of architects like Koolhaas, Eisenman and Lynn alongside the work of prominent architectural critics offering a balanced perspective on current debates. Includes many hard to find texts and works never previously translated into English. Alongside Volume I *An Anthology from Vitruvius to 1870* creates a stunning overview of architectural theory from early antiquity to the twenty-first century. Art Nouveau Charlotte Ashby, 2021-10-21 *Art Nouveau* presents a new overview of the international Art Nouveau movement. Art Nouveau represented the search for a new style for a new age, a sense that the conditions of modernity called for fundamentally new means of expression. Art Nouveau emerged in a world transformed by industrialisation, urbanisation and increasingly rapid means of transnational exchange bringing about new ways of living, working and creating. This book is structured around key themes for understanding the contexts behind Art Nouveau including new materials and technologies, colonialism and imperialism, the rise of the modern woman, the rise of the professional designer and the role of the patron/collector. It also explores the new ideas that inspired Art Nouveau: nature and the natural sciences, world arts and world religions, psychology and new visions for the modern self. Ashby explores the movement through 41 case studies of artists and designers, buildings, interiors, paintings, graphic arts, glass, ceramics and jewellery drawn from a wide range of countries. **Five Houses, Ten Details** Edward R. Ford, 2012-04-17 Edward Ford's forty years of practicing and teaching architecture have focused on one area: the architectural detail. Yet despite two hugely influential books, *The Details of Modern Architecture* volumes 1 and 2, numerous articles and lectures given from Vancouver to Vienna, there are two questions Ford has remarkably never answered: What is a detail and more importantly, What is a good detail? Ford is an architect as well as a writer so it is not surprising that rather

than answering these questions in a third book he spent six years on the design and construction of a house Building it was not an exercise in the application of ideas about detail it was rather a mechanism for answering those two simple questions

Gardens of the Arts and Crafts Movement Judith B. Tankard, 2018-11-27 The ever alluring Arts and Crafts garden is profoundly relevant to our 21st century needs Sam Watters author of *Gardens for a Beautiful America* In *Gardens of the Arts and Crafts Movement* landscape scholar Judith B Tankard surveys the inspirations characteristics and development of garden design during this iconic movement Tankard presents a selection of houses and gardens of the era from Great Britain and North America With almost 300 illustrations and photographs and an emphasis on the diversity of designers who helped forge the movement *Gardens of the Arts and Crafts Movement* is an essential resource for this truly distinct approach to garden design

The Grove Encyclopedia of American Art Joan M. Marter, 2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries

In Pursuit of Beauty Metropolitan Museum of Art (New York, N.Y.), 1986 This project is the first comprehensive study of a phenomenon that not only dominated the American arts of the 1870s and 1880s but also helped set the course of such later developments in the United States as the Arts and Crafts movement the indigenous interpretation of Art Nouveau and even the rise of modernism In fact the early history of the Metropolitan its founding its sponsorship of a school of industrial design and its display of decorative works is inextricably tied to the Aesthetic movement and its educational goals In *Pursuit of Beauty* Americans and the Aesthetic Movement comprised some 175 objects including furniture metalwork stained glass ceramics textiles wallpaper painting and sculpture Some of these had rarely been displayed others although familiar were being shown in new and even startling contexts The exhibition and catalogue are arranged thematically to illustrate both the major styles of a visually rich movement and the ideas that generated its diversity From publisher's description

The Design Encyclopedia Mel Byars, 2004 Design has an increasingly high profile figures like Philippe Starck are as venerated and well known as more traditional artists But where the literature on fine art is vast design is still comparatively ill served This encyclopedia provides an account of the still largely unknown story of design

Making Dystopia James Stevens Curl, 2018-08-23 In *Making Dystopia* distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote

from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue *Baillie Scott* Diane

Haigh,1995-09-28 This detailed study re assesses Scott s designs for buildings furniture and stained glass windows and his contribution to the development of architectural thought **The Edwardian Sense** Morna O'Neill,Michael Hatt,2010 This
