Mail Monopoly Analyzing Canadian Postal Service:

The Mail Monopoly Douglas K. Adie,1990-01-01 **Liberalization of the Postal and Delivery Sector** Michael A. Crew,Paul R. Kleindorfer,2006-01-01 Worldwide postal and delivery economics has attracted considerable interest as the delivery sector undergoes rapid change and the debate on liberalization rages This compendium of original essays has been selected from papers presented at the Rutgers University CRR1 14th Conference on Postal and Delivery Economics May 31 June 3 2006 It explores the important new trends and issues in this rapidly changing field The European Union s plan to open postal markets completely in 2009 has raised questions about the role of regulation funding for the Universal Service Obligation the future of national Postal Operators and the principles that should govern the introduction of competition The contributors researchers practitioners lawyers and senior managers from around the world address these questions in chapters that cover postal markets pricing efficiency and cost analysis labor relations and demand drivers Examples are drawn from around the world This timely book will be illuminating to practitioners and managers in the postal express and delivery industry as well as economists regulators competition lawyers and marketers Case for Discrimination, The ,

The Oxford Handbook of State Capitalism and the Firm Mike Wright,Geoffrey T. Wood,Alvaro Cuervo-Cazurra,Pei Sun,Ilya Okhmatovskiy,Anna Grosman,2022-08-01 There has been a major revival of interest in State Capitalism what it is where it is found and why it is seemingly becoming more ubiquitous As a concept it has evolved from radical critiques of the Soviet Union to being deployed by neo liberals to describe market reforms deemed imperfect to settle into a middle ground as a pragmatic way to describe the state assuming a role as an active economic agent in addition to its regulatory social and security functions The latter is the central focus of this book although due attention is accorded to the origins of state capitalism and how it has changed over the years as well as contemporary ways in which state capitalism may be theorized This economic agency may assume direct forms for example via state owned enterprises However it may also be indirect for example actively serving private interests through promoting insider firms who may occupy monopolistic market positions and perform outsourced state functions In turn this leads to raising salient governance questions The latter may encompass agency tensions between public ownership and political or even private interest control it may also include issues of transparency and monitoring Although state capitalism has often been depicted as the preserve of states in the global south be they developmental or predatory many forms of state capitalism are visible in mature economies be they liberal or coordinated and this is not always associated with superior governance arrangements indeed this is an area where clear and easy divisions between the developing or emerging world and the developed or mature world may increasingly be breaking down This volume brings together the accounts of leading experts from around the world it is explicitly multi disciplinary and both consolidates the existing knowledge base and provides new novel and counter intuitive insights Emerging Competition in Postal and Delivery Services Michael A. Crew,Paul R. Kleindorfer,1999-02-28 Emerging Competition in Postal

and Delivery Services brings together practitioners postal administrators the courier industry regulators academic economists and lawyers to examine important policy and regulatory issues facing the postal and delivery industries This volume reviews such topics as cost and productivity analysis universal service and entry demand analysis and the structure of postal payment system price regulation and competition *Philosophy of Law* Walter E. Block, Roy Whitehead, 2019-11-14 Looking at discrimination education environment health and crime this volume analyses United States Supreme Court rulings on several legal issues and proposed libertarian solutions to each problem Setting their own liberal theory of law each chapter discusses the law at hand what it should be and what it would be if their political economic philosophy were the justification of the legal practice Covering issues such as sexual harassment religion markets in human organs drug prohibition and abortion this book is a timely contribution to classical liberal debate on law and economics **Water**

Capitalism Walter E. Block, Peter L. Nelson, 2015-10-30 Water covers some 75% of the earth's surface while land covers 25% approximately Yet the former accounts for less than 1% of world GDP the latter 99% plus Part of the reason for this imbalance is that there are more people located on land than water But a more important explanation is that while land is privately owned water is unowned with the exception of a few small lakes and ponds or governmentally owned rivers large lakes This gives rise to the tragedy of the commons when something is unowned people have less of an incentive to care for it preserve it and protect it than when they own it As a result we have oil spills depletion of fish stocks threatened extinction of some species e.g. whales shark attacks polluted and dried up rivers misallocated water unsafe boating piracy and other indices of economic disarray which if they had occurred on the land would have been more easily identified as the result of the tragedy of the commons and/or government ownership and mismanagement The purpose of this book is to make the case for privatization of all bodies of water without exception In the tragic example of the Soviet Union the 97% of the land owned by the state accounted for 75% of the crops On the 3% of the land privately owned 25% of the crops were grown The obvious mandate requires that we privatize the land and prosper The present volume applies this lesson in detail to bodies of water

Governing Global Networks Mark W. Zacher, Brent A. Sutton, 1996 Governing Global Networks argues that most international regimes are grounded in states mutual cooperation and not in the dictates of the most powerful states It focuses on the regimes for four important international industries shipping air transport telecommunications and postal services Of particular importance to these regimes have been states interests in both the free flow of commerce and their policy autonomy The authors examine the relationship between these potentially conflicting goals In particular they trace the impact of deregulation which has led some states increasingly to place gains from economic openness ahead of their desire to maintain a high degree of control of their own economies and to the decline of the traditional cartel elements of these regimes This analysis is an important contribution to theoretical debates between neo realists and neo liberals in the study of international organisations and international political economy **Re-routing the Mail Stream** Robert Sean Hickey, 2007

Une économie plus dynamique dans un Canada fort et prospère Mike Harris, Preston Manning, Fraser Institute
(Vancouver, B.C.), Institut économique de Montréal, 2006 Des dépenses publiques et une imposition excessives restreignent la liberté économique des individus et des entreprises en réduisant leur revenu et en transférant le pouvoir de décisions économiques dans les mains de politiciens et de fonctionnaires
