Lenin and the Making of the Soviet State NA NA, 2016-04-30. Vladimir Ilich Lenin 1870-1924 led the first successful revolt against market based liberal democracy and founded the Soviet State in 1917, serving as the new nation's chief architect and sole ruler for the next five years. This collection of primary sources allows readers to learn about Lenin through his own words and emphasizes Lenin's actions rather than his ideology. Jeffrey Brooks and Georgiy Chernyavskiy have translated newly available documents that make it possible to provide a more accurate portrait of a ruthless political strategist whose actions created a new political economic social and cultural system that in its heyday challenged the military technological and cultural might of the United States. Document headnotes, a chronology, questions for consideration and a selected bibliography offer additional pedagogical support and encourage students to analyze the actions and beliefs of a man who transformed world history and whose legacy continues to affect social and political movements throughout the world.

Imbalance Tobias Schulze-Cleven, Sidney A. Rothstein, 2021-03-30. Germany is a central case for research on comparative political economy which has inspired theorizing on national differences and historical trajectories. This book assesses Germany's political economy after the end of the social democratic 20th century to rethink its dominant properties and create new opportunities for using the country as a powerful lens into the evolution of democratic capitalism. Documenting large scale changes and new tensions in the welfare state, company strategies, interest intermediation and macroeconomic governance, the volume makes the case for analysing contemporary Germany through the politics of imbalance rather than the long standing paradigm of institutional stability. This conceptual reorientation around inequalities and disparities provides much needed traction for clarifying the causal dynamics that govern ongoing processes of institutional recomposition. Delving into the politics of imbalance, the volume explicates the systemic properties of capitalism, multivalent policy feedback and the organizational foundations of creative adjustment as key vantage points for understanding new forms of distributional conflict within and beyond Germany. The chapters in this book were originally published as a special issue of German Politics.
