Open Doors 1996 97 Report On International Educational Exchange:

Open Doors, 1996-97 Todd M. Davis, 1997-12 This report examines current and historical data on international student mobility based on surveys of foreign students and scholars in the United States and U S students in study abroad programs and the Cooperative Institutional Research Program The 83 data tables and 47 figures and accompanying summary text are organized as follows 1 total number of foreign students in the United States 2 enrollments by region and country of origin 3 undergraduate and graduate distribution by country of origin 4 field of study choices and geographic origins of students for 13 academic areas 5 the development of field of study choices over time for students from selected Asian countries 6 access and participation rates of foreign students by sex and nationality 7 distribution of foreign students in the United States by county region and state 8 primary funding sources and estimated expenditures of foreign students 9 foreign student enrollments by institution 10 academic and personal characteristics of foreign students 11 numbers and destinations of U S students studying abroad 12 foreign student enrollments in intensive English programs and student geographic origins and 13 numbers and activities of foreign scholars on U S campuses Brief essays on international education are included along with information about the survey methodology and the accompanying diskette SW

Recent Trends in U.S. Services Trade, 1999 Annual Report, Inv. 332-345 , Globalisation, Trade Liberalisation, and Higher Education in North America C.W. Barrow, S. Didou-Aupetit, J. Mallea, 2012-12-06 Since the mid 1970s economic and educational developments in Canada Mexico and the USA have been influenced by two parallel trends 1 the resurgence of global economic competition and 2 the active promotion of knowledge intensive service based economies Both trends have been reinforced by the liberalisation of international trade under the rubric of the General Agreement on Tariffs and Trade GATT and the World Trade Organisation WTO The North American Free Trade Agreement NAFTA has accelerated these trends in all three countries by providing the framework for an integrated regional economy in North America designed to compete against comparable trading blocs centred in Japan and the European Union The purpose of this study is to examine the developing relationship between trade liberalisation post industrialisation and higher education in Canada Mexico and the USA The larger trends and linkages that we identify are by no means confined to these three countries We have chosen to focus on Canada Mexico and the USA because the adoption of the North American Free Trade Agreement has accelerated the development of economic policies in these countries which identify higher education as a central component of each country's new competitiveness strategy As a consequence government policy makers and higher education decision makers are responding with targeted initiatives to promote the internationalisation of higher education generally and to promote trilateral cooperation among North American higher education institutions specifically

Serving Library Users from Asia John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US While books on serving other target groups in libraries have been published e.g. disabled Latino seniors etc few books on serving library

users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters, each on 24 specific Asian countries, cultures of East, Southeast, and South Asia, with a wealth of resources for understanding, interacting with, and serving library users of each culture. Resources include cultural guides, both print and online, language helps with sample library vocabulary, Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries: public, school, and academic, making this book valuable for all librarians. The demographics of each Asian culture, numbers, and distribution, plus history of immigration and international student enrollment, is also featured. As a bonus, each chapter spotlights a US public school and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more of public school and academic libraries are all discussed with detailed documentation. Country conditions influencing libraries and library use are also described. Literacy levels, reading cultures, languages, and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

Counseling International Students Nancy Marie Arthur, 2013-11-11
This book is a useful resource for designing and delivering culturally responsive counseling services for international students. It introduces readers to contributions made by international students in higher education and supplies in-depth information about the nature of cross-cultural transitions, including initial entry to the host culture as well as the return home. A framework of multicultural counseling competencies is applied; case examples are provided, and the book is filled with practical information for counselors and other mental health professionals.

Open Doors 1996-1997 Institute of International Education (New York, N.Y.), 1997
This report examines current and historical data on international student mobility based on surveys of foreign students and scholars in the United States and US students in study abroad programs and the Cooperative Institutional Research Program. The 83 data tables and 47 figures and accompanying summary text are organized as follows: 1. total number of foreign students in the United States; 2. enrollments by region and country of origin; 3. undergraduate and graduate distribution by country of origin; 4. field of study choices and geographic origins of students for 13 academic areas; 5. the development of field of study choices over time for students from selected Asian countries; 6. access and participation rates of foreign students by sex and nationality; 7. distribution of foreign students in the United States by county, region, and state; 8. primary funding sources and estimated expenditures of foreign students; 9. foreign student enrollments by institution; 10. academic and personal characteristics of foreign students; 11. numbers and destinations of US students studying abroad; 12. foreign student enrollments in intensive English programs and student geographic origins; and 13. numbers and activities of foreign scholars on US campuses. Brief essays on international education are included along with information about the survey methodology and the accompanying diskette.

SW The Outlook for U.S.-China Relations

Following the 1997-1998 Summits Peter H. Koehn, 1999 At the end of the 20th Century the focus of global attention and concern is on the future relationship between the world's most influential nation and its most populous one. The series of high level meetings and the exchange of unusually long summit visits that occupied the center of the world stage in the late 1990s reveal that both sides recognize the other's global importance. In the words of President Bill Clinton, the role China chooses to play will powerfully shape the next century. The years 1997 and 1998 will be remembered by many for the critically acclaimed summit visits of Jiang Zemin to the United States and Bill Clinton to China. This book moves beyond the Clinton Jiang summits of 1997-1998 to explore long term prospects in light of recent developments. Nineteen scholars from diverse disciplines including eight from China mainland institutions address the outlook for security relations in the Asia Pacific Region, prospects for strategic partnership, issues concerning Taiwan, Tibet, and trade, the potential for information technology and educational exchanges, future competition for natural resources, changing images of each other, and other critical dimensions of expanding non state relationships. The interaction of China and the United States promises to constitute the world's most important bilateral relationship well into the 21st Century. To be constructive and enduring, relationships must be based on mutual understanding and respect. This volume provides an opportunity to advance both foundations among students, scholars, policy makers, and the attentive public in the East and the West.

Dominant Beliefs and Alternative Voices Joan Elias Gore, 2017-09-25 This book examines why study abroad is a marginal activity in American higher education and evaluates the role gender has played in the development and maintenance of this marginality.

Science & Engineering Indicators, 1998 **Handbook of Undergraduate Second Language Education** Judith W. Rosenthal, 2013-06-17 This volume offers the most comprehensive up to date description of the wide array of second language programs currently available to undergraduate students in the United States and abroad. It brings together for the first time detailed descriptions of programs in foreign language, English as a second language, ESL, dual language, bilingual, American Sign Language, Native American and heritage languages. Addressing both theory and practice, the volume presents the historical development, current practices, and future directions of each type of program, along with detailed case studies. For second language teachers, academic administrators, and teacher educators, this Handbook provides information that will be useful in making instructional and programmatic planning decisions.
