Service Industries A Geographical Appraisal:

Service Industries Peter Walters Daniels,1991 **Service Industries** P. W. Daniels,1985 Service Industries Peter W. Daniels,1985-12-19 First published in 1985 Routledge is an imprint of Taylor Francis an informa company *Service Industries and Asia Pacific Cities* Peter W. Daniels,Kong Chong Ho,Thomas A. Hutton,Tom Hutton,2005-04 During the second half of the twentieth century development in the Asia Pacific region has been dominated by industrialization However at the beginning of the twenty first century services in particular finance information and creative services have become deeply embedded in the processes of urban growth In Asia Pacific the rise of service industries has lead to national modernization programmes and globalization strategies Services are also driving change in the internal form of city regions and are being actively deployed as instruments of metropolitan reconfiguration and land use changes These changes have created problems such as social polarization and the displacement of traditional industries and residential districts Also there are tensions between local and global processes in the development of service industries and between the imperatives of competitive advantage and sustainable development *Service Industries and Asia Pacific Cities* brings together a multi disciplinary team of experts to explore and illustrate the theoretical conceptual and practical issues arising from the transformation of Asia Pacific cities by service industries *The Handbook of Service Industries* J. R. Bryson,P. W. Daniels,2007-01-01 It contains an impressive array of important and useful material that should be familiar to anyone interested in economic growth and change the potential value to be gained from these collected works is great James E Pratt Growth and Change Service activities are now acknowledged as key players in economic development societal change and public policy worldwide This exciting Handbook not only contributes to ongoing conceptual debates about the nature of service led economies and societies it also pushes back the frontiers of current critical thinking about the role of service activities in urban and regional development and the important research agendas that remain to be addressed Drawing on both theory and case studies the contributors are international experts who have written original and stimulating chapters from a number of different disciplinary perspectives Each chapter seeks to raise awareness of and to provoke debates about the opportunities and challenges presented by the shift to service employment Providing a truly interdisciplinary analysis *The Handbook of Service Industries* will be invaluable to scholars specializing in services research as well as students and researchers in the areas of economics geography business and management sociology public policy and planning The policy making community will also find the Handbook a relevant and useful resource China's White-Collar Wave Changyun Jiang,Qun Lian Hong,Ling Qiu,2019-11-04 This book explores the move from manufacturing towards service industry jobs in China s economic development during the 12th Five Year Plan period The service industry now makes up the highest proportion of the GDP and employs the largest number of people in China In the next Five Year Plan period it is necessary to actively push forward the strategic transformation by placing emphasis on the service industry to press ahead with system and mechanism reforms and

policy innovations and cultivate diverse sustainable and continuous forces for driving its growth Efforts are made to upgrade the service industry to better achieve economic and social development in an innovative coordinated green open and shared way This book will be of interest to scholars researching China's future *Services and Metropolitan Development* Peter W. Daniels, 2002-11 Explores the processes guiding both the development and the spatial impacts of services on the urban system and individual areas and describes the internationalisation of services and the effects of re structuring on urban systems *Canada and the Global Economy* John N. H. Britton, 1996 A collection of essays by twenty three of Canada's leading economic geographers Canada and the Global Economy is a comprehensive study of the evolving economic and geographic patterns of Canadian development It provides a benchmark for research on the spatial development of the Canadian economy The contributors explore four central themes the locational impacts of the openness of the Canadian economy Canada's relatively simple economic geography in terms of regional variations in resources and urban development the problems of keeping pace with rapid advances in technology and the role of government in maintaining a national market and assisting economic development They outline the essential elements of Canada's contemporary economic geography and highlight the origins and spatial imprint of change in the Canadian economy in particular they provide an assessment of Canada's participation in significant international patterns of economic change Canada and the Global Economy is concerned not only with the economic size and location of consumption and production but also with institutional changes and shifts in employment the sectoral composition of economic activity and the organizational structure and locational behaviour of particular industries and firms Special attention is given to the technological development of both established industries and new service and manufacturing activities A timely addition to the field it provides a geographic perspective on significant changes in jobs and types of work that result from the transformation of economic activities *The Economics of Services* Gary Akehurst, Jean Gadrey, 1987 First Published in 1988 Routledge is an imprint of Taylor Francis an informa company

The Local Impact of Globalization in South and Southeast Asia Bart Lambregts, Niels Beerepoot, Robert Kloosterman, 2015-08-27 In the past two decades several millions of IT enabled services jobs have been relocated or offshored from the US and Europe to in particular low cost economies around the world Most of these jobs so far have landed in South and South East Asia with India and the Philippines receiving the bulk of them This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects This book examines how this next wave in globalization affects people and places in South and South East Asia It brings together twelve case studies from India the Philippines China Hong Kong and Thailand and explores how and for whom services offshoring creates opportunities triggers local economic transformations and produces challenges This book in addition compares how different countries take part in this second global shift investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained

economic growth for developing countries It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located Based on cutting edge empirical research and original data the volume offers a state of the art contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services offshoring socio economic development and contemporary transformations in South and South East Asia
