Seurat And The Science Of Painting

William Innes Homer

Seurat And The Science Of Painting:

Seurat and the Science of Painting. [Illustr.] William Innes Homer, 1964 *Seurat and the Science of Painting* William Innes Homer, 1985 **Georges Seurat and the Science of Painting** William Innes Homer, 1964 **The Collected Essays and Criticism, Volume 1** Clement Greenberg, 1986 Clement Greenberg is widely recognized as the most influential and articulate champion of modernism during its American ascendancy after World War II the period largely covered by these highly acclaimed volumes of *The Collected Essays and Criticism* Volume 3 *Affirmations and Refusals* presents Greenberg's writings from the period between 1950 and 1956 while Volume 4 *Modernism with a Vengeance* gathers essays and criticism of the years 1957 to 1969 The 120 works range from little known pieces originally appearing in *Vogue* and *Harper's Bazaar* to such celebrated essays as *The Plight of Our Culture* 1953 *Modernist Painting* 1960 and *Post Painterly Abstraction* 1964 Preserved in their original form these writings allow readers to witness the development and direction of Greenberg's criticism from his advocacy of abstract expressionism to his enthusiasm for color field painting With the inclusion of critical exchanges between Greenberg and F R Leavis Fairfield Porter Thomas B Hess Herbert Read Max Kozloff and Robert Goldwater these volumes are essential sources in the ongoing debate over modern art **Painting, Science, and the Perception of Coloured Shadows** Paul Smith, 2021-03-17 Many artists and scientists including Buffon Goethe and Philipp Otto Runge who observed the vividly coloured shadows that appear outdoors around dawn and dusk or indoors when a candle burns under waning daylight chose to describe their colours as beautiful Paul Smith explains what makes these ephemeral effects worthy of such appreciation or how depictions of coloured shadows have genuine aesthetic and epistemological significance This multidisciplinary book synthesises methodologies drawn from art history close pictorial analysis psychology and neuroscience theories of colour constancy history of science the changing paradigms used to explain coloured shadows and philosophy theories of perception and aesthetic value drawn from Wittgenstein and Merleau Ponty This title will be of interest to scholars in art history art theory and the history of science and technology **The Graph Music of Morton Feldman** David Cline, 2016-05-26 Morton Feldman is widely regarded as one of America's greatest composers His music is famously idiosyncratic but in many cases the way he presented it is also unusual because in the 1950s and 1960s he often composed in non standard musical notations including a groundbreaking variety on graph paper that facilitated deliberately imprecise specifications of pitch and at times other musical parameters Feldman used this notation intermittently over seventeen years producing numerous graph works that invite analysis as an evolving series Taking this approach David Cline marshals a wide range of source materials many previously unpublished in clarifying the ideology organisation and generative history of these graphs and their formative role in the chronicle of post war music This assists in pinpointing connections with Feldman's compositions in other formats works by other composers notably John Cage and contemporary currents in painting Performance practice is examined through analysis of Feldman's non notated

preferences and David Tudor's celebrated interpretations The Science of Paintings W. Stanley Jr. Taft, James W. Mayer, 2006-04-18 The physics and materials science behind paintings the pigments binders canvas and varnish that go into making a painting appear the way it does The text discusses the physical principles behind the colors seen and how these change with illumination the various types of paint and binders used in both old and modern paintings and the optics and microscopic structure of paint films Chapters on dating binders and dendochronology have been contributed by experts in the respective fields **Brushstroke and Emergence** James D. Herbert, 2015-11-16 No pictorial device in nineteenth century French painting more clearly represented the free ranging self than the loose brushstroke From the romantics through the impressionists and post impressionists the brushstroke bespoke autonomous artistic individuality and freedom from convention Yet the question of how much we can credit to the individual brushstroke is complicated and in *Brushstroke and Emergence* James D Herbert uses that question as a starting point for an extended essay that draws on philosophy of mind the science of emergence and art history Brushstrokes he reminds us are as much creatures of habit and embodied experience as they are of intent When they gather in great numbers they take on a life of their own out of which emerge complexity and meaning Analyzing ten paintings by Courbet Manet C zanne Monet Seurat and Picasso Herbert exposes vital relationships between intention and habit the singular and the complex In doing so he uncovers a space worthy of historical and aesthetic analysis between the brushstroke and the self *How Color Works* Pamela Fraser, 2019 *How Color Works* demonstrates that interest in color is alive and well and shows students of all levels how to create and use color in a sophisticated fashion This interactive book describes how color contributes to meaning in specific masterful artworks using large full color illustrations and encourages students to produce color variations of their own in response Approaching the aesthetics of color in contemporary terms this text shows how knowledge of color theory is important for both traditional and experimental approaches to art making **Color and Culture** John Gage, 1999 An encyclopaedic work on color in Western art and culture from the Middle Ages to Post Modernism
