Seventeenth Century Painting:

Dutch Seventeenth-century Genre Painting Wayne E. Franits, 2004-01-01 The appealing genre paintings of great seventeenth century Dutch artists Vermeer Steen de Hooch Dou and others have long enjoyed tremendous popularity This comprehensive book explores the evolution of genre painting throughout the Dutch Golden Age beginning in the early 1600s and continuing through the opening years of the next century Wayne Franits a well known scholar of Dutch genre painting offers a wealth of information about these works as well as about seventeenth century Dutch culture its predilections and its prejudices The author approaches genre paintings from a variety of perspectives examining their reception among contemporary audiences and setting the works in their political cultural and economic contexts The works emerge as distinctly conventional images Franits shows as genre artists continually replicated specific styles motifs and a surprisingly restricted number of themes over the course of several generations Luxuriously illustrated and with a full representation of the major artists and the cities where genre painting flourished this book will delight students scholars and general readers alike

European Art of the Seventeenth Century Rosa Giorgi, 2008 This volume presents the most noteworthy concepts artists and cultural centers of the seventeenth century through a close examination of many of its greatest paintings sculptures and buildings The Baroque rooted in classicism but with a new emphasis on emotionalism and naturalism was the leading style of the seventeenth century The movement exhibited both stylistic complexity and great diversity in its subject matter from large religious works and history paintings to portraits landscapes and scenes of everyday life Masters of the era included Caravaggio whose innovations in the dramatic uses of light and shadow influenced many of the century's artists notably Rembrandt the sculptor painter and architect Bernini with his combination of technical brilliance and expressiveness and other familiar names such as Rubens Poussin Velazquez and Vermeer This was the era of absolute monarchs including Spain's Habsburgs and Louis XIII and XIV of France whose artistic patronage helped furnish their opulent palaces But a new era of commercialism in which artists increasingly catered to affluent collectors of the professional and merchant classes also flourished

Shifting Priorities Nanette Salomon, 2004 This ground breaking book offers the first sustained examination of Dutch seventeenth century genre painting from a theoretically informed feminist perspective Other recent works that deal with images of women in this field maintain the paradoxical combination of seeing the images as positivist reflections of life as it was and as emblems of virtue and vice These reductionist practices deprive the works of their complex nature and of their place in visual culture important frameworks that the book attempts to restore to them Salomon expands the possibilities for understanding both familiar and unfamiliar paintings from this period by submitting them to a wide range of new and provocative questions Paintings and prints from the first half of the century through to the second are analyzed to understand the changing social roles and values attributed to the sexes as they were introduced and reflected in the visual arts
