Seventeenth-century British Keyboard Sources Candace Bailey, 2003 **Musical Creativity in Restoration England** Rebecca Herissone, 2013-10-10 Musical Creativity in Restoration England is the first comprehensive investigation of approaches to creating music in late seventeenth century England Understanding creativity during this period is particularly challenging because many of our basic assumptions about composition such as concepts of originality inspiration and genius were not yet fully developed In adopting a new methodology that takes into account the historical contexts in which sources were produced Rebecca Herissone challenges current assumptions about compositional processes and offers new interpretations of the relationships between notation performance improvisation and musical memory She uncovers a creative culture that was predominantly communal and reveals several distinct approaches to composition determined not by individuals but by the practical function of the music Herissone's new and original interpretations pose a fundamental challenge to our preconceptions about what it meant to be a composer in the seventeenth century and raise broader questions about the interpretation of early modern notation **Music Library and Research Skills** Jane Gottlieb, 2017 Concise and engaging this text covers a wide range of reference sources for research in all genres of music Through this practical introduction to the key concepts of music research students will develop a firm understanding of the tools used to gather data including what types of sources exist how they are arranged and how they may best be used to do research
