Seville In Focus:

Sevilla in Focus Juan Agustín Núñez Guardede,2001-07 **Maritime History as Global History** Maria Fusaro,Amélia Polónia,2017-10-18 This study aims to provide new insights into the connections between maritime history and global history It demonstrates the significance of maritime activity as a conduit of global exchange by examining local national and international interdependencies and trade networks and a broad range of time periods geographical areas and various sub divisions of maritime historical research It is composed of ten essays with an introductory chapter and concluding chapter The first five essays discuss the effects globalisation on shipping in the early modern period the following three discuss maritime transportation and the economics of industrialisation from the nineteenth century to the present day the next discusses the impact of global entrepreneurialism on maritime history the penultimate discusses the connections and variables between maritime and global history and the concluding chapter examines the theoretical assumptions surrounding the two disciplines using the globalisation of Early Modern Spain as a case study to do so The study demonstrates that the core strength of maritime history is its essential place in global history and that the process of globalisation began at sea

Challenging Austerity Beltrán Roca,Emma Martín-Díaz,Ibán Díaz-Parra,2017-11-22 This book analyses social movements and radical political parties strategies in Spain Greece Portugal and Italy from 2008 to today Events in 2011 such as the Arab Spring and the indignados movement in Spain initiated a new cycle of social protest This book explores how the economic crisis and policies of austerity have transformed and continue to transform social movements trade unions and radical political parties in Southern Europe The economic crisis has led to a rise in protest movements which confront political institutions and conventional forms of democracy and develop new spatial and organisational strategies This book examines these cases in addition to those groups who contrastingly have used institutional politics to achieve their aims such as new political parties like Podemos in Spain or Movimento 5 Stelle in Italy Analysing the extent to which there has been a change in approach when it comes to contesting neo liberal capitalism this book makes an important contribution to the study of social movements and radical politics With a comparative perspective and an emphasis on studying the largely unexplored recent social and political dynamics in the European periphery this book is essential reading for students scholars and activists interested in social movements radical politics and European politics more generally Juan de Pareja:

Afro-Hispanic Painter in the Age of Velázquez David Pullins,Vanessa K. Valdés,2023-04-03 Diego Velázquez's portrait of Juan de Pareja ca 1608 1670 has long been a landmark of European art but this provocative study focuses on its subject an enslaved man who went on to build his own successful career as an artist This catalogue the first scholarly monograph on Pareja discusses the painter's ties to the Madrid School of the 1660s and revises our understanding of artistic production during Spain's Golden Age with a focus on enslaved artists and artisans The authors illuminate the highly skilled labor within Seville's multiracial society the role of Black saints and confraternities in the promotion of Catholicism among enslaved

populations and early twentieth century scholar Arturo Schomburg's project to recover Pareja's legacy The book also includes the first illustrated and annotated list of known works attributed to Pareja

Seville's EU Intellectual Property Law and Policy Justine Pila, 2022-11-15 Carefully authored by Justine Pila this significantly revised and expanded third edition of Catherine Seville's classic text presents a thorough and detailed treatise on EU intellectual property IP law taking into account the many developments in legislation and case law since the second edition

Enemies Within María Sierra, 2015-11-25 Can citizenship rights be denied to significant groups in a society that regards itself as civilized and self governing Is it possible to exclude such people in the name of freedom and reason Is it plausible to explain classifications that differentiate between first and second class citizens as natural This is the paradox inherent in modern politics born of the revolutions that ended the Ancien Régime in the western world Throughout the nineteenth century and at the beginning of the twentieth liberalism inspired a representative form of government that appealed to citizenship yet marginalized many social groups including natives women immigrants workers slaves and nomads In the Hispanic dimension of the Atlantic world that this book deals with modern politics was based on exclusions explained as natural and necessary In both Europe and America a distinction was made between the responsible citizen and those others in society potential enemies within who had to be controlled and supervised This book explains the success of this political operation by analysing the historical construction of figures of alterity that were fundamental to the definition of national civic identities Its basic premise is that imaginaries that were constructed in the nineteenth century can be found even today in western political conceptions The cultural complexity of enduring political images is revealed by exploring the inner workings of virtuous figures in relation to their opposites readers will find the mosaic of representations of civic alterity both recognisable and surprising The contributors to this volume provide historical perspectives on the debate on political legitimacy in open societies Reinventing democracies involves understanding the historicity of inherited formulae of governance and considering them therefore as amenable to improvement The readiness to do this is not a threat to democracy but rather a commitment to looking for it

Migration, Tourism and Social Sustainability Jaeyeon Choe, Peter Lugosi, 2023-03-21 The distinctions between tourism and migration are increasingly blurred Tourism often drives various forms of mobility and an international workforce is essential to maintaining functioning tourism economies This book explores intersections of tourism and migration considering their relationships with and impacts on social sustainability The chapters explore in a variety of contexts how the planning development and governance of tourism affects the sustainability of communities which consequently influences attitudes towards migrants and tourists They also consider how migrant local connections may evolve creating opportunities for positive symbiotic co existence or intergroup tensions and exploitative relationships The book paves the way for future work examining new forms and interactions between migration and tourism that contribute to social sustainability This book will be of great value to students academics and researchers interested in tourism geography migration diaspora studies and

sociology The chapters in this book were originally published as a special issue of *Tourism Geographies* **Admiration and Awe** Antonio Urquizar-Herrera, 2017-05-05 This book offers the first systematic analysis of the cultural and religious appropriation of Andalusian architecture by Spanish historians during the sixteenth and seventeenth centuries To date this process of Christian appropriation has generally been discussed as a phenomenon of architectural hybridisation However this was a period in which the construction of a Spanish national identity became a key focus of historical discourse As a result cultural hybridity encountered partial opposition from those seeking to establish cultural and religious homogeneity Spain's Islamic past became a major concern in this period and historical writing served as the site for a complex negotiation of identity Historians and antiquarians used a range of strategies to re appropriate the meaning of medieval Islamic heritage as befitted the new identity of Spain as a Catholic monarchy and empire On the one hand the monuments Islamic origin was subjected to historical revisions and re identified as Roman or Phoenician On the other hand religious forgeries were invented that staked claims for buildings and cities having been founded by Christians prior to the arrival of the Muslims in Spain Islamic stones were used as core evidence in debates that shaped the early development of archaeology and they also became the centre of a historical controversy about the origin of Spain as a nation as well as its ecclesiastical history
