**Eating Together** Jean Duruz,Gaik Cheng Khoo,2014-12-18 Accepting the challenge of rethinking connections of food space and identity within everyday spaces of public eating in Malaysia and Singapore the authors enter street stalls hawker centers markets cafes restaurants food streets and ethnic neighborhoods to offer a broader picture of the meaning of eating in public places The book creates a strong sense of the ways different people live eat work and relax together and traces negotiations and accommodations in these dynamics The motif of rojak Malay meaning mixture together

with Ien Ang's evocative together in difference enables the analysis to move beyond the immediacy of street eating with its moments of exchange and remembering. Ultimately the book traces the political tensions of different people living together and the search for home and identity in a world on the move. Each of the chapters designates a different space for exploring these cultures of mixedness and their contradictions, whether these involve old and new forms of sociality, struggles over meanings of place or frissons of pleasure and risk in eating differently. Simply put, *Eating Together* is about understanding complex forms of multiculturalism in Malaysia and Singapore through the mind, tongue, nose, and eyes. [Small Cities](#) David Bell, Mark Jayne, 2006-09-27. Until now, much research in the field of urban planning and change has focused on the economic, political, social, cultural, and spatial transformations of global cities and larger metropolitan areas. In this topical new volume, David Bell and Mark Jayne redress this balance, focusing on urban change within small cities around the world. Drawing together research from a strong international team of contributors, this four-part book is the first systematic overview of small cities. A comprehensive and integrated primer with coverage of all key topics, it takes a multi-disciplinary approach to an important contemporary urban phenomenon. The book addresses political and economic decision-making, urban economic development and competitive advantage, cultural infrastructure and planning in the regeneration of small cities, identities, lifestyles, and ways in which different groups interact in small cities. Centering on urban change as opposed to pure ethnographic description, the book's focus on informed empirical research raises many important issues. Its blend of conceptual chapters and theoretically directed case studies provides an excellent resource for a broad spectrum of undergraduate and postgraduate students, as well as providing a rich resource for academics and researchers. Commentators on the media in Southeast Asia either emphasise with optimism the prospect for new media to provide possibilities for greater democratic discourse, or else less optimistically focus on the continuing ability of governments to exercise tight and sophisticated control of the media. This book explores these issues with reference to Malaysia and Singapore. It analyses how journalists monitor governments and cover elections, discussing what difference journalism makes, it examines citizen journalism and the constraints on it, often self-imposed constraints, and it assesses how governments control the media, including outlining the development and current application of legal restrictions.
