

Platón y la teoría de los dos mundos

Platón y un problema Socrático

Gracias a todas estas ideas que parten de algunas tesis anteriores y (Platón), se concluyó que Platón era un gran filósofo y que en su trabajo, ha inventado la figura de un **Sócrates**.

Cayuela, 2012-05-23 *Troubled Memories* Oswaldo Estrada, 2018-07-11 2019 CHOICE Outstanding Academic Title In *Troubled Memories* Oswaldo Estrada traces the literary and cultural representations of several iconic Mexican women produced in the midst of neoliberalism gender debates and the widespread commodification of cultural memory He examines recent fictionalizations of Malinche Hern n Cort s s indigenous translator during the Conquest of Mexico Sor Juana In s de la Cruz the famous Baroque intellectual of New Spain Leona Vicario a supporter of the Mexican War of Independence the soldaderas of the Mexican Revolution and Frida Kahlo the tormented painter of the twentieth century Long associated with gendered archetypes and symbols these women have achieved mythical status in Mexican culture and continue to play a complex role in Mexican literature Focusing on contemporary novels plays and chronicles in connection to films television series and corridos of the Mexican Revolution Estrada interrogates how and why authors repeatedly recreate the lives of these historical women from contemporary perspectives often generating hybrid narratives that fuse history memory and fiction In so doing he reveals the innovative and sometimes troublesome ways in which authors can challenge or perpetuate gendered conventions of writing women s lives *Obras Completas* Jaime Luciano Balmes, 1925 **Reactive scattering for H- + H2 and H+ + H2 and its isotopologues** Dequan Wang, 2016-07-15 The reactive scattering for H H2 and H H2 and its isotopologues were investigated using different methods The studies aimed at providing insights into elementary

reactions and go beyond these to more complex chemical reactions By comparison of the reaction probabilities of H₂ using adiabatic and non adiabatic methods it was found that at low collision energies the reaction preferentially occurs adiabatically but at higher collision energies non adiabatic effects should be taken into account For H₂ and its isotopologues we can see that at low collision energies the reaction probabilities and reaction cross section using SM PES and AY PES are very similar but different from PS PES The reaction cross sections investigated with quasi classical trajectories are higher than those calculated with quantum wavepackets For the collision H and D with HD the main reaction path ways are different with the different collision energies

Children, Spaces and Identity Margarita Sánchez Romero, Eva Alarcón García, Gonzalo Aranda Jiménez, 2015-10-31 How do children construct negotiate and organize space The study of social space in any human group is fraught with limitations and to these we must add the further limits involved in the study of childhood Here specialists from archaeology history literature architecture didactics museology and anthropology build a body of theoretical and methodological approaches about how space is articulated and organized around children and how this disposition affects the creation and maintenance of social identities Children are considered as the main actors in historic dynamics of social change from prehistory to the present day Notions on space childhood and the construction of both the individual and the group identity of children are considered as a prelude to papers that focus on analyzing and identifying the spaces which contribute to the construction of children's identity during their lives the places they live learn socialize and play A final section deals with these same aspects but focuses on funerary contexts in which children may lose their capacity to influence events as it is adults who establish burial strategies and practices In each case authors ask questions such as how do adults construct spaces for children How do children manage their own spaces How do people adults and children build invisible and or physical boundaries and spaces

Living the Death of Democracy in Spain Susana Belenguer, Ciaran Cosgrove, James Whiston, 2017-10-02 This volume brings together new interdisciplinary perspectives on the Spanish Civil War its victims its contentious ending and its aftermath In exploring the slow demise of the Spanish Republic and the course of the Civil War the authors have chosen to range in turn over cinematic literary and historical depictions of the era In addition reactions elsewhere in Europe to the Spanish conflict are examined the role of the International Brigades is looked at afresh the fate of children displaced during the Civil War is explored and the Spanish anarcho syndicalist movement is revisited The volume shows that to be any kind of soldier in the armies of the Republic or even to be seen as a Republican sympathiser was to become a non person in the new order in Spain under Franco and sets what supporters of the Republic had to endure within the wider European and international context of the period This book offers timely fresh insights into the failure of the Spanish Republic and into a society that tried in vain to unite its divided people during what was a seismic era in Spain's history This book was originally published as a special issue of Bulletin of Spanish Studies
