Los Angeles Architecture Of Four Ecolog:

Los Angeles Reyner Banham, 2001 A pioneering architectural study of the seventy mile square city and the historical process which has made it unique as a human settlement Urban Design Ecologies Brian McGrath, 2013-01-14 The discipline of urban design is undergoing a rapid expansion and realignment It is experiencing a shift from a profession dominated by architects and planners directed at urban development to a more expansive set of practices engaging new forms of social and environmental ecologies as cities worldwide adapt to economic restructuring mass migrations and climate change Bringing together classic and new texts from the last 40 years this AD Reader focuses attention on the critical tools needed to understand how cities have been designed and constructed and then changed over time This enables new ways of envisioning how cities must be conceived and adapted in the future to the dual conditions of rapid urbanisation and economic restructuring coupled with unpredictable environmental conditions due to climate change With its emphasis on both urban design and the ecological this book brings together key articles that point the way forward for reconciling the often conflicting concerns of urbanism and environmentalism Twenty three texts are organised into four distinct sections covering metropolitan architecture the sprawling megalopolis the megacity and the recently emerging metacity These are broadly chronological and highlight the recent thinking behind some of the key urban developments ranging from the art of traditional city making covered by European architects and historians in the late 20th century to contemporary Tokyo described by Atelier Bow Wow Features original texts from Reyner Banham Rem Koolhaas Aldo Rossi Colin Rowe David Grahame Shane Bernard Tschumi Oswald Mathias Ungers and Robert Venturi Denise Scott Brown and Steven Izenour Contains newly commissioned texts from Mary Cadenasso Sharon Haar and Victoria Marshall Carlos Leite Steward TA Pickett and Albert Pope Includes new translations of important essays by Vittorio Gregotti and Paola Vigan Topics range from the European historic city to the Las Vegas Strip and the megacity of S o Paulo taking in the global sustainable city

Relational Architectural Ecologies Peg Rawes, 2013-08-22 Examining the complex social and material relationships between architecture and ecology which constitute modern cultures this collection responds to the need to extend architectural thinking about ecology beyond current design literatures This book shows how the habitats natural milieus places or shelters that construct architectural ecologies are composed of complex and dynamic material spatial social political economic and ecological concerns With contributions from a range of leading international experts and academics in architecture art anthropology philosophy feminist theory law medicine and political science this volume offers professionals and researchers engaged in the social and cultural biodiversity of built environments new interdisciplinary perspectives on the relational and architectural ecologies which are required for dealing with the complex issues of sustainable human habitation and environmental action The book provides 16 essays including two visual essays by leading international experts and academics from the UK US Australia New Zealand and Europe including Rosi Braidotti Lorraine Code Verena Andermatt

Conley and Elizabeth Grosz A clear structure divided into 5 parts addressing bio political ecologies and architectures uncertain anxious and damaged ecologies economics land and consumption biological and medical architectural ecologies relational ecological practices and architectures An exploration of the relations between human and political life An examination of issues such as climate change social and environmental well being land and consumption economically damaging global approaches to design community ecologies and future architectural practice City, Climate, and Architecture Sascha Roesler, 2022-06-21 The publication rethinks climate control a key concern of the discipline of architecture through the lens of city climate phenomena over the course of the 20th century Based on a history of climate control on urban scales it promotes the integration of indoors and outdoors in order to reduce environmental and thermal loads in cities Just as heating and cooling practices inside the buildings are affecting the urban climate outdoors urban heat islands are influencing the energy requirements and thermal conditions inside the buildings While the first part of the book focuses on the interwar period in Europe the publication's second part considers examples from all over the globe tracing the growing significance of ecological thinking for the design of urban environments **Formulations** Andrew Witt, 2022-01-11 An investigation of mathematics as it was drawn encoded imagined and interpreted by architects on the eve of digitization in the mid twentieth century In *Formulations* Andrew Witt examines the visual methodological and cultural intersections between architecture and mathematics The linkages Witt explores involve not the mystic transcendence of numbers invoked throughout architectural history but rather architecture's encounters with a range of calculational systems techniques that architects inventively retooled for design Witt offers a catalog of mid twentieth century practices of mathematical drawing and calculation in design that preceded and anticipated digitization as well as an account of the formal compendia that became a cultural currency shared between modern mathematicians and modern architects Witt presents a series of extensively illustrated biographies of method episodes that chart the myriad ways in which mathematics particularly the mathematical notion of modeling and drawing was spliced into the creative practice of design These include early drawing machines that mechanized curvature the incorporation of geometric maquettes theorems made flesh into the toolbox of design the virtualization of buildings and landscapes through surveyed triangulation and photogrammetry formal and functional topology stereoscopic drawing the economic implications of cubic matrices and a strange synthesis of the technological mineral and biological crystallographic design Trained in both architecture and mathematics Witt uses mathematics as a lens through which to understand the relationship between architecture and a much broader set of sciences and visual techniques Through an intercultural exchange with other disciplines he argues architecture adapted not only the shapes and surfaces of mathematics but also its values and epistemic ideals Urban Ecology and Intervention in the 21st Century Americas Allison M. Schifani, 2020-12-28 This book takes a hemispheric approach to contemporary urban intervention examining urban ecologies communication technologies and cultural practices in the twenty first century It

argues that governmental and social regimes of control and forms of political resistance converge in speculation on disaster and that this convergence has formed a vision of urban environments in the Americas in which forms of play and imaginations of catastrophe intersect in the vertical field Schifani explores a diverse range of resistant urban interventions imagining the city as on the verge of or enmeshed in catastrophe She also presents a model of ecocriticism that addresses aesthetic practices and forms of play in the urban environment Tracing the historical roots of such tactics as well as mapping their hopes for the future will help the reader to locate the impacts of climate change not only on the physical space of the city but also on the epistemological and aesthetic strategies that cities can help to engender This book will be of great interest to students and scholars of Urban Studies Media Studies American Studies Global Studies and the broad and interdisciplinary field of Environmental Humanities

Ecological Urbanism: The Nature of the City Susannah Hagan, 2014-09-15 Ecological Urbanism The Nature of the City asks the questions that are important inside and outside the built environment professions what are climate change urbanisation and ecology doing to the theory and practice of urban design How does Ecological Urbanism figure in this change What is Ecological Urbanism In answer this book is neither definitive impossible when a subject is still in motion nor encyclopaedic equally impossible when so much has been written on almost every aspect of these essays Instead it seeks to rebalance the ecological narrative and its embryonic modes of practice with the narratives of urbanism and its older deeply embedded modes of practice It examines the implications for cities and the designers of cities now we are required to again address their metabolic as well as social and formal dimensions and it explores the extent to which environmental engineering and natural systems design can and should become drivers for the remaking of cities in the 21st century Above all it argues that sooner rather than later urbanism needs to become environmentally literate and environmental design needs to become culturally literate

Ecology

of Fear Mike Davis, 2014-01-14 Rich with detail bold and original Mike Davis's *Ecology of Fear* is a gripping reconnaissance into the urban future an essential portrait of America at the millennium Los Angeles has become a magnet for the American apocalyptic imagination Riot fire flood earthquake only locusts are missing from the almost biblical list of disasters that have struck the city in the 1990s From Ventura to Laguna more than one million Southern Californians have been directly touched by disaster related death injury or damage to their homes and businesses Middle class apprehensions about angry underclasses are exceeded only by anxieties about blind thrust faults underlying downtown L A or about the firestorms that periodically incinerate Malibu And the force of real catastrophe has been redoubled by the obsessive fictional destruction of Los Angeles by aliens comets and twisters in scores of novels and films The former Land of Sunshine is now seen by much of the world including many of L A's increasingly nervous residents as a veritable Book of the Apocalypse theme park In this extraordinary book Mike Davis the author of *City of Quartz* and our most fascinating interpreter of the American metropolis unravels the secret political history of disaster real and imaginary in Southern California As he surveys the earthquakes of Santa Monica the burning of Koreatown the invasion of man eating mountain lions the movie *Volcano* and even Los Angeles's underrated tornado problem he exposes the deep complicity between social injustice and perceptions of natural disorder Arguing that paranoia about nature obscures the fact that Los Angeles has deliberately put itself in harm's way Davis reveals how market driven urbanization has for generations transgressed against environmental common sense And he shows that the floods fires and earthquakes reaped by the city were tragedies as avoidable and unnatural as the beating of Rodney King and the ensuing explosion in the streets

A Political Ecology of Women, Water and Global Environmental Change

Stephanie Buechler, Anne-Marie Hanson, 2015-03-02 This edited volume explores how a feminist political ecology framework can bring fresh insights to the study of rural and urban livelihoods dependent on vulnerable rivers lakes watersheds wetlands and coastal environments Bringing together political ecologists and feminist scholars from multiple disciplines the book develops solution oriented advances to theory policy and planning to tackle the complexity of these global environmental changes Using applied research on the contemporary management of groundwater springs rivers lakes watersheds and coastal wetlands in Central and South Asia Northern Central and Southern Africa and South and North America the authors draw on a variety of methodological perspectives and new theoretical approaches to demonstrate the importance of considering multiple layers of social difference as produced by and central to the effective governance and local management of water resources This unique collection employs a unifying feminist political ecology framework that emphasizes the ways that gender interacts with other social and geographical locations of water resource users In doing so the book further questions the normative gender discourses that underlie policies and practices surrounding rural and urban water management and climate change water pollution large scale development and dams water for crop and livestock production and processing resource knowledge and expertise and critical livelihood studies This book will be of interest to students and

Revealing the Natural Processes of the Los Angeles River Through Its Connections to the Surrounding Urban Environment Ying-Ling Sun,2000

Feminist Political Ecology Dianne Rocheleau,Barbara Thomas-Slayter,Esther Wangari,2013-04-15 Feminist Political Ecology explores the gendered relations of ecologies economies and politics in communities as diverse as the rubber tappers in the rainforests of Brazil to activist groups fighting racism in New York City Women are often at the centre of these struggles struggles which concern local knowledge everyday practice rights to resources sustainable development environmental quality and social justice The book bridges the gap between the academic and rural orientation of political ecology and the largely activist and urban focus of environmental justice movements

Overdrive Wim de Wit,Christopher James Alexander,2013 This is a fascinating and intelligently illustrated study of architectural innovation in Los Angeles From 1940 to 1990 Los Angeles rapidly evolved into one of the most populous and influential industrial economic and creative capitals in the world During this era the region was transformed into a laboratory for cutting edge architecture Overdrive examines these experiments and their impacts on modern design reframes the perceptions of Los Angeles dynamic built environment and amplifies the exploration of the city s vibrant architectural legacy The drawings models and images highlighted by Overdrive reveal the complex and often underappreciated facets of Los Angeles and illustrate how the metropolis became an internationally recognized destination with a unique design vocabulary canonical landmarks and a coveted lifestyle

Visualizing the City Alan Marcus,Dietrich Neumann,2024-11-01 This anthology presents a range of interdisciplinary explorations into the urban environment through film photography digital imagery maps and signage Contributors examine our fascination with the city through the history of art and architecture urban studies environmental studies cultural geography and screen studies Bringing together a wide spectrum of urban contexts Visualizing the City s diverse essays explore visual representations of urbanism and modernity reflected through the prism of global cultures using an engaging variety of methods and texts

Retrofitting Blade Runner Judith Kerman,1991 This book of essays looks at the multitude of texts and influences which converge in Ridley Scott s film Blade Runner especially the film s relationship to its source novel Philip K Dick s Do Androids Dream of Electric Sheep The film s implications as a thought experiment provide a starting point for important thinking about the moral issues implicit in a hypertechnological society Yet its importance in the history of science fiction and science fiction film rests equally on its mythically and psychologically resonant creation of compelling characters and an exciting story within a credible science fiction setting These essays consider political moral and technological issues raised by the film as well as literary filmic technical and aesthetic questions Contributors discuss the film s psychological and mythic patterns important political issues and the roots of the film in Paradise Lost Frankenstein detective fiction and previous science fiction cinema

Urban

Ecology Pedro Barbose, 2020-11-04 Today 55% of the world's human population lives in urban areas. By 2030 up to 90% of the global human population will live in cities and the global population is expected to increase by 68% by 2050. Although land cover categorized as urban is a relatively small fraction of the total surface of the Earth, urban areas are major driving forces in global environmental change. Habitat loss, threats to biodiversity, and the loss of terrestrial carbon stored in vegetation biomass. These and many other factors highlight the need to understand the broad-scale impacts of urban expansion as it affects the ecological interactions between humans, wildlife, and plant communities. The book stresses the importance of understanding ecological forces and ecosystem services in urban areas and the integration of ecological concepts in urban planning and design. The creation of urban green spaces is critical to the future of urban areas, enhancing human social organization, human health, and quality of life.

Lost Days, Endless Nights Andrew Witt, 2025-01-14 A critical study and artist's book on the history of photography and film from Los Angeles. *Lost Days, Endless Nights* tells a history from below: an account of the lives of the forgotten and dispossessed of Los Angeles: the unemployed, the precariously employed, the evicted, the alienated, the unhoused, the anxious, the exhausted. Through an analysis of abandoned archival works, experimental films, and other projects, Andrew Witt offers an expansive account of the artists who have lived or worked in Los Angeles, delving into the region's history and geography, highlighting its racial, gender, and class conflicts. Presented as a series of nine case studies, Witt explores how artists as diverse as Agnès Varda, Dana Lixenberg, Allan Sekula, Catherine Opie, John Divola, Gregory Halpern, Paul Sepuya, and Guadalupe Rosales have reimagined and reshaped our understanding of contemporary Los Angeles. The book features portraits of those who struggle and attempt to get by in the city: dock workers, students, bus riders, petty criminals, office workers, immigrants, queer and trans activists. Set against the landscape of economic turmoil and environmental crises that shadowed the 1970s, Witt highlights the urgent need for a historical perspective of cultural retrieval and counternarrative. Extending into the present, *Lost Days, Endless Nights* advocates for an approach that actively embraces the works and projects that have been overlooked and evicted from the historical imaginary.

The Routledge Handbook of Regional Design Michael Neuman, Wil Zonneveld, 2021-04-15 The Routledge Handbook of Regional Design explores contemporary research, policy, and practice that highlight critical aspects of strategy making, planning, and designing for contemporary regions, including city regions, bioregions, delta regions, and their hybrids. As accelerating urbanization and globalization combine with other forces such as the demand for increasing returns on investment, capital migration, and innovation, they yield cities that are expanding over ever larger territories. Moreover, these polycentric city regions themselves are agglomerating with one another to create new territorial mega-regions. The processes that beget these novel regional forms produce numerous and significant effects, positive and negative, that call for new modes of design and management so that the urban places and the lives and well-being of their inhabitants and businesses thrive sustainably into the future. With international case studies from leading scholars and practitioners, this book is an important resource, not just

for students researchers and practitioners of urban planning but also policy makers developers architects engineers and anyone interested in the broader issues of urbanism Driverless Urban Futures AnnaLisa Meyboom,2018-12-07 Since the industrial revolution innovations in transportation technology have continued to re shape the spatial organization and temporal occupation of the built environment Today autonomous vehicles AVs also referred to as self driving cars represent the next disruptive innovation in mobility with particularly profound impacts for cities At a moment of the fast paced development of AVs by auto making companies around the world policymakers planners and designers need to anticipate and address the many questions concerning the impacts of this new technology on urbanism and society at large Conceived as a speculative atlas a roadmap to unknown territories this book presents a series of drawings and text that unpack the potential impacts of AVs on scales ranging from the metropolis to the street The work is both grounded in a study of the history of urban transportation and current trajectories of technological innovation and informed by an open ended attitude of future envisioning and design Through the drawings and essays Driverless Urban Futures invites readers into a debate of how our future infrastructure could benefit all members of the public and levels of society An Emergence of a Riverine Ecology Ted Young Yoon,1992
