Lost Country Life:

Lost Country Life Dorothy Hartley, 1979 How English country folk lived worked threshed thatched rolled fleece milled corn brewed mead and carried on all the other tasks and trades of daily rural life Lost Long Island Richard Panchyk, 2024-01-08 From sprawling potato farms and incredibly lavish estates to whaling ships and early race cars Long Island has an incredibly rich history often lost through the generations In the world of racing Long Island was once the horse racing capital of the state and hosted the nation's first professional auto races Though farming still thrives in Suffolk County there are only a few working farms left in Nassau County where hundreds of farms dotted the landscape generations ago Cold Spring Harbor Greenport Sag Harbor and Southampton were centers of the whaling industry in America and maintain a whaling heritage today Author Richard Panchyk reveals fascinating narratives of Long Island's lost history **The British Country House Revival** Ben Cowell, 2024 British country houses have experienced a renaissance since the early 1970s A new accord is needed today recognising the increasingly contested contribution of country houses to British cultural life Fifty years ago the future for country houses in Britain looked bleak The Victoria Albert Museum's exhibition *The Destruction of the Country House* which opened in October 1974 charted the loss of over a thousand country houses in the preceding century The makers of the exhibition warned that history could be about to repeat itself because of the threats besetting mansion properties principally from higher taxation Houses faced the prospect of having to be stripped of their collections and sold for use as offices hotels or hospitals with their parks and gardens turned into golf clubs Government might afford to save just a handful of the most significant of these places working in tandem with charities such as the National Trust The rest would be consigned to history This book traces the history of country houses in Britain from the *Destruction* exhibition to the present day The wave of country house losses anticipated in 1974 never actually happened Instead over the next five decades Britain's country houses experienced a renaissance Fiscal rules changed in the mid 1970s to make it easier for owners to hold on to their assets Economic improvements in the 1980s and 1990s allowed many houses and estates to develop profitable commercial businesses All of this was achieved only after dedicated campaigning from heritage organisations in support of the country house cause The book argues that a new accord is needed today to recognise and value the ongoing if increasingly contested contribution of country houses to British life and culture in the twenty first century *The Morville Hours* Katherine Swift, 2011-05-01 Nobody writes about the garden like the English And few in England have ever been as eloquent or astute as Katherine Swift Some twenty years ago she and her husband leased a house in the town of Morville in Shropshire whose garden became her passion Driven to uncover its history she takes readers on a journey through time back to the forces that shaped the garden linking the stories of those who lived in the house and tended the same red soil with her family's own Spanning thousands of years *The Morville Hours* is also deeply personal a journey through the seasons but also one of self exploration of finding one's place in the world and putting down roots *The Morville*

This collection of original essays documents technology s centrality to the history of early America Unlike much previous scholarship this volume emphasizes the quotidian rather than the exceptional the farm household seeking to preserve food or acquire tools the surveyor balancing economic and technical considerations while laying out a turnpike the woman of child bearing age employing herbal contraceptives and the neighbors of a polluted urban stream debating issues of property odor and health These cases and others drawn from brewing mining farming and woodworking enable the authors to address recent historiographic concerns including the environmental aspects of technological change and the gendered nature of technical knowledge Brooke Hindle s classic 1966 essay on early American technology is also reprinted and his view of the field is reassessed A bibliographical essay and summary of Hindle s bibliographic findings conclude the volume The contributors are Judith A McGaw Robert C Post Susan E Klepp Michal McMahon Patrick W O Bannon Sarah F McMahon Donald C Jackson Robert B Gordon Carolyn C Cooper and Nina E Lerman **The Mother of All Arts** Gene

Logsdon,2007-07-20 When Gene Logsdon realized that he experienced the same creative joy from farming as he did from writing he suspected that agriculture itself was a form of art Thus began his search for the origins of the artistic impulse in the agrarian lifestyle The Mother of All Arts is the culmination of Logsdon s journey his account of friendships with farmers and artists driven by the urge to create He chronicles his long relationship with Wendell Berry and discovers the playful humor of several new agrarian writers He reveals insights gleaned from conversations with Andrew Wyeth and his family of artists Through his association with musicians such as Willie Nelson and his involvement with Farm Aid Logsdon learns how music blues jazz country and even rock n roll is also rooted in agriculture Logsdon sheds new light on the work of rural painters writers and musicians and suggests that their art could be created only by those who work intimately with the land Unlike the gritty realism or abstract expressionism often favored by contemporary critics agrarian art evokes familiar

feelings of community and comfort Most important Logsdon convincingly demonstrates that diminishing the connection between art and nature lessens the social and aesthetic value of both *The Mother of All Arts* explores these cultural connections and traces the development of a new agrarian culture that Logsdon believes will eventually replace the model brought about by the industrial revolution Humorous and introspective the book is neither conventional cultural criticism nor traditional art criticism It is a unique lively meditation on the nature and purpose of art and on the life well lived by one of the truly original voices of rural America *The Goodly Spellbook* Dixie Deerman, Steve Rasmussen, 2008-03 Presents a collection of ancient spells and incantations that have been adapted for modern times *Labor in a New Land* Stephen Innes, 2014-07-14 Stephen Innes studies the relationship between work land and community in seventeenth century Springfield Massachusetts Using analytical concepts drawn from anthropology dependence mediation and clientage he shows that the town was a highly commercialized developmental community contrasting sharply with the communal quietistic models that currently form our image of early New England Originally published in 1983 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **A Study Guide for Ken Follett's "World Without End"** Gale, Cengage Learning, 2016 A Study Guide for Ken Follett's *World Without End* excerpted from Gale's acclaimed *Literary Newsmakers for Students* This concise study guide includes plot summary character analysis author biography study questions historical context suggestions for further reading and much more For any literature project trust *Literary Newsmakers for Students* for all of your research needs **Circle of Stars** Anna Lee Waldo, 2002-11-18 Jack the B *How Ancient Europeans Saw the World* Peter S. Wells, 2012-08-26 A revolutionary approach to how we view Europe's prehistoric culture The peoples who inhabited Europe during the two millennia before the Roman conquests had established urban centers large scale production of goods such as pottery and iron tools a money economy and elaborate rituals and ceremonies Yet as Peter Wells argues here the visual world of these late prehistoric communities was profoundly different from those of ancient Rome's literate civilization and today's industrialized societies Drawing on startling new research in neuroscience and cognitive psychology Wells reconstructs how the peoples of pre-Roman Europe saw the world and their place in it He sheds new light on how they communicated their thoughts feelings and visual perceptions through the everyday tools they shaped the pottery and metal ornaments they decorated and the arrangements of objects they made in their ritual places and how these forms and patterns in turn shaped their experience *How Ancient Europeans Saw the World* offers a completely new approach to the study of Bronze Age and Iron Age Europe and represents a major challenge to existing views about prehistoric cultures The book demonstrates why we cannot

interpret the structures that Europe's pre Roman inhabitants built in the landscape the ways they arranged their settlements and burial sites or the complex patterning of their art on the basis of what these things look like to us Rather we must view these objects and visual patterns as they were meant to be seen by the ancient peoples who fashioned them
