The Conservationist ,1973 **The World is Blue** Sylvia A. Earle,2009 A Silent Spring for our era this eloquent urgent
fascinating book reveals how just 50 years of swift and dangerous oceanic change threatens the very existence of life on
Earth Legendary marine scientist Sylvia Earle portrays a planet teetering on the brink of irreversible environmental crisis In
recent decades we ve learned more about the ocean than in all previous human history combined But even as our knowledge
has exploded so too has our power to upset the delicate balance of this complex organism Modern overexploitation has
driven many species to the verge of extinction from tiny but indispensable biota to magnificent creatures like tuna swordfish
and great whales Since the mid 20th century about half our coral reefs have died or suffered sharp decline hundreds of
oxygen deprived dead zones blight our coastal waters and toxic pollutants afflict every level of the food chain Fortunately
there is reason for hope but what we do or fail to do in the next ten years may well resonate for the next ten thousand The
ultimate goal Earle argues passionately and persuasively is to find responsible renewable strategies that safeguard the
natural systems that sustain us The first step is to understand and act upon the wise message of this accessible insightful and
