determined the intellectual activity of the Italians the third to exhibit the bias of this people toward figurative art and briefly to touch upon its various manifestations in order that finally a correct point of view might be obtained for judging of their national literature in its strength and limitations Literature must always prove the surest guide to the investigator of a people's character at some decisive epoch To literature therefore I felt that the plan of my book allowed me to devote two volumes The subject of my inquiry rendered the method I have described not only natural but necessary Yet there are special disadvantages to which progressive history is not liable in publishing a book of this sort by installments Readers of the earlier parts cannot form a just conception of the scope and object of the whole They cannot perceive the relation of its several sections to each other or give the author credit for his exercise of judgment in the marshaling and development of topics They criticise each portion independently and desire a comprehensiveness in parts which would have been injurious to the total scheme Furthermore this kind of book sorely needs an Index and its plan renders a general Index such as will be found at the end of the last volume more valuable than one made separately for each part
