**70 Sugar Free Wholesome Low Carb Recipes** Anthony Primitivo,2021-01-28 How to Remove Sugar from Your Diet Start Reading Nutritional Information on Labels The American Heart Association recommends that women limit added sugars to 25 grams approximately 6 teaspoons per day and men to 37 5 grams approximately 9 teaspoons per day Research also shows that people in Western countries eat an average of 35 teaspoons of sugar a day It s because it s hidden in almost all the food we buy from the supermarket not just the sugar bowl In our diet we need to take a sensible approach to sugars It is not possible to see the added sugars in the teaspoons on the packaging during production but the Nutrition Facts Label can help us identify the added sugars The finding of ingredients such as sugar corn syrup dextrose and honey although honey is at least natural near the top of the list of ingredients should indicate that there is a high amount of added sugar in the product Artificial sweeteners are not a healthy long term solution for the removal of sugar due to possible adverse health effects Stevia and Agave appear to be popular natural plant sweeteners right now Agave however is very high in fructose But heck at the end of the day I d rather eat small amounts of honey maple syrup or stevia to my natural food in moderation as a food supermarket buys cookies and health bars Some common sense needs to come into play Moderation is essential to this Don t forget homemade pancakes slices and other dishes may be modified by reducing sugar and combining sugar with prunes maple syrup or dates for example So if you have time it s easier to prepare your own meal so you know what s going on Your meals will be free of all the artificial carbohydrates ingredients and preservatives Check the Food label facts for Total Carbohydrates as well as Sugars Carbohydrates are the primary source of calories for the body Carbohydrates usually fall into two categories carbohydrates and starches Sugar is a basic carbohydrate and starches which are complicated carbohydrates are broken down into blood sugar often known as glucose Eating so much carbs may rapidly raise blood sugar levels which can cause complications over time Monitoring and regulation of carbohydrate consumption is essential to managing blood sugar Foods
