The Low Countries in Early Modern Times Herbert Harvey Rowen,1972 **Low Countries in Early Modern Times** Herbert H. Rowen,1972-06-18 **The Dynamic Society** Graeme Snooks,2002-09-11 This book discusses the nature and process of change in human society over the past two million years The author draws on economic historical and biological concepts to examine the driving forces of change and looks to likely developments in the future This analysis produces some very thought provoking and controversial conclusions **The Low Countries in the Early Modern World** Herman van der Wee,1993-01-01 These studies display the close familiarity with documentary sources careful use of quantitative evidence and rigorous formulation of economic and social relationships which are the hallmark of the historian s work The detailed methodological discussions of the key relationships between agricultural and industrial production and consumption also provide a model for cognate work in this field As such the book will be essential reading for all historians of Early Modern Europe as well as appealing to those with a particular interest in the economic and social background of the Dutch Revolt **BOOK JACKET** *Parish Churches in the Early Modern World* Andrew Spicer,2016-12-05 Across Europe the parish church has stood for centuries at the centre of local communities it was the focal point of its religious life the rituals performed there marked the stages of life from the cradle to the grave Nonetheless the church itself artistically and architecturally stood apart from the parish community It was often the largest and only stone built building in a village it was legally distinct being subject to canon law as well as consecrated for the celebration of religious rites The buildings associated with the cure of souls were sacred sites or holy places where humanity interacted with the divine In spite of the importance of the parish church these buildings have generally not received the same attention from historians as non parochial places of worship This collection of essays redresses this balance and reflects on the parish church across a number of confessions Catholic Lutheran Reformed and Anti Trinitarian during the early modern period Rather than providing a series of case studies of individual buildings each essay looks at the evolution of parish churches in response to religious reform as well as confessional change and upheaval They examine aspects of their design and construction furnishings and material culture liturgy and the use of the parish church While these essays range widely across Europe the volume also considers how religious provision and the parish church were translated into a global context with colonial and commercial expansion in the Americas and Asia This interdisciplinary volume seeks to identify what was distinctive about the parish church for the congregations that gathered in them for worship and for communities across the early modern world *Anglo-Dutch Connections in the Early Modern World* Sjoerd Levelt,Esther van Raamsdonk,Michael D. Rose,2023-02-10 This ground breaking collection reveals the networks of interrelation between Early Modern England and the Dutch Republic As people ideas and goods moved back and forth across the North Sea or spread further afield in the vanguard of globalisation and empire Anglo Dutch relations shaped all aspects of life with profound implications still relevant today A

diverse range of expert scholars share new research in their discipline ranging across technology trade politics religion and the arts Different aspects of this history of competition alliance migration and conflict are taken up by each chapter providing the reader with detailed case studies as well as the broader background and its historical roots *Anglo Dutch Connections in the Early Modern World* aims to be both accessible and innovative It will be essential to students and researchers interested in European politics intellectual history and shared Anglo Dutch society while showcasing current research in multiple facets of the Early Modern World

Nostalgia in the Early Modern World Harriet Lyon,Alexandra Walsham,2023 How can the concept of nostalgia illuminate the culturally specific ways in which societies understand the contested relationship between the past present and future The word nostalgia was invented in the late seventeenth century to describe the debilitating effects of homesickness Now widely defined as a sense of longing for a lost past initially it was more closely linked with dislocation in space By exploring some of its many textual visual and musical manifestations in the tumultuous period between c 1350 and 1800 this volume resists the assumption that nostalgia is a distinctive by product of modernity It also forges a fruitful link between three lively areas of current scholarly enquiry memory temporality and emotion The contributors deploy nostalgia as a tool for investigating perceptions of the passage of time and historical change unsettling experiences of migration and geographical displacement and the connections between remembering and forgetting affect and imagination Ranging across Europe and the Atlantic world they examine the moments sites and communities in which it arose alongside how it was used to express both criticism and regret about the religious political social and cultural upheavals that shaped the early modern world They approach it as a complex mixed feeling that opens a new window into individual subjectivities and collective mentalities

Merchant Networks in the Early Modern World, 1450-1800

Sanjay Subrahmanyam,2016-12-05 Merchant organisation was a global phenomenon in the early modern era and in the growing contacts between peoples and cultures merchants may be seen as privileged intermediaries This collection is unique in essaying a truly global coverage of mercantile activities from the Wangara of the Central Sudan Mississippi and Huron Indians to the role of the Jews the Muslim merchants of Anatolia to the social structure of the mercantile classes in early modern England The histories of merchant communities are not their histories alone but also the histories of assumptions concerning their contexts From the comparative perspective adopted here it emerges that in markets where Western European merchants vied for place with competitors from the Near East South Asia or East Asia they were very often unsuccessful

Governing the Environment in the Early Modern World Sara Miglietti,John Morgan,2017-03-27 Throughout the early modern period scientific debate and governmental action became increasingly preoccupied with the environment generating discussion across Europe and the wider world as to how to improve land and climate for human benefit This discourse eventually promoted the reconsideration of long held beliefs about the role of climate in upholding the social order driving economies and affecting public health Governing the Environment in the Early Modern World explores the relationship between cultural perceptions of the environment and practical attempts at

Language Dynamics in the Early Modern Period Karen Bennett, Angelo Cattaneo, 2022-04-25 In the fifteenth and sixteenth centuries the linguistic situation in Europe was one of remarkable fluidity Latin the great scholarly lingua franca of the medieval period was beginning to crack as the tectonic plates shifted beneath it but the vernaculars had not yet crystallized into the national languages that they would later become and multilingualism was rife Meanwhile elsewhere in the world languages were coming into contact with an intensity that they had never had before influencing each other and throwing up all manner of hybrids and pidgins as peoples tried to communicate using the semiotic resources they had available Of interest to linguists literary scholars and historians amongst others this interdisciplinary volume explores the linguistic dynamics operating in Europe and beyond in the crucial centuries between 1400 and 1800 Assuming a state of individual societal and functional multilingualism when codeswitching was the norm and languages themselves were fluid unbounded and porous it explores the shifting relationships that existed between various tongues in different geographical contexts as well as some of the myths and theories that arose to make sense of them

How Europe Made the Modern World Jonathan Daly, 2019-10-03 One thousand years ago a traveler to Baghdad or the Chinese capital Kaifeng would have discovered a vast and flourishing city of broad streets spacious gardens and sophisticated urban amenities meanwhile Paris Rome and London were cramped and unhygienic collections of villages and Europe was a backwater How then did it rise to world preeminence over the next several centuries This is the central historical conundrum of modern times How Europe Made the Modern World draws upon the latest scholarship dealing with the various aspects of the West's divergence including geography demography technology culture institutions science and economics It avoids the twin dangers of Eurocentrism and anti Westernism strongly emphasizing the contributions of other cultures of the world to the West's rise while rejecting the claim that there was nothing distinctive about Europe in the premodern period Daly provides a concise summary of the debate from both sides whilst also presenting his own provocative arguments Drawing on a wide range of primary and secondary sources and including maps and images to illuminate key evidence this book will inspire students to think critically and engage in debates rather than accepting a single narrative of the rise of the West It is an ideal primer for students studying Western Civilization and World History courses

Migration, Trade, and Slavery in an Expanding World Wim Klooster, 2009 The twelve essays explore three connected aspects of

European expansion in the period between 1500 and 1900 migration trade and slavery with some attention given to present day echoes from that era The book s first section deals with European migration to transatlantic and Asian destinations the second and third sections focus on the Atlantic slave trade and representations of slavery and the final section analyzes the demise and legacy of slavery The authors reach surprising conclusions European expansion did not entail major economic benefits the small scale of the Europeans intercontinental migration never jeopardized their colonial projects and the unique popular nature of British abolitionism can be explained in part by the growth of the newspaper press in the mid eighteenth century which regularly reported about slave ship revolts

The Limits of Empire: European Imperial Formations in Early Modern World History William Reger,2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most important themes of Parker s work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we re proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

confessional structures began to work their way among the populace **The Invisible Hand?** Bas van Bavel, 2019-04-29

The Invisible Hand offers a radical departure from the conventional wisdom of economists and economic historians by showing that factor markets and the economies dominated by them the market economies are not modern but have existed at various times in the past They rise stagnate and decline and consist of very different combinations of institutions embedded in very different societies These market economies create flexibility and high mobility in the exchange of land labour and capital and initially they generate economic growth although they also build on existing social structures as well as existing exchange and allocation systems The dynamism that results from the rise of factor markets leads to the rise of new market elites who accumulate land and capital and use wage labour extensively to make their wealth profitable In the long term this creates social polarization and a decline of average welfare As these new elites gradually translate their economic wealth into political leverage it also creates institutional sclerosis and finally makes these markets stagnate or decline again This process is analysed across the three major pre industrial examples of successful market economies in western Eurasia Iraq in the early Middle Ages Italy in the high Middle Ages and the Low Countries in the late Middle Ages and the early modern period and then parallels drawn to England and the United States in the modern period These areas successively saw a rapid rise of factor markets and the associated dynamism followed by stagnation which enables an in depth investigation of the causes and results of this process **A Cultural History of Genocide in the Early Modern World** Igor Pérez Tostado, 2023-05-04 Historical studies of genocide in the 20th century trace the roots back to the sociopolitical economic and cultural developments of the early modern period From globalization to urbanization to imperialism state formation and homogenization from religious warfare to enlightenment to racism many factors connected with genocide first emerged or vastly developed between the 15th and 18th centuries While the early modern period did not have a crime of genocide it possessed its own legal system which contemplated the rightful destruction of whole peoples and a political culture that sanctioned the use of mass violence As a result early modern genocide has been denied or blurred as a regrettable side effect of the global circulation of ideas goods and peoples and the creation of new societies cultures and languages arising from it This collection looks at the different genocides which unfolded around the globe emphasizing its gendered dimension and its disproportionate and enduring impact on indigenous populations Although European imperialism and homogenization play a central role it aims more widely to cover the principal agents victims and rationale for genocide in the early modern world As a whole this volume aims at fostering the debate on the early modern history of genocide not as an insulated or secondary subject but as a central issue of the era with profound implications for our own *Peace and Authority During the French Religious Wars c.1560-1600* P. Roberts, 2013-05-29 Through a wide ranging and close analysis of archival sources this book re evaluates both the role of royal authority and of local agency in the French religious wars in the lead up to the Edict of Nantes of 1598 Drawing on extensive research it provides a new perspective on the political religious social and cultural
