Lower Moments In Higher Education:

Lower Moments in Higher Education Otto Frank Bauer, 1997-07-01 **Working-Class Minority Students' Routes to Higher Education** Roberta Espinoza, 2012-10-02 While stories of working class and minority students overcoming obstacles to attend and graduate from college tend to emphasize the individualistic and meritocratic aspect this book based in extensive empirical study of American high school classrooms and in theories of social and cultural capital examines the social relations that often underpin such successes highlighting the significant formal and informal academic interventions by educators and other education professionals *Recognizing and Serving Low-Income Students in Higher Education* Adrianna Kezar, 2010-09-13 Written for administrators faculty and staff in Higher Education who are working with low income and first generation college students *Recognizing and Serving Low Income Students in Higher Education* uncovers organizational biases that prevent post secondary institutions from adequately serving these students This volume offers practical guidance for adopting new or revised policies and practices that have the potential to help these students thrive This contributed volume is based on empirical studies that specifically examine the policies and practices of postsecondary institutions in the United States England and Canada The contributing authors argue that discussions of diversity will be enriched by a better understanding of how institutional policies and practices affect low income students Unlike most studies on this topic this volume focuses on institutional rather than federal state and public policy Institutional policies and practices have been largely ignored and this volume lifts the veil on processes that have remained hidden *Students, Staff and Academic Mobility in Higher Education* Mike Byram, 2009-03-26 Academic mobility in higher education is an old phenomenon but it has become a high profile issue as the numbers of students and staff engaged and the number of countries involved has increased hugely in the last few decades For this reason and many others political cultural and educational this book reports research on the many facets of the experience and people involved both now and in the past The emphasis in research has so far tended to focus on contemporary student mobility but this collection deliberately includes articles on mobile staff because the question of mobility is a matter for universities and higher education in its entirety and not just a matter of bringing new students into existing and unchanging lectures laboratories and seminars Despite the fact that universities are and have been international institutions in their composition from the beginning universities became in the 19th and 20th century de facto national institutions This has changed and continues to change in the 21st century for many reasons but often financial as universities seek to enhance their budgets in a globalised economy and students seek to enhance their employment chances by acquiring qualifications with a difference However even if the starting point is financial nonetheless the chapters in this book demonstrate that the effects of mobility are much more far reaching The effects are on host universities on the university community of staff and students on the ways in which staff and students understand the nature of university study on the ways students may or may not integrate with a local community By

experiencing something different for institutions an influx of students with different ideas about academic study for students an interaction with locals and with other internationals for staff a challenge to their assumptions about teaching and learning all see themselves in a new light and are often forced to change This book charts the changes which are happening now and will undoubtedly continue for the foreseeable future It therefore offers all involved a reflection on their own experience and practice and the means of improving them

Decline and Revival in Higher Education Herbert I. London, 2018-02-06 This is an analysis of higher education in the past half century a period of dramatic change and democratization But it is more than that The author has been a participant in the struggle to stem the decline in higher education as it moved from an emphasis on classical liberal values toward relativism and ideological extremism This volume reflects an awareness of what has been lost but sees hope for a revival of traditional values as technological change and awareness of failure forces institutions to examine their premise Herbert I London has provided here fuel for fundamental redirection in American college and university affairs *Decline and Revival in Higher Education* is uncompromising in its concerns but points the way toward a future linked to the best of the past The work follows the personal evolution of the author while at the same time describes the devolution of university standards in such institutions as Columbia Duke the University of California at Berkeley and New York University While seeing optimistic trends in oases of traditional programming that can serve as a counterweight to campus orthodoxies London argues that the

dramatic transformation of the academy cannot be denied The social sciences and humanities in particular have become isolated from mainstream requirements in the nation London deals with concrete concerns such as the collapse of classic book programs in the contemporary curriculum the decline and even vigilante raids on opposition in campus publications the collapse of moral judgment in favor of pure relativism the transformation of many museums into a storage houses of debris and the confusion of coarse language with democratization These developments lead the author to write this book for if the culture wars are over the American people may be the losers
