Lowland Iron Age Communities In Europe:

Lowland Iron Age Communities in Europe Barry W. Cunliffe, T. Rowley, 1978 Lowland Iron Age Communities in Europe Barry W. Cunliffe, 1978 *Iron Age Communities in Britain* Barry Cunliffe, 2004-08-02 This fully revised fourth edition maintains the qualities of the earlier editions whilst taking into account the significant developments that have moulded the discipline in recent years *The Oxford Handbook of the European Iron Age* Colin Haselgrove, Katharina Rebay-Salisbury, Peter S. Wells, 2023 The Oxford Handbook of the European Iron Age presents to students scholars and interested general readers a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods The Iron Age in Northern Britain Dennis W. Harding, 2004-08-26 The Iron Age in Northern Britain examines the impact of the Roman expansion northwards and the native response to the Roman occupation on both sides of the frontiers It traces the emergence of historically recorded communities in the post Roman period and looks at the clash of cultures between Celts and Romans Picts and Scots Northern Britain has too often been seen as peripheral to a core located in south eastern England Unlike the Iron Age in southern Britain the story of which can be conveniently terminated with the Roman conquest the Iron Age in northern Britain has no such horizon to mark its end The Roman presence in southern and eastern Scotland was militarily intermittent and left untouched large tracts of Atlantic Scotland for which there is a rich legacy of Iron Age settlement continuing from the mid first millennium BC to the period of Norse settlement in the late first millennium AD Here D W Harding shows that northern Britain was not peripheral in the Iron Age it simply belonged to an Atlantic European mainstream different from southern England and its immediate continental neighbours

provides that elementary and comprehensive synthesis of the new discoveries and the new interpretations of European prehistory After an introductory chapter on the geographical setting and the development of prehistoric studies in Europe the text is divided chronologically into nine chapters Each one describes with numerous maps plans and drawings the relevant archaeological data and proceeds to a discussion of the societies they represent Particular attention is paid to the major themes of recent prehistoric research especially subsistence economy trade settlement technology and social organization
