Hiring and Firing Public Officials Justin Buchler, 2011-04-20 Conventional theories of elections hold that an election is analogous to a consumer product market According to the market paradigm voters are consumers candidates are competing firms and an election is a market in which voters exchange votes for policy by voting for the candidates whose policies they prefer According to this logic a healthy democracy requires frequent competitive elections The market analogy underlies decades of electoral theory but in *Hiring and Firing Public Officials* Justin Buchler contends that it does not capture the real nature of elections In fact our widespread dissatisfaction with the current state of electoral politics derives from a fundamental misunderstanding of what elections are and what purpose they serve As Justin Buchler shows an election is a mechanism by which voters hire and fire public officials It is not a consumer product market it is a single employment decision Thus the health of democracy depends not on regular competitive elections but on posing a credible threat to fire public officials who do not perform their jobs well However the purpose of that threat is to force public officials to act as faithful public servants so that they do not have to be fired Thus

competitive elections by most definitions are indicative of a failure of the democratic system

The Nationalization of American Political Parties, 1880-1896 Daniel Klinghard, 2010-04-19 This book investigates the creation of the first truly nationalized party organizations in the United States in the late nineteenth century an innovation that reversed the parties traditional privileging of state and local interests in nominating campaigns and the conduct of national campaigns Between 1880 and 1896 party elites crafted a defense of these national organizations that charted the theoretical parameters of American party development into the twentieth century With empowered national committees and a new understanding of the parties role in the political system national party leaders dominated American politics in new ways renewed the parties legitimacy in an increasingly pluralistic and nationalized political environment and thus maintained their relevance throughout the twentieth century The new organizations particularly served the interests of presidents and presidential candidates and the little studied presidencies of the late nineteenth century demonstrate the first stirrings of modern presidential party leadership

Working-class Mobilization and Political Control Charles L. Davis, 1989-01-01 Historically Latin American political regimes have sought to postpone far reaching economic reforms and improvements in living standards in order to facilitate the accumulation of private capital These goals have led to exclusion of the lower classes from the political process altogether or to efforts to control their political mobilization The ability of governments to maintain such control has often been attributed to the lack of political sophistication by the working class or to the distribution of benefits through patron client networks designed to preserve the hegemony of ruling parti
