Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions Other contributors however pose broader questions about the nature of selective admissions about institutional responses to the changing demography of those seeking to enter higher education or about the appropriate criteria of success in higher education The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger President at Michigan at the time the court cases were filed is particularly relevant This book brings together the research that underlies a variety of proposed approaches to improving the selection of students Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body this book explores the implications of the assessment component of K 12 school reform for higher education admissions practices The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools as well as for those scholars and scientists who research develop and validate tools for use in the process of choosing students in ways that are congruent with an institution's mission values and goals **Stakeholders in the Law School** Fiona Cownie, 2010-01-28 This collection brings together a distinguished group of researchers to examine the power relations which are played out in university law schools as a result of the different pressures exerted upon them by a range of different stakeholders From students to governments from lawyers to universities a host of institutions and actors

believe that law schools should take account of a vast number of often conflicting considerations when teaching their students designing curricula carrying out research and so on How do law schools deal with these pressures What should their response be to the stakeholders who urge them to follow agendas emanating from outside the law school itself To what extent should some of these agendas play a greater role in the thinking of law schools     Adult Learning Disorders Lorraine E. Wolf, Hope E. Schreiber, Jeanette Wasserstein, 2010-10-18 Recent advances in neuroimaging and genetics technologies have enhanced our understanding of neurodevelopmental disorders in adults The authors in this volume not only discuss such advances as they apply to adults with learning disorders but also address their translation into clinical practice One cluster of chapters addresses developmental concerns as children and adolescents with learning disorders approach young adulthood Experts discuss dyslexia language based and writing disorders perhaps the most widely studied group of learning disorders from the point of view of neuroimaging and genetic underpinnings Chapters on the neuroscience of nonverbal math and executive function disorders are also included Clinically oriented chapters with case studies recommendations for accommodation and considerations for evaluation follow Study of specialized populations such as late high school students college medical and law students further demonstrate how our expanded knowledge base may be applicable to clinical practice The heterogeneity of adults with learning disorders the complexity of their clinical presentation and co existing disorders are addressed from both a scientific and clinical point of view demonstrating how empirical research and clinical practice inform each other This volume will enhance the practice of clinicians and educators working with adults with neurodevelopmental disorders as well as providing essential current information for researchers of adults with learning disorders     **Florida State University Law Review** Florida State University. Salomone, 2008-10-01 Although coeducation has been the norm within private and public schools since the 1970s single sex education has staged a comeback in recent years as a means of addressing the academic and social problems faced by some students Single sex education raises controversy on ideological grounds and in 1996 the Supreme Court struck down the all male admissions policy at the Virginia Military Institute in a decision that has cast a legal cloud over public initiatives In this timely book Rosemary Salomone offers a reasoned educational and legal argument supporting single sex education as an alternative to coeducation particularly in the case of disadvantaged minority students Salomone examines the history of women's education and exclusion philosophical and psychological theories of sameness and difference findings on educational achievement and performance the research evidence on single sex schooling and the legal questions that have arisen Correcting many of the current misconceptions about single sex education she argues that it is a viable option and that the road to gender equality should be paved with diverse educational opportunities for all students regardless of race class or gender

**The Psychological Foundations of Evidence Law** Michael J Saks,Barbara A Spellman,2016-01-22 Identifies and evaluates the psychological choices implicit in the rules of evidence Evidence law is meant to facilitate trials that are fair accurate and efficient and that encourage and protect important societal values and relationships In pursuit of these often conflicting goals common law judges and modern drafting committees have had to perform as amateur applied psychologists Their task has required them to employ what they think they know about the ability and motivations of witnesses to perceive store and retrieve information about the effects of

the litigation process on testimony and other evidence and about our capacity to comprehend and evaluate evidence. These are the same phenomena that cognitive and social psychologists systematically study. The rules of evidence have evolved to restrain lawyers from using the most robust weapons of influence and to direct judges to exclude certain categories of information, limit it, or instruct juries on how to think about it. Evidence law regulates the form of questions lawyers may ask, filters expert testimony, requires witnesses to take oaths, and aims to give lawyers and factfinders the tools they need to assess witnesses' reliability. But without a thorough grounding in psychology is the common sense of the rulemakers as they create these rules always or even usually correct? And when it is not, how can the rules be fixed? Addressed to those in both law and psychology, *The Psychological Foundations of Evidence Law* draws on the best current psychological research based on knowledge to identify and evaluate the choices implicit in the rules of evidence and to suggest alternatives that psychology reveals as better for accomplishing the law's goals.
