most difficult eras in geological history for a uniformitarian scientist one who believes the earth evolved by slow processes over millions of years to explain simply because long ages of evolution cannot explain it Provided here are plausible explanations of the seemingly unsolvable mysterious about the Ice Age and the woolly mammoths Frozen in Time *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1990 *The Leakeys* Mary Bowman-Kruhm,2005-08-30 Three generations of Leakeys have dug in East Africa for fossil evidence that answers questions about human origins Louis and Mary husband and wife began what would turn into decades of research and fieldwork often disproving common theories and beliefs of the time Son Richard followed in his parents foot steps along with his wife Meave and made spectacular finds as well Today Louise the oldest daughter of Richard and Meave continues the family tradition with fieldwork in northern Kenya The Leakey family s achievements have had an enormous impact on our knowledge of human origins and evolution This biography describes their life in detail including their discoveries publications controversies and legacy A timeline glossary and bibliography of print and electronic sources supplement the material **American Families and the Future** Roma S Hanks,Marvin B Sussman,Barbara H Settles,2015-12-22 As the world heads into the twenty first century individuals and their families are being confronted with a more diverse array of possible life experiences than has ever existed before Changes in longevity marriage fertility employment and many other areas have created new opportunities for individual and family choice and variability in life course experiences *American Families and the Future* discusses a variety of issues that face and will continue to families in coming years and describes various strategies families can use in their decisionmaking processes This enlightening book is divided into five main sections Demographic Issues Social and Economic Issues Technological Issues Family Process in Shaping the Future and Family Vision in Creating the Future Individual chapters view family problem solving from a variety of perspectives and disciplines *American Families and the Future* describes recent demographic trends and considers their implications for how individuals and their families plan and prepare for their later adult life reviews health care issues and concerns for the elderly and addresses strategies for self health promotion and illness prevention provides examples illustrating the uses and abuses of data to promote partisan views and agendas outlines a conceptual framework that can be uses to understand problem solving and decisionmaking by individuals and family groups presents a model that explores family decisionmaking focusing on the conditions under which decisions are made presents findings from a study of early adolescents perceptions of their role in family decisionmakingThe book closes with an upbeat discussion of possible solutions to current pathologies affecting human societies and cultures Professionals who work with families will find this book an enlightening and encouraging guide for helping families cope with the myriad issues and choices they face in planning for their futures **Fossils** Gary Raham,2009 An introduction to the history and current thinking on fossils *The Origin of Humanness in the Biology of Love* Humberto Maturana Romesín,Gerda

*Just Like a Woman* Dianne Hales, 2000-06-06 In recent years researchers in many scientific fields have actively focused on what being female really means Their startling conclusion Almost every assumption made about women physical medical historical psychological turns out to be untested unproven or untrue Stereotypes about women are as old as time and as current as still too prevalent beliefs based on male models Acclaimed health writer Dianne Hales brings together the cutting edge research in anthropology physiology psychology neuroscience endocrinology and medicine in a book that reveals the complex interconnections between all aspects of a woman s life from infancy to old age Gender science is now clearly demonstrating that women are not the second sex but a separate sex unique in body mind and spirit *Just Like a Woman* explains what it means to live in a woman s body think with a woman s brain drink in the world with a woman s senses and react with a woman s sensibility to the stresses and elations of

her multiple roles Refreshingly free of ideology this meticulously documented book offers a stunningly liberating message that expands our concept of human potential and will forever change the way every woman views herself *The Scientific Case Against Scientific Creationism* Jon P. Alston,2003-09 Sociologist Jon P Alston offers a unique and clear analysis of the weaknesses of scientific creationism and intelligent design by identifying what creationists say when they reject evidence for evolution He demonstrates how scientific creationists accept non scientific statements that contradict established scientific knowledge Acceptance of anti evolutionary knowledge also demands acceptance of a literal six day creation and other statements contradicting scientific findings Few persons have read so closely the writings of scientific creationists to illustrate how anti scientific anti evolutionists become when they criticize the fact of evolution Creationists are forced to develop just so stories to defend their literal interpretations of Biblical scripture Alston finds creationists cannot defend their religious beliefs using established scientific methodologies and principles **God-creature-revelation** Jerry D.

Korsmeyer,1995 Educated Western Christians seek to understand the scientific basis of evolution as well as to justify why a God worth worshiping can be responsible yet not indictable for evil The author creates an innovative theological framework that addresses these concerns and provides part of a structure for fundamental theology which is based on the neoclassical metaphysics of Charles Hartshorne and the speculative cosmology of Alfred North Whitehead His model of the divine has three basic principles God is love God is the creator and this creativity is an integral part of divine essence From this model he develops a fundamental theology which focuses on the nature of divinity the interaction between human and the divine and divine revelation He attributes much of his own concept of revelation to Whitehead s model in which revelation is indicative of a successful communion between human and divine This revelation is achieved through symbolic mediation and it is as much inter personal reconciliation as it is a universal resonance of the creative essence between heaven and earth This framework shows initial agreement with Christian traditions it is highly coherent universal in scope and most importantly it has rich potential for future Christian understanding C.S. Quantitative Methods in Biological and Medical Sciences H.O. Lancaster, 2012-12-06 My original intention was to write a history of medical statistics used in its prewar sense expanding the writings on the subject by Major Greenwood from which I formed many of my ideas in the early days

immediately after the Second World War In later years I decided that the scope of his works was narrower than what I think is appropriate now for he was writing in an era before the acceptance and use of the Fisherian methods and he was probably not aware of the mathematization of many parts of biological theory Further the boundary between the medical and biological sciences has largely disappeared Many texts have now been written on branches of the theory and practice inspired by R A Fisher see 4 13 I discuss the history of the use of quantitative methods in the biological sciences defined after the style of Peller 1967 as that branch of science that uses a quantitative approach to or quantitative logical reasoning on or biology The mathematical techniques any issue having to do with medicine are various and not classified here Within the book I use biological sciences to include medicine but use the longer phrase in its title to avoid misunderstandings as to content Moreover most of the experimental work carried out in medical research laboratories is performed on animals other than man
