## **Ludlow In The 1960s:**

**Ludlow in the 1960s** David Trumper, 2004-04-15 Ludlow is a fine old town with over 900 years of history We can still see much of its historic character today in the magnificent castle and church and in the wide variety of architecture of its beautiful buildings This book looks at the town as it was at the beginning of the 1960s 1955-1960 United States. National Labor Relations Board, 1985 *New Zealand, Britain, and European Integration Since 1960* Hamish McDougall, 2023-12-26 This book explores how New Zealand a small country almost as far from Western Europe as it is possible to be assumed political importance in Britain's accession to the European Community vastly out of proportion to its size proximity and strategic position At several points in accession negotiations the issue of New Zealand's continued trade with Britain threatened to derail UK Government attempts to join the Community This issue also interacted with the broader context of the Cold War economic shocks and decolonisation materially affecting the terms of entry into the European Community and altering Britain's relations with its European partners and the British public's perceptions of British membership After entry New Zealand continued to resurface as a continued source of tension between Britain and an integrating Europe The role that New Zealand played sheds light on Britain's attempts to retain global influence after the demise of its formal empire Contributing to a growing body of research which challenges the traditional historical narratives of British decline and colonial independence in the second half of the twentieth century this book fills an important gap in the historiography of Britain following the 1973 enlargement of the European Communities **European Integration Since the 1920s** Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re-examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community

during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union
