DAY FIGHTER CAMOUFLAGE

Edited by Michael Ullman

To fully appreciate and understand the various camouflage schemes and colors displayed by the aircraft profiles in this book, the reader should have a working understanding of the complex story of Luftwaffe camouflage schemes and colors. This brief summary covers the more important aspects of the subject but in no way should be considered comprehensive. Those wishing to learn more on the subject are advised to consult the various references quoted elsewhere in this book.

Introduction

On page 5 in both the 1958 and 1981 editions of the *Luftwaffenfarbenverzeichnis* (L.Fv.) 523/1 document, the following description clearly and neatly summarizes the Reichsluftfahrtministerium's (RLM) position on the reasons for painting aircraft:

Zweck der Lackierung (Purpose of Painting)

a) *Flächenschutz* (Covering of aircraft construction materials against the influence of the weather, water and payload, increasing the service life of the aircraft).

b) Making materials suitable for economical use (e.g., fabric).

c) Influencing the visibility of an aircraft.

Primarily, the RLM statements refer only to the surface protection aspects of painting, and not about the actual process, their colors or their uses. In short, camouflage was the least important attribute of painting aircraft.

Of the almost 50 identified RLM paint colors and their variations, the RLM listed official color names for only 28, up to color 73 Grün. All numerically higher numbered colors did not have an official descriptive name. Only aircraft manufacturers such as Messerschmitt and Dornier used the names of well-known colors such as Grassgrün for their own internal purposes. For their identification purposes, the RLM used only the *Flugzeugtauglichkeitsnummer* (Aircraft Construction Material Number), e.g., 7120476 to describe a specific color.

The Pre-War Period 1935-1939

The first Luftwaffe aircraft were painted with a surface protection application in a hue referred to as

Wittblau (Light Blue). These paints were spray-applied to create a soft edge between the colors. When hostilities broke out in September 1939, German fighters were painted in this dark green defensive camouflage scheme (see profiles Nos. 1 and 2). Very soon however, the combination of these dark colors were found to be too conspicuous in air-to-air combat. Consequently, the RLM issued an order in the winter of 1939-40 instructing all single-engine fighter units to limit the dark upper surface camouflage on aircraft to the extreme plan-view as seen from above. The effect of this order was that units quite simply extended the *Wittblau* coloring up the fuselage sides. At the same time new upper-surface camouflage patterns with contrasting colors emerged. The pattern consisted of a combination of Color 71 and colors 02 RLM Grün or 70/92 (see profiles Nos. 3, 4 and 5). With these changes, the German fighter pilots at last had a better and more appropriate offensive camouflage that made their aircraft harder to detect in the air.

The Battle of Britain 1940

During the Battle of Britain, new Gray colors emerged. Most, if not all, were mixed at the unit level from German paints, but it is possible that in some cases they were created from captured stocks of French paints. A significant change to the fighter camouflage occurred in August 1940. Due to the long fights over the English Channel and coastal over water, the light-colored *Wittblau* fuselage sides were found to be too conspicuous. The remedy was to modify the fuselage sides in a wide variety of green and Gray colors. These were often sprayed on resulting in a soft mottled finish. However in some cases the colors were applied with brushes, rags or sponges (see profiles Nos. 6, 10 and 11).

The Mid-War Period 1941-1944

During this period the Luftwaffe was operational over a vast portion of the globe, from the Arctic conditions of the North Cape to the deserts of North Africa, over both land and sea. In response to these tremendously varied climatic conditions and changing operational challenges on land, aircraft and water, the RLM was forced to provide colors and paints that would meet these demands. Once the German forces were forced on the defensive on all fronts and eventually lost command of the skies, commitment on the ground became paramount to the Luftwaffe's survival. Further, the Allied bombing offensive was beginning to cripple German industries which was manifested in severe shortages of raw materials, interrupted transportation networks, declining fuel stocks, loss of technical personnel and the like. Germany responded to this crisis by radically reorganizing and decentralizing weapons production, and reduction, simplification and substitution of manufactured components and raw materials. Thus, because of these events and responses to them, this period experienced the greatest changes and variability in the manufacturing and painting of Luftwaffe aircraft.

paratroopers together with remnants of tank units offered dogged resistance Meanwhile the rest of Eisenhower's broad front strategy came to a halt as Patton from the south and Hodges from the north converged on the enemy incursion Yet it would take an epic six week long winter battle the bloodiest in the history of the US Army before the Germans were finally pushed back Christer Bergström has interviewed veterans gone through huge amounts of archive material and performed on the spot research in the area The result is a large amount of previously unpublished material and new findings including reevaluations of tank and personnel casualties and the most accurate picture yet of what really transpired from the perspectives of both sides With nearly four hundred photos numerous maps and thirty two superb color profiles of combat vehicles and aircraft it provides perhaps the most comprehensive look at the battle yet published **TANKER DIGITAL 01 , Luftwaffe**

Fighter Aircraft in Profile Claes Sundin,2014 *World War II Fighter Planes Spotter's Guide* Tony Holmes,2021-02-04 A compact but comprehensive guide to the iconic fighter planes that fought during World War II which features full colour profile artwork throughout World War II saw pilots from around the world battling in the skies over Europe Asia and Africa with victory resting upon their nerve skill and the capabilities of some of history's most iconic aircraft In the chaos of battle it was vital that they could quickly identify friend from foe But do you know your Hurricane from your Bf 109 or what the legendary P 51 Mustang looks like Do you know the wingspan of the A6M Zero or how fast it could fly World War II Fighter Planes Spotter's Guide answers all of these questions and more providing essential information on over 90 legendary aircraft from the celebrated Spitfire to the jet powered Me 262 Featuring full colour artwork to aid recognition as well as all the details you need to assess their performance this is the perfect pocket guide to the Allied and Axis fighters of World War II *Modelling the Messerschmitt Bf 110* Brett Green,2012-02-20 The Messerschmitt Bf 110 was undoubtedly one of the most significant aircraft of World War II Despite suffering setbacks in the summer of 1940 at the hands of the RAF it continued to be used effectively in other theatres and roles until the last days of the war particularly as a night fighter against RAF Bomber Command's strategic bombing campaign over the Reich This title shows you how to correct and convert basic 1/48 scale kits of the Bf 110 into many different variants using a wide selection of aftermarket detail sets conversions accessories and decals for both day and night fighter schemes *Air University Library Index to Military Periodicals* ,1999

The Battle of Britain Christer Bergström,2015-09-19 A thorough look at this turning point WWII aerial battle with eyewitness accounts maps and rare photos incredibly well researched *Aircrew Book Review* By late summer 1940 Nazi Germany had conquered all its opponents on the continent including the British Army itself which was forced to scramble back aboard small boats to its shores A non aggression pact with the Soviet Union in hand Hitler had only one remaining object that season the British Isles themselves However before he could invade his Luftwaffe needed to wipe the Royal Air Force from the skies History's first strategic military campaign conducted in the air alone was about to take place This book contains a large number of dramatic eyewitness accounts even as it reveals new facts that will alter common perceptions of

the battle For example the twin engined Messerschmitt Bf 110 was actually a good day fighter and it performed at least as well in this role as the Bf 109 during the battle The Luftwaffe's commander Hermann Goring performed far better than has been believed The British night bombers played a more decisive role than previously thought in addition this book disproves that the German 109 pilots were in any way superior to their Hurricane or Spitfire counterparts The author has examined records from both sides and provides surprising statistics that shatter much conventional wisdom laying out the Battle of Britain as seldom seen before Includes color photos of the relevant aircraft
