Jolliff,Mark A. Wieczorek,Charles K. Shearer,Clive R. Neal,2018-12-17 Volume 60 of Reviews in Mineralogy and Geochemistry assesses the current state of knowledge of lunar geoscience given the data sets provided by missions of the 1990 s and lists remaining key questions as well as new ones for future exploration to address It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of

information The Moon is the only body other than Earth for which we have material samples of known geologic context for study This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience thus allowing more efficient planning for the exploration of other worlds Crop Production for Advanced Life Support Systems - Observations From the Kennedy Space Center Breadboard Project ,2003

Biochemistry of Scandium and Yttrium, Part 1: Physical and Chemical Fundamentals Chaim T.

Horovitz,2012-12-06 Biochemistry of Scandium and Yttrium gathers together existing knowledge about scandium and yttrium from a wide variety of disciplines Part 1 will present a comparative study of the physical and chemical properties of scandium and yttrium looking at both their similarities and their differences Part 2 will address the biochemical aspects of these two elements and the various medical and environmental applications While these elements are relatively rare in nature these books will show that they have unusual physical and chemical properties and a disproportionate number of important applications Improved analytical techniques have revealed that scandium and yttrium are present throughout living matter even though only a relatively limited number of species have been analyzed so far This fact of course has far ranging implications for biological and environmental concerns Part 1 also contains a discussion of the interactions of scandium and yttrium with molecules of biological interest such as organic acids carbohydrates proteins nucleotides and other biologically active molecules The major impacts of scandium and yttrium in science technology and medicine will be of interest to a wide variety of researchers including geochemists inorganic and organic chemists clinical biochemists and those specializing in environmental protection Biochemistry of Scandium and Yttrium Part 1 and Part 2 will be especially welcome because the last book published on the biochemistry of scandium appeared over 20 years ago and the only book mentioning the biochemistry of yttrium came out in 1990 **The Human Factor in the Settlement of the Moon** Margaret Boone

Rappaport,Konrad Szocik,2021-11-19 Approaching the settlement of our Moon from a practical perspective this book is well suited for space program planners It addresses a variety of human factor topics involved in colonizing Earth s Moon including history philosophy science engineering agriculture medicine politics policy sociology and anthropology Each chapter identifies the complex interdisciplinary issues of the human factor that arise in the early phases of settlement on the Moon Besides practical issues there is some emphasis placed on preserving protecting and experiencing the lunar environment across a broad range of occupations from scientists to soldiers and engineers to construction workers The book identifies utilitarian and visionary factors that shape human lives on the Moon It offers recommendations for program planners in the government and commercial sectors and serves as a helpful resource for academic researchers Together the coauthors ask and attempt to answer How will lunar society be different **Metapatterns** Tyler Volk,1996-06-29 In the interdisciplinary tradition of Buckminster Fuller s work Gregory Bateson s Mind and Nature and Fritjof Capra s Tao of Physics Metapatterns embraces both nature and culture seeking out the grand scale patterns that help explain the functioning of our universe

Agriculture and the Environment C.A. Edwards,M.K. Wali,D.J. Horn,F. Miller,2012-12-02 Until the 1980s global increases in food production exceeded the concomitant growth of human populations However progressively agriculture is becoming unable to meet the world wide per capita needs for food Unless there is major international cooperation in addressing the problems associated with population control it is predicted that the global human population will reach more than 14 billion by the year 2050 with provision of adequate food fuel and space for such an increased population unachievable These problems are accentuated by factors such as world wide reductions in soil fertility the accelerating degradation of land that is suitable for food production through soil erosion the world wide trend for migration of human populations from rural habitats to cities and extremely rapid rates of global deforestation Possible solutions to global sustainability in agriculture and natural resources must involve an integration of ecological sociological cultural and economic considerations as well as mandated international and national policies This publication outlines these problems and attempts to seek solutions

Chemical Bioavailability in Terrestrial Environments ,2011-08-31 This book begins with an overview of current thinking on bioavailability its definition cutting edge research in speciation and advancement in tools for assessing chemical bioavailability in the terrestrial environment The second section of the book focuses on the role of chemical speciation in bioavailability Section three addresses bioavailability and ecotoxicity of contaminants and leads into the next section on bioavailability of nutrients and agrichemicals Subsequent sections provide an overview of tools currently being used and new cutting edge techniques to assess contaminant bioavailability The last section of the book builds on previous sections in relating bioavailability to risk assessment and how this could be used for managing risks associated with contaminated land Provides the latest information on developing concepts and definitions of bioavailability Includes a discussion of bioavailability and ecotoxicity of contaminants and bioavailability of nutrients and agrichemicals for applications in agriculture Analyzes tools for assessing bioavailability and the role of bioavailability in risk assessment and remediation
