**Urban Multilingualism in East-Central Europe** Jan Fellerer, 2020-01-14 Urban Multilingualism in East Central

Europe The Polish Dialect of Late Habsburg Lviv makes the case for a two pronged approach to past urban multilingualism in East Central Europe one that considers both historical and linguistic features Based on archival materials from late Habsburg Lemberg now Lviv in western Ukraine the author examines its workings in day to day life in the streets shops and homes of the city in the late nineteenth and early twentieth centuries The places where the city's Polish Ukrainian Yiddish German encounters took place produced a distinct urban dialect A variety of south eastern borderland Polish it was subject to strong ongoing Ukrainian as well as Yiddish and German influence Jan Fellerer analyzes its main morpho syntactic features with reference to diverse written and recorded sources of the time This approach represents a departure from many other studies that focus on the phonetics and inflectional morphology of Slavic dialects Fellerer argues that contact induced linguistic change is contingent on the historical specifics of the contact setting The close knit urban community of historical Lviv and its dialect provide a rich interdisciplinary case study

**Music Glocalization** David Hebert, Mikolaj Rykowski, 2018-06-11

This unique edited volume offers a distinctive theoretical perspective and advanced insights into how music is impacted by the interaction of global forces with local conditions As the first major book to apply the timely notion of glocality to music this collection features robust scholarship on genres and practices from many corners of the world from studies of European opera professions and the oeuvre of several contemporary art music composers to music in Uzbekistan and Indonesia urban street musicians and even the didjeridoo The authors interrogate theories of glocalization distinguishing this notion from globalization and other more familiar concepts and demonstrate how its application illuminates the mechanisms that link changing musical practices and technologies with their social milieu This incisive book is relevant to scholars of many different specializations particularly those with a deep interest in relationships between music and society both past and present More broadly its discussions will be of value to those concerned with how changing policies and technologies impact cultural heritage and the creative approaches of performing artists worldwide
