make it easy for an inexperienced spider watcher to identify many of the common species encountered in and around the house. The spiders were divided according to the free living species and those that build intricate webs to catch their prey. The free living spiders were further divided according to those found on the vegetation and those living on the ground. Spiders are an abundant, diverse and highly successful group of animals. They are commonly found on farms, in gardens and also in houses. They are important predators in all terrestrial ecosystems and are regarded as the best friends of gardeners and farmers in sustainable agriculture because they have the important task of regulating the numbers of potentially harmful insects and mites. However, they are feared and maligned because of the venom they produce. We hope this field guide will help save the lives of a few spiders. It will be valuable for the man on the street, researchers, conservation agencies, students, gardeners, farmers as well as spider watchers and photographers.

New Perspectives on Academic Writing Bernd Herzogenrath, 2022-11-17. Particularly for the disciplines of the humanities and social sciences for which writing is their lifeblood, the crisis in academic writing has become existential. It is not hard to diagnose the disease and its causes. This book showcases what we desperately need: radical alternatives, experiments we can try out, ways of writing that don't just tweak the system but plot a different course altogether. This isn't just about finding new genres; for these only change the surface appearance without altering the underlying dynamic. Rather, the editor and contributors focus on finding new ways to join thinking both with writing and the things of which and with which we write. Each chapter brims with the kind of liveliness, outspokenness and urgency that their theme demands. Far from tiptoeing around the edifice of academia, they are intent on stirring things up, reigniting their scholarship with a fuse of activism in the hope of setting off an explosion that could send ripples throughout the academy.
