Substance and Energy Metabolism Associated with Neuroendocrine Regulation in Tumor Cells Ruiqin Han,Xiaochen Yuan,Qingbin Wu,Chenyu Sun,Peixin Dong,2023-12-05 An increasing number of studies suggest that the abnormality of substance and energy metabolism of tumor cells is among the unsolved complex pathological mechanism problems in malignant tumor The abnormal metabolism of substance and energy in tumor cells is not only the cause of occurrence and development of malignant tumors but also the concrete embodiment of their pathological changes Substance and energy metabolism of tumor cells largely depends on neuroendocrine regulation so it is of great scientific and clinical significance to analyze its regulatory mechanism The imbalance of material and energy metabolism of tumor cells is one of the major causes for the occurrence and development of tumors often regulated by neuroendocrine system Therefore neuroendocrine regulation plays an important role in tumorigenesis and development For example endocrine diseases such as diabetes and obesity are directly related to the occurrence and development of tumors This Research Topic aims to focus on the substance and energy metabolism and neuroendocrine regulation of tumor cells and to study and explore the novel approach of cancer prevention diagnosis treatment prognosis and drug development in order to provide rich theoretical basis for the prevention diagnosis treatment rehabilitation and control of malignant tumors
