Regulating Competition Susanna Fellman, Martin Shanahan, 2015-12-22. Cartels, trusts and agreements to reduce competition between firms have existed for centuries but became particularly prevalent toward the end of the 19th century. In the mid-20th century, governments began to use so-called cartel registers to monitor and regulate their behaviour. This book provides case studies from more than a dozen countries to examine the emergence, application and eventual decline of this form of regulation. Beginning with a comparison of the attitudes to regulation that led to monitoring rather than prohibiting cartels, this book examines the international studies on cartels undertaken by the League of Nations before World War II. This is followed by a series of studies on the context of the registers, including the international context of the European Union and the importance of lobby groups in shaping regulatory outcomes, using Finland as an example. Section two provides a broad international comparison of several countries' registers with individual studies on Norway, Australia, Japan, Germany, Sweden and the Netherlands. After examining the impact of registration on business behaviour in the insurance industry, this book concludes with an overview of the lessons to be learnt from 20th-century efforts to regulate competition. With a foreword by Harm Schroter, this book outlines the rise and fall of a system that allowed nations to tailor their approach to regulating competition to their individual circumstances whilst also responding to the pressures of globalisation that emerged after the Second World War. This book is suitable for those who are interested in and study economic history, international economics and business history.

Vessel Collisions in the Law of the Sea Alfredo C. Robles Jr., 2022-12-08. This book focuses on the decision of the Tribunal in the South China Sea Arbitration that China had operated its law enforcement vessels in ways that created risks of collision with Philippine official vessels at Scarborough Shoal in April and May 2012. The book explains the International Regulations for Preventing Collisions at Sea (COLREGS) and the incidents in layperson's terms. It analyzes China's violations of the COLREGS on the basis of confidential Philippine documents declassified for the Arbitration, technical works by professional mariners and the reports submitted by the navigational safety experts to the Tribunal. It pays attention to Chinese post-arbitration critiques of the Tribunal's decision, which it characterizes as rationalizations of collisions as instruments of Chinese foreign policy. It contrasts China's conduct with the practice of the US and Western European States, which mandate compliance with collision regulations even during law enforcement operations. The book draws on sources in five languages: English, French, German, Italian and Spanish, and helps the reader understand the pattern of China's harassment of vessels from littoral and non-littoral States in the South China Sea as well as the absence of legal foundations for China's rationalizations of its

Competition Policy and Price Fixing Louis Kaplow, 2013-06-30 Throughout the world the rule against price fixing is competition law's most important and least controversial prohibition Yet there is far less consensus than meets the eye on what constitutes price fixing and prevalent understandings conflict with the teachings of oligopoly theory that supposedly underlie modern competition policy Competition Policy and Price Fixing provides the needed analytical foundation It offers a fresh in depth exploration of competition law's horizontal agreement requirement presents a systematic analysis of how best to address the problem of coordinated oligopolistic price elevation and compares the resulting direct approach to the orthodox prohibition In doing so Louis Kaplow elaborates the relevant benefits and costs of potential solutions investigates how coordinated price elevation is best detected in light of the error costs associated with different types of proof and examines appropriate sanctions Existing literature devotes remarkably little attention to these key subjects and instead concerns itself with limiting penalties to certain sorts of interfirm communications Challenging conventional wisdom Kaplow shows how this circumscribed view is less well grounded in the statutes principles and precedents of competition law than is a more direct functional proscription More important by comparison to the communications based prohibition he explains how the direct approach targets situations that involve both greater social harm and less risk of chilling desirable behavior and is also easier to apply

The Goals of Competition Law Daniel Zimmer, 2012 What are the normative foundations of competition law That is the question at the heart of this book Leading scholars consider whether this branch of law serves just one or more than one goal and if it serves to protect unfettered competition as such how this goal relates to other objectives such as the promotion of economic welfare The book brings together contributions on the relevance of different welfare standards on the concept of freedom to compete and on distributional fairness as a goal of competition law Moreover it discusses the relationship to other legal goals such as market efficiency
