abstract theoretical principles out of texts Marx wrote with specific and historical political goals in mind He takes issue as well with critics who posit a Marxian belief in communist as against natural needs and further challenges the new orthodoxy in his analysis of Marx's dissertation showing that from the beginning Marx's thought was grounded in materialist determinism Supplementing the chapters on Marx and his critics the volume concludes with an essay on Georges Sorel's approach to textual analysis and interpretation showing how Sorel far in advance of his time realized the impossibility of completely objective analysis and the inevitable distortion of the subject under study Throughout this volume Stanley's critical approach utilizes Sorel's illuminating insights to point out the distortions in modern Marxian analysis Challenging and original Mainlining Marx is a major contribution to the study of Marxism It will be read by economists political scientists and intellectual historians

The Return of Nature John Bellamy Foster, 2020-06-16 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster's Marx's Ecology Materialism and Nature introduced a new understanding of Karl Marx's revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The

Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today's unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs *Marx in the Anthropocene* Kohei Saito, 2023-05-11 The book reveals

unknown aspects of Marx's vision of post capitalism that is adequate to the Anthropocene **Marx's Capital after 150 Years** Marcello Musto, 2019-09-23 Faced with a new crisis of capitalism many scholars are now looking back to the author whose ideas were too hastily dismissed after the fall of the Berlin Wall During the last decade Marx's Capital has received renewed academic and popular attention It has been reprinted in new editions throughout the world and the contemporary relevance of its pages is being discussed again Today Marx's analyses are arguably resonating even more strongly than they did in his own time and Capital continues to provide an effective framework to understand the nature of capitalism and its transformations This volume includes the proceedings of the biggest international conference held in the world to celebrate the 150th anniversary of Capital's publication The book is divided into three parts I Capitalism Past and Present II Extending the Critique of Capital III The Politics of Capital It contains the contributions of globally renowned scholars from 13 countries and multiple academic disciplines who offer diverse perspectives and critical insights into the principal contradictions of contemporary capitalism while pointing to alternative economic and social models Together they reconsider the most influential historical debates on Capital and provide new interpretations of Marx's magnum opus in light of themes rarely associated with Capital such as gender ecology and non European societies The book is an indispensable source for academic communities who are increasingly interested in rediscovering Marx beyond 20th century Marxism Moreover it will be of great appeal to students as well as established scholars interested in critique of capitalism and socialist theory **Marx and We** Sun Zhengyu, 2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical

foundations **Marx and the Earth** John Bellamy Foster, Paul Burkett, 2016-01-12 A decade and a half ago John Bellamy Foster and Paul Burkett introduced a new revolutionary understanding of the ecological foundations of Marx's thought demonstrating that Marx's concepts of the universal metabolism of nature, social metabolism and metabolic rift prefigured much of modern systems ecology. Ecological relations were shown to be central to Marx's critique of capitalism including his value analysis. Now in *Marx and the Earth* Foster and Burkett expand on this analysis in the process of responding to recent ecosocialist criticisms of Marx. The result is a full-fledged anti-critique pointing to the crucial roles that dialectics, open system thermodynamics, intrinsic value and aesthetic understandings played in the original Marxian critique, holding out the possibility of a new red-green synthesis.

A Redder Shade of Green Ian Angus, 2017-06-22 A socialist response to the looming ecological crisis. As the Anthropocene advances, people across the red-green political spectrum seek to understand and halt our deepening ecological crisis. Environmentalists, scientists and eco-socialists share concerns about the misuse and overuse of natural resources but often differ on explanations and solutions. Some blame environmental disasters on overpopulation. Others wonder if Darwin's evolutionary theories disprove Marx's revolutionary views or if capitalist history contradicts Anthropocene science. Some ask if all this worry about climate change and the ecosystem might lead to a catastrophism that weakens efforts to heal the planet. Ian Angus responds to these concerns in *A Redder Shade of Green* with a fresh, insightful clarity bringing socialist values to science and scientific rigor to socialism. He challenges not only mainstream green thought but also radicals who misuse or misrepresent environmental science. Angus's argument that confronting environmental destruction requires both cutting-edge scientific research and a Marxist understanding of capitalism makes this book an essential resource in the fight to prevent environmental destruction in the 21st century.

Watersheds in Marxist Ecofeminism Pamela Odih, 2014-10-21 The neoliberal environmental governance of river conservation coupled with the organizational modernization imposed and sustained by the European Union's water directives engenders Other Spaces of feminist ecological alignment. The riparian landscapes of urban cities are manifestations of political and ideological rationalities operating under the constraints of capitalist markets and are saturated by the contradictions of neoliberal environmental science. Neoliberal rationalities configur
