Pygmées Afrique Centrale:

Les Pygmées d'Afrique centrale Guy Philippart de Foy, 1984 Pygmées d'Afrique centrale Stefan Seitz, 1993 Peeters 1994 **Dans la Forêt D'Afrique Centrale** Serge Bahuchet, 1992 Peeters 1992 **La rencontre des agriculteurs** Serge Bahuchet, 1993 Peeters 1993 **Governing Africa's Forests in a Globalized World** Laura A. German, Anne-Marie Tiani, Alain Karsenty, 2009-12 Many countries around the world are engaged in decentralization processes and most African countries face serious problems with forest governance from benefits sharing to illegality and sustainable forest management This book summarizes experiences to date on the extent and nature of decentralization and its outcomes most of which suggest an underperformance of governance reforms and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests Findings are grouped into two thematic areas decentralization livelihoods and sustainable forest management and international trade finance and forest sector governance reforms The authors examine diverse forces shaping the forest sector including the theory and practice of decentralization usurpation of authority corruption and illegality inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits and discuss related outcomes on livelihoods forest condition and equity The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice **Global Ecology in Historical Perspective** Kazunobu Ikeya, William Balée, 2023-03-10 This book primarily examines human animal and human plant interactions in Asian forests Southeast Asia and Japan and inland waters China For comparison cases from the Americas whales in the Arctic sea turtles in the Caribbean and plants in the Amazon and Central Asia are also included The relationship between plants animals and humans in Asia is quite unique from a global perspective For example satoyama in Japan means ecotone area or the boundary between a village and a forest There as the number of inhabitants declines bears wild boars and other animals increasingly ravage crops sometimes attacking humans as well By showing the regional nature of human animal and human plant interactions in Asia this book provides for the first time a framework for understanding the world's animal and plant human relationships It is assumed that the relationships between humans and animals and plants during this period were diverse including hunting taming semi domestication and full domestication At the same time for regions outside of Asia the extent to which these diverse relationships were adapted and how diversity was formed is explained from the perspective of historical ecology Customers can expect to derive perspectives on the coexistence of human animal and plant animal relationships from this book in the near future The conservation of rare species diverse habitats and biodiversity is a central theme in considering the relationship between modern civilization and the global environment In post industrial Japan one focus has been the protection of iconic animals such as storks crested

ibis dugongs and sea turtles while damage to crops and humans by deer wild boars monkeys bears and other common animals has become an important social issue How can the world's 7.7 billion plus people live in harmony with other species We would like to get some hints on how to solve the problems we are facing Chez les pygmées d'Afrique centrale, des outils de l'éphémère... Serge Bahuchet, 1990 **The Archaeology and Ethnography of Central Africa** James Denbow, 2014 This book provides the first detailed description of the prehistory of the Loango coast of west central Africa over the course of more than 3000 years **Elephant meat trade in Central Africa : Central African Republic case study**, Hunter-Gatherers of the Congo Basin Barry S. Hewlett, 2017-07-12 The forest foragers of the Congo Basin known collectively as Pygmies are the largest and most diverse group of active hunter gatherers remaining in the world At least fifteen different ethno linguistic groups exist in the Congo Basin with a total population of 250 000 to 350 000 individuals Extensive knowledge about these groups has accumulated in the last forty years but readers have been forced to piece together what is known from many sources French Japanese American and British researchers have conducted the majority of the research each national research group has its own academic traditions history and publications Here leading academic authorities from diverse national traditions summarize recent research on forest hunter gatherers The volume explores the diversity and uniformity of Congo Basin hunter gatherer life by providing detailed but accessible overviews of recent research It represents the first book in over twenty five years to provide a comprehensive and holistic overview of African forest hunter gatherers Chapters discuss the cultural variation in characteristic features of Congo Basin hunter gatherer life such as their yodeled polyphonic music pronounced egalitarianism multiple child caregiving and complex relations with neighboring farming groups Other contributors address theoretical issues such as why Pygmies are short how tropical forest hunter gatherers live without the carbohydrates they receive from neighboring farmers and how hunter gatherer children learn to share so extensively Conservation de la Forêt Dense en Afrique Centrale Et de L'Ouest Kevin M. Cleaver, 1992 This volume brings together selected papers presented and discussed at the Conference on Conservation of West and Central African Rainforests held in Abidjan November 5-9 1990 **Forests of Belonging** Stephanie Karin Rupp, 2011-12-01 *Forests of Belonging* examines the history and ongoing transformation of ethnic and social relationships among four distinct communities Bangando Baka Bakwile and Mbomam in the Lobéké forest region of southeastern Cameroon By slotting forest communities into ecological categories such as hunters and gatherers previous analyses of social relationships in tropical forests have resulted in binary frameworks that render real life relationships invisible and that have perpetuated correspondingly misleading labels such as pygmy Through rich descriptive detail resulting from field work among the Bangando Stephanie Rupp illustrates the complexity of social ties among groups and individuals and their connections with the natural world She demonstrates that social and ethno ecological relations in equatorial African forests are nuanced contested and shifting and that the intricacy of these links must be considered in the design and implementation of aid

policies and strategies for conservation and development
