Procurement and the EU Competition Rules Albert Sánchez Graells,2015-06-25 Public procurement and competition law
are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their
close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the
many ways in which these fields often considered independent of one another interact and overlap in the creation of the
internal market This process of convergence between competition and public procurement law is particularly apparent in the
2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced
by the author in the first edition This second edition builds upon this approach and continues to ask how competition law
principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure
that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer
from a competition perspective Proceeding through a careful assessment of the general rules of competition and public
procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted
competition in the market for public procurement It also traces the increasing relevance of competition considerations in the
case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the
development of EU Economic Law *Services publics et droit public économique: Services publics et droit public*

économique Didier Linotte,Achille Mestre,Raphaël Romi,1982 *Capital, Market and the State* Ilektra Antonaki,2021-10-25

This book explores how the EU free movement of capital provisions can be interpreted in order to allow certain forms of
State participation in the market for the purposes of protecting public interest objectives in the context of privatisations and
golden shares Drawing from the international controversy regarding the risks and benefits of capital liberalisation the book
argues that the broad interpretation of capital restrictions under Article 63 TFEU has significant consequences for national
political economy choices and investigates the extent to which the existing legal framework set out in the Treaties offers
room for reconciling economic integration with societal values **State and Market in European Union Law** Wolf

Sauter, Harm Schepel, 2009-04-16 An examination of the legal framework of the EU internal market as established in the case law of the European Court of Justice discussing in particular EC competition law the free movement of goods services persons and capital and the evolution of the interpretation of the provisions The State has been retreating from direct intervention in economic life as more goods and services the provision of which was once thought to be a public responsibility are delivered through market mechanisms Given the need for consistent application of EC law in the internal market a common core conception of public authority shielded from the discipline of EC competition law is needed The resulting realignment of public and private functions and responsibilities is not a linear and coherent process especially in light of the changing nature of the European legal integration project and the progressive incorporation of non economic values in the Treaties
