Setup What The Air Force Did In Vietnam And Why:

Setup Earl H. Tilford, 1991 Beskriver og analyserer de amerikanske luftoperationer i Vietnamkrigen **Setup: What the Air Force Did in Vietnam and Why**, 1991 The United States Air Force of the 1990s faces perhaps the single greatest challenge to its institutional weltanschauung since it became an independent service in 1947 The specter of a hostile expansionist Soviet Union which for the last 45 years has justified the maintenance of a large strategic air force overwhelmingly oriented to the western European theater is fading fast with no similarly immense threat on the immediate horizon to take its place As a result the USAF perhaps more than any other US military service faces the prospect of losing the foundation upon which it has based its entire institutional identity and even its very existence Strategic bombing is not mere doctrine to the USAF it is its lifeblood and provides its entire raison d'être Strategic bombing is as central to the identity of the Air Force as the New Testament is to the Catholic church Without the Gospels there would be no pope and without strategic bombing there would be no Air Force The theology of strategic bombing has influenced every aspect of the Air Force's development since well before World War II This system of belief too often has led the keepers of the USAF's institutional memory to dismiss as aberrant peripheral and irrelevant anything that fell outside the narrow confines of its strategic concepts The USAF's uncritical approach to its own past has enabled it to declare strategic bombing decisive where it was not Europe 1943%5 to claim victory where there was none Vietnam 1972 and to neglect those air operations that indeed proved indispensable and potentially decisive tactical air campaigns in the European and Pacific theaters during World War II and in Korea during 1950 and 1951 **Setup** Earl H. Tilford, Jr., 2002-04 *Setup* Earl H. Tilford, Air University Press, 2013-07 **Setup** Air University Press, U. S. Military, Department of Defense (DoD), Earl H. Tilford, U. S. Air Force (USAF), 2017-10-18 American military professionals especially the US Air Force have had a difficult time understanding their role in this nation's defeat in Vietnam Dr Tilford provides a critical self analysis and questions the underlying assumptions of the Air Force's strategy in Southeast Asia He argues that we must understand what went wrong in Vietnam and why and not manipulate the record and paint failure as victory He explains what led to the setup which not only resulted in a failure for airpower but also contributed to the fall of South Vietnam Laos and Cambodia to Communist forces in 1975 Tilford a retired Air Force officer and a widely respected historian in his own right is not squeamish about demolishing the myths that abound concerning the air war in Southeast Asia He is forthright in challenging both the USAF's strategic tunnel vision and the cherished misconceptions of many civilian historians whose criticisms of the air war in Vietnam are long on politics and short on facts The integrity of Dr Tilford's research his knowledge of air power theory and technology and his expertise as a historian all contribute to a high quality effort that proves among other things that neither the Air Force nor its civilian critics have yet secured a monopoly on truth In his analysis of the air war against North Vietnam Tilford presents one overwhelming lesson that USAF strategic bombing doctrine is ethnocentric and Eurocentric and is conceived utterly without

regard to important cultural and political variations among potential adversaries This lesson more than any other is one that today's Air Force must learn if it is to establish any relevance in a post cold war world in which the global superpower war for which it has planned almost exclusively since 1945 becomes an ever more remote possibility Whatever the Air Force's operational role in the twenty first century turns out to be it seems likely that an air technocracy geared toward fighting a general war against a modern industrialized major power will become even less relevant than it proved to be in Korea and Vietnam At the very least the Air Force of the future will do well to heed Dr Tilford's other major conclusion that because war is more than sortie generation and getting ordnance on targets statistics are a poor substitute for strategy Contents

Military Aspects of the Vietnam Conflict Walter L. Hixson, 2000 The Vietnam War was in the words of a preeminent scholar of the conflict George C Herring America's longest war The Indochina conflict spanned the first generation of the larger Cold War and lasts to this day in American memory and cultural representation Although the war remains a sensitive subject for many a consensus exists that would echo the words of former Secretary of Defense Robert S McNamara in his memoir In Retrospect We were wrong we were terribly wrong The six volumes in this series pull together the best article literature on the History of American Involvement in Vietnam The scholars writing in the first volume explore the roots of U S intervention which followed in the wake of France's failed effort supported and financed in Washington to assert imperial control over Indochina Volume II analyzed military aspects of the Vietnam War's history Volume V focuses on the lessons and legacies of the conflict the source of a particularly sharp debate during the first administration of President Ronald W Reagan The final volume in the series analyzes the Vietnam War's extensive afterlife in memory film literature and popular discourse Available individually by volume Volume 1 The Origins of Intervention 0 8153 3531 8 Volume 2 Military

Strategy and Escalation 0 8153 3532 6 Volume 3 Executive Legislative Relations Tracing the Impact of the War on U S Governmental Structures and Policies 0 8153 3533 4 Volume 4 The Diplomacy of War 0 8153 3534 2 Volume 5 The Anti War Movement 0 8153 3535 0 Volume 6 Representation Memories and Legacies 0 8153 3536 9 The Evolution of the US Air Force Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general **Concepts for Air Force Leadership** , 1990 **The Air Force Way of War** Brian D. Laslie, 2015-06-23 Laslie chronicles how the Air Force worked its way from the catastrophe of Vietnam through the triumph of the Gulf War and beyond Robert M Farley author of Grounded The U S Air Force s poor performance in Operation Linebacker II and other missions during Vietnam was partly due to the fact that they had trained their pilots according to methods devised during World War II and the Korean War when strategic bombers attacking targets were expected to take heavy losses Warfare had changed by the 1960s but the USAF had not adapted Between 1972 and 1991 however the Air Force dramatically changed its doctrines and began to overhaul the way it trained pilots through the introduction of a groundbreaking new training program called Red Flag In The Air Force Way of War Brian D Laslie examines the revolution in pilot instruction that Red Flag brought about after Vietnam The program s new instruction methods were dubbed realistic because they prepared pilots for real life situations better than the simple cockpit simulations of the past and students gained proficiency on primary and secondary missions instead of superficially training for numerous possible scenarios In addition to discussing the program s methods Laslie analyzes the way its graduates actually functioned in combat during the 1980s and 90s in places such as Grenada Panama Libya and Iraq Military historians have traditionally emphasized the primacy of technological developments during this period and have overlooked the vital importance of advances in training but Laslie s unprecedented study of Red Flag addresses this oversight through its examination of the seminal program A refreshing look at the people and operational practices whose import far exceeds technological advances The Strategy Bridgei America

in Vietnam Herbert Y. Schandler, 2009-08-16 This controversial and timely book about the American experience in Vietnam provides the first full exploration of the perspectives of the North Vietnamese leadership before during and after the war. Herbert Y. Schandler offers unique insights into the mindsets of the North Vietnamese and their response to diplomatic and military actions of the Americans, laying out the full scale of the disastrous U.S. political and military misunderstandings of Vietnamese history and motivations. Including frank quotes from Vietnamese leaders, the book offers important new knowledge that allows us to learn invaluable lessons from the perspective of a victorious enemy. Unlike most military officers who served in Vietnam, Schandler is convinced the war was unwinnable no matter how long America stayed the course or how many resources were devoted to it. He is remarkably qualified to make these judgments as an infantry commander during the Vietnam War, a Pentagon policymaker, and a scholar who taught at West Point and National Defense University. His extensive personal interviews with North Vietnamese are drawn from his many trips to Hanoi after the war. Schandler provides not only a definitive analysis of the American failure in Vietnam but a crucial foundation for exploring the potential for success in the current guerrilla wars the United States is fighting in Iraq and Afghanistan.
