Cook, Simone Cusack, 2011-07-19 Drawing on domestic and international law as well as on judgments given by courts and human rights treaty bodies Gender Stereotyping offers perspectives on ways gender stereotypes might be eliminated through the transnational legal process in order to ensure women's equality and the full exercise of their human rights A leading international framework for debates on the subject of stereotypes the Convention on the Elimination of All Forms of Discrimination against Women was adopted in 1979 by the UN General Assembly and defines what constitutes discrimination against women It also establishes an agenda to eliminate discrimination in all its forms in order to ensure substantive equality for women Applying the Convention as the primary framework for analysis this book provides essential strategies for eradicating gender stereotyping Its proposed methodology requires naming operative gender stereotypes identifying how they violate the human rights of women and articulating states obligations to eliminate and remedy these violations According to Rebecca J Cook and Simone Cusack in order to abolish all forms of discrimination against women priority needs to be given to the elimination of gender stereotypes While stereotypes affect both men and women they can have particularly egregious effects on women often devaluing them and assigning them to subservient roles in society As the legal perspectives offered in Gender Stereotyping demonstrate treating women according to restrictive generalizations instead of their individual needs abilities and circumstances denies women their human rights and fundamental freedoms *Sex, Morality, and the Law* Lori Gruen, George E. BOOK JACKET *Gender-Competent Legal Education* Dragica Vujadinović, Mareike Fröhlich, Thomas Giegerich, 2023-02-03 Male dominated law and legal knowledge essentially characterized the whole of pre modern history in that the patriarchy represented the axis of social relations in both the private and public spheres Indeed modern and even contemporary law still have embedded elements of patriarchal heritage even in the secular modern legal systems of Western developed countries either within the content of legislation or in terms of its implementation and interpretation This is true to a greater or lesser extent across legal systems although the secular modern legal systems of the Western developed countries have made great advances in terms of gender equality The traditional understanding of law has always been self evidently dominated by men but modern law and its understanding have also been more or less malestreamed Therefore it has become necessary to overcome the given masculinity of legal thought In contemporary legal and political orders gender mainstreaming of law has been of the utmost importance for overcoming deeply and persistently embedded power relations and gender based unequal social relations At the same time and equally importantly the gender mainstreaming of legal education to which this book aims to contribute can help to gradually eliminate this male dominance and accompanying power relations from legal education and higher education as a whole This open access textbook provides an overview of gender issues in all areas of law including sociological historical and methodological issues Written for students and teachers around the globe it is intended to provide both a general overview and in depth knowledge in the individual areas of law Relevant court decisions and case studies are supplied throughout the book
