The Formation of School Subjects Thomas S. Popkewitz, 2018-10-03 Originally published in 1987 This volume focuses upon the emergence of the subject matter of the American school This provides entrance to looking at the interplay between social cultural economic and professional interests that give form to contemporary school practices The historical detail enables understanding of how school knowledge is shaped and fashioned by issues of structural continuity and social transformation This selection of chapters looks at how practices have been shaped by the struggles to define the American school curriculum in different subjects The authors bring out how particular social values are made into ideologies and examine the past to enable consideration of the possibilities for further development *Producing Good Citizens* Amy J. Wan, 2014-03-30 Recent global security threats economic instability and political uncertainty have placed great scrutiny on the requirements for U S citizenship The stipulation of literacy has long been one of these criteria In *Producing Good Citizens* Amy J Wan examines the historic roots of this phenomenon looking specifically to the period just before World War I up until the Great Depression During this time the United States witnessed a similar anxiety over the influx of immigrants economic uncertainty and global political tensions Early on educators bore the brunt of literacy training while also being charged with producing the right kind of citizens by imparting civic responsibility and a moral code for the

workplace and society Literacy quickly became the credential to gain legal economic and cultural status In her study Wan defines three distinct pedagogical spaces for literacy training during the 1910s and 1920s Americanization and citizenship programs sponsored by the federal government union sponsored programs and first year university writing programs Wan also demonstrates how each literacy program had its own motivation the federal government desired productive citizens unions needed educated members to fight for labor reform and university educators looked to aid social mobility Citing numerous literacy theorists Wan analyzes the correlation of reading and writing skills to larger currents within American society She shows how early literacy training coincided with the demand for laborers during the rise of mass manufacturing while also providing an avenue to economic opportunity for immigrants This fostered a rhetorical link between citizenship productivity and patriotism Wan supplements her analysis with an examination of citizen training books labor newspapers factory manuals policy documents public deliberations on citizenship and literacy and other materials from the period to reveal the goal and rationale behind each program Wan relates the enduring bond of literacy and citizenship to current times by demonstrating the use of literacy to mitigate economic inequality and its lasting value to a productivity based society Today as in the past educators continue to serve as an integral part of the literacy training and citizen making process

Reconceiving Writing, Rethinking Writing Instruction Joseph Petraglia, 2013-11-05 To a degree unknown in practically any other discipline the pedagogical space afforded composition is the institutional engine that makes possible all other theoretical and research efforts in the field of rhetoric and writing But composition has recently come under attack from many within the field as fundamentally misguided Some of these critics have been labelled New Abolitionists for their insistence that compulsory first year writing should be abandoned Not limiting itself to first year writing courses this book extends and modifies calls for abolition by taking a closer look at current theoretical and empirical understandings of what contributors call general writing skills instruction GWSI the curriculum which an overwhelming majority of writing instructors is paid to teach that practically every composition textbook is written to support and the instruction for which English departments are given resources to deliver The vulnerability of GWSI is hardly a secret among writing professionals and its intellectual fragility has been felt for years and manifested in several ways in persistently low status of composition as a study both within and outside of English departments in professional journal articles and conference presentations that are growing both in theoretical sophistication and irrelevance to the composition classroom and in the rhetoric and writing field s ever increasing attention to nontraditional sites of writing behavior But to date there has been relatively little concerted discussion within the writing field that focuses specifically on the fundamentally awkward relationship of writing theory and writing instruction This volume is the first to explicitly focus on the gap in the theory and practice that has emerged as a result of the field s growing professionalization The essays anthologized offer critiques of GWSI in light of the discipline s growing understanding of the contexts for writing and their rhetorical nature Writing from a wide range of cognitivist critical

theoretical historical linguistic and philosophical perspectives contributors call into serious question basic tenets of contemporary writing instruction and provide a forum for articulating a sort of zeitgeist that seems to permeate many writing conferences but which has until recently not found a voice or a name *The Future of English Teaching Worldwide* Andrew Goodwyn, Cal Durrant, Wayne Sawyer, Lisa Scherff, Don Zancanella, 2018-10-31 The seminal Dartmouth Conference 1966 remains a remarkably influential moment in the history of English teaching Bringing together leading voices in contemporary English education this book celebrates the Conference and its legacy drawing attention to what it has achieved and the questions it has raised Encompassing a multitude of reflections on the Dartmouth Conference *The Future of English Teaching Worldwide* provides fresh and revisionist readings of the meeting and its leading figures Chapters showcase innovative and exciting new insights for English scholars and address both theoretical and practical elements of teaching English in a variety of settings and countries Covering topics including the place of new media in English curricula the role of the canon poetry and grammar the text is divided into three accessible parts Historical perspectives Dartmouth today why it still matters Reflections but for the future This powerful collection will be of value to researchers postgraduate students literature scholars practitioners teacher educators trainee and in service teachers as well as other parties involved in the teaching and study of English *Rhetoric and Reality* James A. Berlin, 1987-02-26 Berlin here continues his unique history of American college composition begun in his *Writing Instruction in Nineteenth Century Colleges* 1984 turning now to the twentieth century In discussing the variety of rhetorics that have been used in writing classrooms Berlin introduces a taxonomy made up of three categories objective rhetorics subjective rhetorics and transactional rhetorics which are distinguished by the epistemology on which each is based He makes clear that these categories are not tied to a chronology but instead are to be found in the English department in one form or another during each decade of the century His historical treatment includes an examination of the formation of the English department the founding of the NCTE and its role in writing instruction the training of teachers of writing the effects of progressive education on writing instruction the General Education Movement the appearance of the CCCC the impact of Sputnik and today's literacy crisis **The World's Religions** Peter Clarke, Friedhelm Hardy, Leslie Houlden, Stewart Sutherland, 2004-01-14 Gives an account of the history the theological basis the practice and the current state of the study of religion and religions throughout the world Combines a clear and non technical style of presentation with a structure and range of contributions which reflect the richness and complexity of religion itself of the religions of the world and the study of religions Comprehensive index bibliographies and suggestions for further reading Intriguing philosophical questions are raised about the nature of religion and the qualities needed for studying it Times Higher Education Supplement Excellent book remarkably successful impressive as much for the sheer scale of the undertaking as for its consistent standard of analysis It is a fine achievement which will serve both as a very suitable textbook for students and a reliable guide to the state of scholarship in the History and Study of Religions Heythrop Journal

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field. At present, however, graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline. This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development. Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline. The first part of the book provides entries for leaders in composition studies. Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works. The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline. The entries for the terms show how the disciplinary context has shaped the ways in which they have been used. The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms, provide examples of the terms in context, and list scholars often associated with them. An appendix includes entries for scholars from other disciplines who have contributed to the field.
