Applied Theatre: Research Peter O'Connor, Michael Anderson, 2015-02-26 Applied

Theatre Research is the first book to consolidate thinking about applied theatre as research through a thorough investigation of ATAR as a research methodology. It will be an indispensable resource for teachers and researchers in the area. The first section of the book details the history of the relationship between applied theatre and research especially in the area of evaluation and impact assessment and offering an examination of the literature surrounding applied theatre and research. The book then explores how applied theatre as research ATAR works as a democratic and pro social adjunct to community based research and explains its complex relationship to arts informed inquiry Indigenous research methods and other research epistemologies. The book provides a rationale for this approach focusing on its capacity for reciprocity within communities. The second part of the book provides a series of international case studies of effective practice which detail some of the key approaches in the method and based on work conducted in Australia New Zealand Singapore and the South Pacific. The case studies provide a range of cultural contexts for the playing out of various forms of ATAR and a concluding chapter considers the tensions and the possibilities inherent in ATAR. This is a groundbreaking book for all researchers who are working with communities who require a method that moves beyond current research practice. **Thinking**

Qualitatively Johnny Saldana, 2014-09-03. Written in Johnny Salda's elegant and accessible style. **Thinking Qualitatively** Methods of Mind boldly pursues the challenge of teaching students not just how to collect and analyze data but how to actively think about them. Each chapter presents one method of mind thinking analytically realistically symbolically ethically multidisciplinarily artistically summarily interpretively and narratively together with applications a vignette or story related to the thinking modality points to remember and exercises. Designed to help researchers rise above the data the book explores how qualitative research designs data collection data analyses and write ups can be enriched through over 60 different lenses filters and angles on social life. Venturing into more evocative and multidimensional ways to examine the complex patterns of daily living the book reveals how the researcher's mind thinks heuristically to transcend the descriptive and develop high deep insights about the human condition. This is a book for all qualitative methodologists. Not just a how to manual but an epistemological exercise in understanding qualitative methods. Cassie F. Quigley, Clemson University. This book fills an important void in the field. The market is crowded with books on techniques and strategies for conducting qualitative research. Salda's volume provides a vital complement by encouraging students to develop the core analytical skills and interpretive frames they need to be truly successful in their research endeavors. He helps students flex and hone the epistemological muscles that are at the center of capable qualitative research. John P. Bartkowski, University of Texas at San Antonio. The focus of the book is clear and consistent. The writing is superb. It deals with sophisticated ideas in a clear and highly communicative style. It weaves important and relevant scholarship in ways that help the reader grasp the key ideas. It's one of the best books I have read. Liora Bresler, University of Illinois at Urbana-Champaign. **Thinking Qualitatively** invites students to think before they act and offers a rich set of options for qualitative researchers to consider. Michael Brown.

University of Wyoming This book brings together key ways of thinking about our work as qualitative researchers In many ways it captures the breadth and depth of our work while calling for us to be ever reflexive about our practices I see this book as positively informing the work of novice and experienced researchers It is a much needed addition to the qualitative research community Jessica Nina Lester Indiana University
